The 2030 Spike Colin Mason,2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

Limit Order Books Frédéric Abergel,Marouane Anane,Anirban Chakraborti,Aymen Jedidi,Ioane Muni Toke,2016-05-09 A limit order book is essentially a file on a computer that contains all orders sent to the market, along with their characteristics such as the sign of the order, price, quantity and a timestamp. The majority of organized electronic markets rely on limit order books to store the list of interests of market participants on their central computer. A limit order book contains all the information available on a specific market and it reflects the way the market moves under the influence of its participants. This book discusses several models of limit order books. It begins by discussing the data to assess their empirical properties, and then moves on to mathematical models in order to reproduce the observed properties. Finally, the book presents a framework for numerical simulations. It also covers important modelling techniques including agent-based modelling, and advanced modelling of limit order books based on Hawkes processes. The book also provides in-depth coverage of simulation techniques and introduces general, flexible, open source library concepts useful to readers studying trading strategies in order-driven markets.

Anaphora Resolution and Text Retrieval Helene Schmolz,2015-03-30 This book covers anaphora resolution for the English language from a linguistic and computational point of view. First, a definition of anaphors that applies to linguistics as well as information technology is given. On this foundation, all types of anaphors and their characteristics for English are outlined. To examine how frequent each type of anaphor is, a corpus of different hypertexts has been established and analysed with regard to anaphors. The most frequent type are non-finite clause anaphors - a type which has never been investigated so far. Therefore, the potential of non-finite clause anaphors are further explored with respect to anaphora resolution. After presenting the fundamentals of computational anaphora resolution and its application in text retrieval, rules for resolving non-finite clause anaphors are established. Therefore, this book shows that a truly interdisciplinary approach can achieve results which would not have been possible otherwise.

George IV Jonathan Marsden,Steven Parissien,Rebecca E. Lyons,Vanessa Remington,David Oakey (Picture library assistant),Rufus Bird,Desmond Shawe-Taylor,David Beevers,Alexandra Loske,Sally Goodsir,Emma Stuart,Deborah Clarke (Curator),Rachel Peat,2019 Published to accompany a major exhibition at The Queen's Galleries in London and Edinburgh, this book provides new insights into George IV as a collector. Although George led a life bounded by convention, he was a genuine connoisseur who was able to form an unrivalled collection of paintings, porcelain and furniture. These he presented and displayed in a series of architecturally adventurous spaces. His acquisitions continue to form the backdrop to royal ceremony, a legacy that is one of the principal pillars of today's magnificent Royal Collection.

Cuisine and Culture Linda Civitello,2011-03-29 An illuminating account of how history shapes our diets—now in a new revised and updated Third Edition Why did the ancient Romans believe cinnamon grew in swamps guarded by giant killer bats? How did African cultures imported by slavery influence cooking in the American South? What does the 700-seat McDonald's in Beijing serve in the age of globalization? With the answers to these and many more such questions, Cuisine and Culture, Third Edition presents an engaging, entertaining, and informative exploration of the interactions among history, culture, and food. From prehistory and the earliest societies in the Fertile Crescent to today's celebrity chefs, Cuisine and Culture, Third Edition presents a multicultural and multiethnic approach to understanding how and why major historical events have affected and defined the culinary traditions in different societies. Now revised and updated, this Third Edition is more comprehensive and insightful than ever before. Covers prehistory through the present day—from the discovery of fire to the emergence of television cooking shows Explores how history, culture, politics, sociology, and religion have determined how and what people have eaten through the ages Includes a sampling of recipes and menus from different historical periods and cultures Features French and Italian pronunciation guides, a chronology of food books and cookbooks of historical importance, and an extensive bibliography Includes all-new content on technology, food marketing, celebrity chefs and cooking television shows, and Canadian cuisine. Complete with revealing historical photographs and illustrations, Cuisine and Culture is an essential introduction to food history for students, history buffs, and food lovers.

Evaluation of the Department of Veterans Affairs Mental Health Services National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Health Care Services,Committee to Evaluate the Department of Veterans Affairs Mental Health Services,2018-03-29 Approximately 4 million U.S. service members took part in the wars in Afghanistan and Iraq. Shortly after troops started returning from their deployments, some active-duty service members and veterans began experiencing mental health problems. Given the stressors associated with war, it is not surprising that some service members developed such mental health conditions as posttraumatic stress disorder, depression, and substance use disorder. Subsequent epidemiologic studies conducted on military and veteran populations that served in the operations in Afghanistan and Iraq provided scientific evidence that those who fought were in fact being diagnosed with mental illnesses and experiencing mental health-related outcomes—in particular, suicide—at a higher rate than the general population. This report provides a comprehensive assessment of the quality, capacity, and access to mental health care services for veterans who served in the Armed Forces in Operation Enduring Freedom/Operation Iraqi Freedom/Operation New Dawn. It includes an analysis of not only the quality and capacity of mental health care services within the Department of Veterans Affairs, but also barriers faced by patients in utilizing those services.

