The Fingerprint U. S. Department Justice,2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

End-to-end Integration with IBM Sterling B2B Integration and Managed File Transfer solutions

James Ballentine,Claudemir Braghirolli,Vasfi Gucer,Rahul Gupta,James B Herry,Richard Kinard,Gianluca Meloni,Bala Sivasubramanian,Eduardo Ribeiro de Souza,Frank Strecker,Gang Yin,IBM Redbooks,2012-07-21 Across numerous vertical industries, enterprises are challenged to improve processing efficiency as transactions flow from their business communities to their internal systems and vice versa, simplify management and expansion of the external communities, accommodate customer and supplier preferences, govern the flow of information, enforce policy and standards, and protect sensitive information. Throughout this process, external partners must be on-boarded and off-boarded, information must flow across multiple communications infrastructures, and data must be mapped and transformed for consumption across multiple applications. Some transactions require synchronous or real-time processing while others are of a more periodic nature. For some classes of customer or supplier, the enterprise might prefer a locally-managed, on-premise solution. For some types of communities (often small businesses), an as-a-Service solution might be the best option. Many large enterprises combine the on-premise and as-a-Service approach to serve different

categories of business partners (customers or suppliers). This IBM® Redbooks® publication focuses on solutions for end-to-end integration in complex value chains and presents several end-to-end common integration scenarios with IBM Sterling and IBM WebSphere® portfolios. We believe that this publication will be a reference for IT Specialists and IT Architects implementing an integration solution architecture involving IBM Sterling and IBM WebSphere portfolios.

Parole, Desistance from Crime, and Community Integration National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Law and Justice,Committee on Community Supervision and Desistance from Crime,2007-12-26 Every day, about 1,600 people are released from prisons in the United States. Of these 600,000 new releasees every year, about 480,000 are subject to parole or some other kind of postrelease supervision. Prison releasees represent a challenge, both to themselves and to the communities to which they return. Will the releasees see parole as an opportunity to be reintegrated into society, with jobs and homes and supportive families

and friends? Or will they commit new crimes or violate the terms of their parole contracts? If so, will they be returned to prison or placed under more stringent community supervision? Will the communities to which they return see them as people to be reintegrated or people to be avoided? And, the institution of parole itself is challenged with three different functions: to facilitate reintegration for parolees who are ready for rehabilitation; to deter crime; and to apprehend those parolees who commit new crimes and return them to prison. In recent decades, policy makers, researchers, and program administrators have focused almost exclusively on recidivism, which is essentially the failure of releasees to refrain from crime or stay out of prison. In contrast, for this study the National Institute of Justice (NIJ) of the U.S. Department of Justice asked the National Research Council to focus on desistance, which broadly covers continued absence of criminal activity and requires reintegration into society. Specifically, the committee was asked (1) to consider the current state of parole practices, new and emerging models of community supervision, and what is necessary for successful reentry and (2) to provide a research agenda on the effects of community supervision on desistance from criminal

activity, adherence to conditions of parole, and successful reentry into the community. To carry out its charge, the committee organized and held a workshop focused on traditional and new models of community supervision, the empirical underpinnings of such models, and the infrastructure necessary to support successful reentry. Parole, Desistance from Crime, and Community Integration also reviews the literature on desistance from crime, community supervision, and the evaluation research on selected types of intervention.

Cybercrime and Cloud Forensics: Applications for Investigation Processes Ruan, Keyun,2012-12-31 While cloud computing continues to transform developments in information technology services, these advancements have contributed to a rise in cyber attacks; producing an urgent need to extend the applications of investigation processes. Cybercrime and Cloud Forensics: Applications for Investigation Processes presents a collection of research and case studies of applications for investigation processes in cloud computing environments. This reference source brings

together the perspectives of cloud customers, security architects, and law enforcement agencies in the developing area of cloud forensics.

