The House of Morgan Ron Chernow,2010-03-16 The National Book Award-winning history of American finance by the renowned biographer and author of *Hamilton: "A tour de force"* (New York Times Book Review). The House of Morgan is a panoramic story of four generations in the powerful Morgan family and their secretive firms that would transform the modern financial world. Tracing the trajectory of J. P. Morgan's empire from its obscure beginnings in Victorian London to the financial crisis of 1987, acclaimed author Ron Chernow paints a fascinating portrait of the family's private saga and the rarefied world of the American and British elite in which they moved—a world that included Charles Lindbergh, Henry Ford, Franklin Roosevelt, Nancy Astor, and Winston Churchill. A masterpiece of financial history—it was awarded the 1990 National Book Award for Nonfiction and selected by the Modern Library as one of the 100 Best Nonfiction Books of the Twentieth Century—The House of Morgan is a compelling account of a remarkable institution and the men who ran it. It is essential reading for anyone seeking to understand the money and power behind the major historical events of the last 150 years.

Nothing Happened Susan A. Crane,2021-01-19 The past is what happened. History is what we remember and write about that past, the narratives we craft to make sense out of our memories and their sources. But what does it mean to look at the past and to remember that nothing happened? Why might we feel as if nothing is the way it was? This book transforms these utterly ordinary observations and redefines Nothing as something we have known and can remember. Nothing has been a catch-all term for everything that is supposedly uninteresting or is just not there. It will take some—possibly considerable—mental adjustment before we can see Nothing as Susan A. Crane does here, with a capital n. But Nothing has actually been happening all along. As Crane shows in her witty and provocative discussion, Nothing is nothing less than fascinating. When Nothing has changed but we think that it should have, we might call that injustice; when Nothing has happened over a long, slow period of time, we might call that boring. Justice and boredom have histories. So too does being relieved or disappointed when Nothing happens—for instance, when a forecasted end of the world does not occur, and millennial movements have to regroup. By paying attention to how we understand Nothing to be happening in the present, what it means to know Nothing or to do Nothing, we can begin to ask how those experiences will be remembered. Susan A. Crane moves effortlessly between different modes of seeing Nothing, drawing on visual analysis and cultural studies to suggest a new way of thinking about history. By remembering how Nothing happened, or how Nothing is the way it was, or how Nothing has changed, we can recover histories that were there all along.

With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

The Future of the German-Jewish Past Gideon Reuveni, Diana Franklin, 2020-12-15 Germany's acceptance of its direct responsibility for the Holocaust has strengthened its relationship with Israel and has led to a deep commitment to combat antisemitism and rebuild Jewish life in Germany. As we draw close to a time when there will be no more firsthand experience of the horrors of the Holocaust, there is great concern about what will happen when German responsibility turns into history. Will the present taboo against open antisemitism be lifted as collective memory fades? There are alarming signs of the rise of the far right, which includes blatantly antisemitic elements, already visible in public discourse. The evidence is unmistakable—overt antisemitism is dramatically increasing once more. *The Future of the German-Jewish Past* deals with the formidable challenges created by these developments. It is conceptualized to offer a variety of perspectives and views on the question of the future of the German-Jewish past. The volume addresses topics such as antisemitism, Holocaust memory, historiography, and political issues relating to the future relationship between Jews, Israel, and Germany. While the central focus of this volume is Germany, the implications go beyond the German-Jewish experience and relate to some of the broader challenges facing modern societies today.

My Four Years in Germany James Watson Gerard, 1917 1917. The author was the late Ambassador to the German Imperial Court. Illustrated. From the Foreword: I am writing what should have been the last chapter of this book as a foreword because I want to bring home to our people the gravity of the situation; because I want to tell them that the military and naval power of the German Empire is unbroken; that of the twelve million men whom the Kaiser has called to the colors but one million, five hundred thousand have been killed, five hundred thousand permanently disabled, not more than five hundred thousand are prisoners of war, and about five hundred thousand

constitute the number of wounded or those on the sick list of each day, leaving at all times about nine million effectives under arms. I state these figures because Americans do not grasp either the magnitude or the importance of this war. Perhaps the statement that over five million prisoners of war are held in the various countries will bring home to Americans the enormous mass of men engaged. Contents: My First Year in Germany; Political and Geographical; Diplomatic Work of First Winter in Berlin; Militarism in Germany and the Zabern Affair; Psychology and Causes Which Prepared the Nation for War; At Kiel Just Before the War; The System; The Days Before the War; The Americans at the Outbreak of Hostilities; Prisoners of War; First Days of the War: Political and Diplomatic; Diplomatic Negotiations; Mainly Commercial; Work for the Germans; War Charities; Hate; Diplomatic Negotiations; Liberals and Reasonable Men; The German People in War; and Last. No Medium Craig Dworkin,2013-02-15 Close readings of ostensibly “blank” works—from unprinted pages to silent music—that point to a new understanding of media. In *No Medium*, Craig Dworkin looks at works that are blank, erased, clear, or silent, writing critically and substantively about works for which there would seem to be not only nothing to see but nothing to say. Examined closely, these ostensibly contentless works of art, literature, and music point to a new understanding of media and the limits of the artistic object. Dworkin considers works predicated on blank sheets of paper, from a fictional collection of poems in Jean Cocteau's *Orphée* to the actual publication of a ream of typing paper as a book of poetry; he compares Robert Rauschenberg's *Erased De Kooning Drawing* to the artist Nick Thurston's erased copy of Maurice Blanchot's *The Space of Literature* (in which only Thurston's marginalia were visible); and he scrutinizes the sexual politics of photographic representation and the implications of obscured or obliterated subjects of photographs. Reexamining the famous case of John Cage's *4'33"*, Dworkin links Cage's composition to Rauschenberg's *White Paintings*, Ken Friedman's *Zen for Record* (and Nam June Paik's *Zen for Film*), and other works, offering also a “guide to further listening” that surveys more than 100 scores and recordings of “silent” music. Dworkin argues that we should understand media not as blank, base things but as social events, and that there is no medium, understood in isolation, but only and always a plurality of media: interpretive activities taking place in socially inscribed space.
