Data Science for Economics and Finance Sergio Consoli, Diego Reforgiato Recupero, Michaela Saisana, 2021 This open access book covers the use of data science, including advanced machine learning, big data analytics, Semantic Web technologies, natural language processing, social media analysis, time series analysis, among others, for applications in economics and finance. In addition, it shows some successful applications of advanced data science solutions used to extract new knowledge from data in order to improve economic forecasting models. The book starts with an introduction on the use of data science technologies in economics and finance and is followed by thirteen chapters showing success stories of the application of specific data science methodologies, touching on particular topics related to novel big data sources and technologies for economic analysis (e.g. social media and news); big data models leveraging on supervised/unsupervised (deep) machine learning; natural language processing to build economic and financial indicators; and forecasting and nowcasting of economic variables through time series analysis. This book is relevant to all stakeholders involved in digital and data-intensive research in economics and finance, helping them to understand the main opportunities and challenges, become familiar with the latest methodological findings, and learn how to use and evaluate the performances of novel tools and frameworks. It primarily targets data scientists and business analysts exploiting data science technologies, and it will also be a useful resource to research students in disciplines and courses related to these topics. Overall, readers will learn modern and effective data science solutions to create tangible innovations for economic and financial applications.

Forced to Care Evelyn Nakano Glenn, 2012-03-05 The United States faces a growing crisis in care. The number of people needing care is growing while the ranks of traditional caregivers have shrunk. The status of care workers is a critical concern. Evelyn Nakano Glenn offers an innovative interpretation of care labor in the United States by tracing the roots of inequity along two interconnected strands: unpaid caring within the family; and slavery, indenture, and other forms of coerced labor. By bringing both into the same analytic framework, she provides a convincing explanation of the devaluation of care work and the exclusion of both unpaid and paid care workers from critical rights such as minimum wage, retirement benefits, and workers' compensation. Glenn reveals how assumptions about gender, family, home, civilization, and citizenship have shaped the development of care labor and been incorporated into law and social policies. She exposes the underlying systems of control that have resulted in women—especially immigrants and women of color—performing a disproportionate share of caring labor. Finally, she examines strategies for improving the situation of unpaid family caregivers and paid home healthcare workers. This important and timely book illuminates the source of contradictions between American beliefs about the value and importance of caring in a good society and the exploitation and devalued status of those who actually do the caring.

Atmospheric Science at NASA Erik M. Conway, 2008-12-08 Atmospheric Science at NASA critically examines this politically controversial science, dissecting the often convoluted roles, motives, and relationships of the various institutional actors involved—among them NASA, congressional appropriation committees, government weather and climate bureaus, and the military.

Munitions of the mind Philip M. Taylor, 2013-07-19 New edition of a classic work on the history of propaganda. Topical new chapters on the 1991 Gulf War, September 11 and terrorism. An ideal textbook for all international courses covering media and communication studies. Considers the history of propaganda and how it has become increasingly pervasive due to access to ever-complex and versatile media. Written in an accessible style and format, this book has proven its appeal to the general reader as the public becomes more and more cynical of the manipulations of the political sphere.

Children and Violence E. Helander, 2008-09-02 This book provides a disturbing account of the reality of child abuse. Based on data from 152 countries, Einar Helander considers the physical, societal, economic and judicial consequences of child abuse, proposing a universal, community-based prevention programme.

When Scotland Was Jewish Elizabeth Caldwell Hirschman, Donald N. Yates, 2015-05-07 The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

Managing Disruptions in Business Rajagopal, Ramesh Behl, 2022-01-11 This volume discusses business disruptions as strategic to gain market competitiveness. It analyzes the convergence of innovation and technology, business practices, public policies, political ideologies, and consumer values to strengthen competitive business practices through disruptions. Bringing together contributions from global experts, the chapters add to knowledge on contemporary business models, business strategies, radical interventions in manufacturing, services, and marketing organizations. Disruptive innovations led by contemporary trends, tend to transform the market and consumers' landscape. These trends include shifts from closed to open models of innovation, servitization, and moving from conventional manufacturing and marketing paradigms to industry 4.0 business philosophy. Focused on the triadic themes of disruption, innovation, and management in emerging markets, this book serves as a valuable compendium for research in entrepreneurship development, regional business and development, contemporary political ideologies, and changing social values.

Biomedical Natural Language Processing Kevin Bretonnel Cohen, Dina Demner-Fushman, 2014-02-15 Biomedical Natural Language Processing is a comprehensive tour through the classic and current work in the field. It discusses all subjects from both a rule-based and a machine learning approach, and also describes each subject from the perspective of both biological science and clinical medicine. The intended audience is readers who already have a background in natural language processing, but a clear introduction makes it accessible to readers from the fields of

bioinformatics and computational biology, as well. The book is suitable as a reference, as well as a text for advanced courses in biomedical natural language processing and text mining.