   Hard Times and New Deal in Kentucky George T. Blakey,2014-07-15 The Great Depression and the New Deal touched the lives of almost every Kentuckian during the 1930s. Fifty years later the Commonwealth is still affected by the legacies of that era and the policies of the Roosevelt administration. George T. Blakey has written the first full study of this turbulent decade in Kentucky, and he offers a fresh perspective on the New Deal programs by viewing them from the local and state level rather than from Washington. Thousands of Kentuckians worked for New Deal programs such as the Civilian Conservation Corps and the Works Projects Administration; thousands more kept their homes through loans from the Home Owners Loan Corporation. Tobacco growers adopted new production techniques and rural farms received their first electricity because of the Agricultural Adjustment and Rural Electrification administrations. The New Deal stretched from the Harlan County coal mines to a TVA dam near Paducah, and it encompassed subjects as small as Social Security

pension checks and as large as revived Bourbon distilleries. The impact of these phenomena on Kentucky was both beneficial and disruptive, temporary and enduring. Blakey analyzes the economic effects of this unprecedented and massive government spending to end the depression. He also discusses the political arena in which Governors Laffoon, Chandler, and Johnson had to wrestle with new federal rules. And he highlights social changes the New Deal brought to the Commonwealth: accelerated urbanization, enlightened land use, a lessening of state power and individualism, and a greater awareness of Kentucky history. Hard Times and New Deal weaves together private memories of older Kentuckians and public statements of contemporary politicians; it includes legislative debates and newspaper accounts, government statistics and personal reminiscences. The result is a balanced and fresh look at the patchwork of emergency and reform activities which many people loved, many others hated, but no one could ignore.

Desistance from Crime Michael Rocque,2017-04-25 This book represents a brief treatise on the theory and research behind the concept of desistance from crime. This ever-growing field has become increasingly relevant as questions of serious issues regarding sentencing, probation and the penal system continue to go unanswered. Rocque covers the history of research on desistance from crime and provides a discussion of research and theories on the topic before looking towards the future of the application of desistance to policy. The focus of the volume is to provide an overview of the practical and theoretical developments to better understand desistance. In addition, a multidisciplinary, integrative theoretical perspective is presented, ensuring that it will be of particular interest for students

and scholars of criminology and the criminal justice system.

Carcass management guidelines Miller, L.P., Miknis, R.A. and Flory, G.A..,2020-12-28 Animal disease outbreaks pose many challenges for response authorities that can impact livelihoods, food security, and the environment. Proper disposal of animal carcasses that die or are culled during the outbreak is a key component of a successful response to a disease outbreak because it helps prevent or mitigate the further spread of pathogens and in case of zoonotic disease, to further protect human health. The practical guidelines presented hereby provide carcass and related waste management considerations and recommended procedures for use by Veterinary Services and other official response authorities when developing animal disease outbreak containment and eradication plans. The guidelines apply to animal disease outbreaks of varying sizes, whether the outbreak is isolated to a single premise or spans a region to cover numerous premises. However, they are focused on small to medium-sized holdings in countries without access to engineered landfills, rendering plants or controlled incinerators. The guidelines are written in the spirit of "keep it simple and doable",

considering the limited human and financial resources that many countries are constrained with. Its presentation and practical approach ensure that countries will find it very useful for their emergency operation procedures toolbox. Further, the guidelines directly contribute to the one-health approach by protecting the health of animals, humans, and the environment.

Algorithms for Image Processing and Computer Vision J. R. Parker,2010-11-29 A cookbook of algorithms for common image processing applications Thanks to advances in computer hardware and

software, algorithms have been developed that support sophisticated image processing without requiring an extensive background in mathematics. This bestselling book has been fully updated with the newest of these, including 2D vision methods in content-based searches and the use of graphics cards as image processing computational aids. It's an ideal reference for software engineers and developers, advanced programmers, graphics programmers, scientists, and other specialists who require highly specialized image processing. Algorithms now exist for a wide variety of sophisticated image processing applications required by software engineers and developers, advanced programmers, graphics programmers, scientists, and related specialists This bestselling book has been completely updated to include the latest algorithms, including 2D vision methods in content-based searches, details on modern classifier methods, and graphics cards used as image processing computational aids Saves hours of mathematical calculating by using distributed processing and GPU programming, and gives non-mathematicians the shortcuts needed to program relatively sophisticated applications. Algorithms for Image Processing and Computer Vision, 2nd Edition provides the tools to

speed development of image processing applications.

Fingerprints and Other Ridge Skin Impressions Christophe Champod,Chris J. Lennard,Pierre Margot,Milutin Stoilovic,2017-12-19 Since its publication, the first edition of Fingerprints and Other Ridge Skin Impressions has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the

next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.