Future U.S. Workforce for Geospatial Intelligence National Research Council,Policy and Global Affairs,Board on Higher Education and Workforce,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Committee on the Future U.S. Workforce for Geospatial Intelligence,2013-04-28 We live in a changing world with multiple and evolving threats to national security, including terrorism, asymmetrical warfare (conflicts between agents with different military powers or tactics), and social unrest. Visually depicting and assessing these threats using imagery and other geographically-referenced information is the mission of the National Geospatial-Intelligence Agency (NGA). As the nature of the threat evolves, so do the tools, knowledge, and skills needed to respond. The challenge for NGA is to maintain a workforce that can deal with evolving threats to national security, ongoing scientific and technological advances, and changing skills and expectations of workers. Future U.S. Workforce for Geospatial Intelligence assesses the supply of expertise in 10 geospatial intelligence (GEOINT) fields, including 5 traditional areas (geodesy and geophysics, photogrammetry, remote sensing, cartographic science, and geographic information systems and geospatial analysis) and 5 emerging areas that could improve geospatial intelligence (GEOINT fusion, crowdsourcing, human geography, visual analytics, and forecasting). The report also identifies gaps in expertise relative to NGA's needs and suggests ways to ensure an adequate supply of geospatial intelligence expertise over the next 20 years.

Thinking on Screen Thomas E. Wartenberg,2007-10-31 Thinking on Screen: Film as Philosophy is an accessible and thought-provoking examination of the way films raise and explore complex philosophical ideas. Written in a clear and engaging style, Thomas Wartenberg examines

films’ ability to discuss, and even criticize ideas that have intrigued and puzzled philosophers over the centuries such as the nature of personhood, the basis of morality, and epistemological skepticism. Beginning with a demonstration of how specific forms of philosophical discourse are presented cinematically, Wartenberg moves on to offer a systematic account of the ways in which specific films undertake the task of philosophy. Focusing on the films *The Man Who Shot Liberty Valance*, *Modern Times*, *The Matrix*, *Eternal Sunshine of the Spotless Mind*, *The Third Man*, *The Flicker*, and *Empire*, Wartenberg shows how these films express meaningful and pertinent philosophical ideas. This book is essential reading for students of philosophy with an interest in film, aesthetics, and film theory. It will also be of interest to film enthusiasts intrigued by the philosophical implications of film.

Chinese Ceramics Stacey Pierson,2009-09 Chinese ceramics are among the most widely admired and collected in the world. From elegant Song celadons to decorative Ming vases and colorful Qing famille rose, ceramics produced in China have influenced taste and daily life globally. This new design history draws on the V&A’s comprehensive collection to look at the production, consumption, aesthetics, and transfer of Chinese ceramics. Stunning new photography illustrates more than 200 pieces, including previously unpublished objects. It also explores ceramics made in the twentieth and twenty-first centuries, from Republic period porcelain to propaganda ware and studio pottery, a first for any survey history of the subject.--Publisher's description.

Language-learner Computer Interactions Catherine Caws,Marie-Josée Hamel,2016 This book focuses on learner-computer interactions (LCI) in second language learning environments drawing largely on sociocultural theories of language development. It brings together a rich and varied range of theoretical discussions and applications in order to illustrate the way in which LCI can enrich our comprehension of technology-mediated communication, hence enhancing learners' digital literacy skills. The book is based on the premise that, in order to fully understand the nature of language and literacy development in digital spaces, researchers and practitioners in linguistics, sciences and engineering need to borrow from each others' theoretical and practical toolkits. In light of this premise, themes include such aspects as educational ergonomics, affordances, complex systems learning, learner personas and corpora, while also describing such data collecting tools as video screen capture devices, eye-tracking or intelligent learning tutoring systems. The book should be of interest to applied linguists working in CALL, language educators and professionals working in education, as well as computer scientists and engineers wanting to expand their work into the analysis of human/learner interactions with technology communication devices with a view to improving or (re)developing learning and communication instruments. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.