The Media in the Network Society Gustavo Cardoso,2006 In the Network Society the development of a new communicational model has been taking shape. A communicational model characterized by the fusion of interpersonal communication and mass communication, connecting audiences and broadcasters under a hypertextual matrix linking several media devices. The Networked Communication model is the informational societies communication model. A model that must be understood also in its needed literacies for building our media diets, media matrixes and on how it's changing the way autonomy is managed and citizenship exercised in the Information Age. In this book Gustavo Cardoso develops an analysis that, focusing on the last decade, takes us from Europe to North America and from South America to Asia, combining under the framework of the Network Society a broad range of scientific perspectives from Media Studies to Political Science and Social Movements theory to Sociology of Communication.

This book will provide thorough, technical examples of using all primary Power BI tools and features as well as demonstrate high impact end-to-end solutions that leverage and integrate these technologies and services. Get familiar with Power BI development tools and services, go deep into the data connectivity and transformation, modeling, visualization and analytical capabilities of Power BI, and see Power BI's functional programming languages of DAX and M come alive to deliver powerful solutions to address common, challenging scenarios in business intelligence. This book will excite and empower you to get more out of Power BI via detailed recipes, advanced design and development tips, and guidance on enhancing existing Power BI projects. Style and approach This book consists of practical recipes on Power BI that target novices as well as intermediate Power BI users. It goes deep into the technical issues, covers additional protocols, and many more real-live examples.

Multisystemic Resilience Michael Ungar,2021 Across diverse disciplines, the term resilience is appearing more and more often. However, while each discipline has developed theory and models to explain the resilience of the systems they study (e.g., a natural environment, a community post-disaster, the human mind, a computer network, or the economy), there is a lack of over-arching theory that describes: 1) whether the principles that underpin the resilience of one system are similar or different from the principles that govern resilience of other systems; 2) whether the resilience of one system affects the resilience of other co-occurring systems; and 3) whether a better understanding of resilience can inform the design of interventions, programs and policies that address wicked problems that are too complex to solve by changing one system at a time? In other words (and as only one example among many) are there similarities between how a person builds and sustains psychological resilience and how a forest, community or the business where he or she works remains successful and sustainable during periods of extreme adversity? Does psychological resilience in a human being influence the resilience of the forests (through a change in attitude towards conservation), community (through a healthy tolerance for differences) and businesses (by helping a workforce perform better) with which a person interacts? And finally, does this understanding of resilience help build better social and physical ecologies that support individual mental health, a sustainable environment and a successful economy at the same time?--

Sustainable Forest Management Hubert Hasenauer,2006-03-30 There is a strong movement towards uneven-aged forest management based on the idea that such stands increase or at least maintain soil fertility, increase biodiversity, and improve stand resilience. This shift in forest management practice renders existing yield tables increasingly unreliable. Among potential alternatives are tree growth models, because they predict the growth of each tree within a forest stand. This book summarizes three years of work related to the topic, carried out as a joint effort of leading tree growth modellers across Europe together with forest companies. By means of nine specific examples it demonstrates the problem-solving potential of tree growth modeling theory as required by various end-user groups.

Excel Tables Zack Barresse,Kevin Jones,2014-08-01 Creating tables in Excel allows for easier formatting and reporting, but the new syntax that it implies can be intimidating to the uninitiated. In this guide, one of the developers of the official Microsoft Excel 2013 templates—all of which employ tables—helps introduce readers to the multiple benefits of tables. The book begins by explaining what tables are, how to create them, and how they can be used in reporting before moving on to slightly more advanced topics, including slicers and filtering, working with VBA macros, and using tables in the Excel web app. Novice Excel users and experts alike will find relevant, useful, and authoritative information in this one-of-a-kind resource.

Unsupervised Process Monitoring and Fault Diagnosis with Machine Learning Methods Chris Aldrich,Lidia Auret,2013-06-15 This unique text/reference describes in detail the latest advances in unsupervised process monitoring and fault diagnosis with machine learning methods. Abundant case studies throughout the text demonstrate the efficacy of each method in real-world settings. The broad coverage examines such cutting-edge topics as the use of information theory to enhance unsupervised learning in tree-based methods, the extension of kernel methods to multiple kernel learning for feature extraction from data, and the incremental training of multilayer perceptrons to construct deep architectures for enhanced data projections. Topics and features: discusses machine learning frameworks based on artificial neural networks, statistical learning theory and kernel-based methods, and tree-based methods; examines the application of machine learning to steady state and dynamic operations, with a focus on unsupervised learning; describes the use of spectral methods in process fault diagnosis.
