Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Reducing Environmental Cancer Risk Suzanne H. Reuben, 2010-10 Though overall cancer incidence and mortality have continued to decline in recent years, cancer continues to devastate the lives of far too many Americans. In 2009 alone, 1.5 million American men, women, and children were diagnosed with cancer, and 562,000 died from the disease. There is a growing body of evidence linking environmental exposures to cancer. The Pres. Cancer Panel dedicated its 2008-2009 activities to examining the impact of environmental factors on cancer risk. The Panel considered industrial, occupational, and agricultural exposures as well as exposures related to medical practice, military

activities, modern lifestyles, and natural sources. This report presents the Panel's recommend. to mitigate or eliminate these barriers. Illus.

The Quincunx Charles Palliser, 1990-11-27 An extraordinary modern novel in the Victorian tradition, Charles Palliser has created something extraordinary—a plot within a plot within a plot of family secrets, mysterious clues, low-born birth, high-reaching immorality, and, always, always the fog-enshrouded, enigmatic character of 19th century—London itself. “So compulsively absorbing that reality disappears . . . One is swept along by those enduring emotions that defy modern art and a random universe: hunger for revenge, longing for justice and the fantasy secretly entertained by most people that the bad will be punished and the good rewarded.”—The New York Times “A virtuoso achievement . . . It is an epic, a tour de force, a staggeringly complex and tantalizingly layered tale that will keep

readers engrossed in days. . . . The Quincunx will not disappoint you. It is, quite simply, superb.”—Chicago Sun-Times “A bold and vivid tale that invites the reader to get lost in the intoxicating rhythms of another world. And the invitation is irresistible.”—San Francisco Chronicle “A remarkable book . . . In mood, color, atmosphere and characters, this is Charles Dickens reincarnated . . . It is an immersing experience.”—Los Angeles Times Book Review “To read the first pages is to be trapped for seven-hundred odd more: you cannot stop turning them.”—The New Yorker “Few books, at most a dozen or two in a lifetime, affect us this way. . . . For sheer intricacy and ingenuity, for skill and clarity of storytelling, it is the kind of book readers wait for, a book to get lost in.”—The Philadelphia Inquirer

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on

system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
