Don't Fear the Spreadsheet Tyler Nash, Bill Jelen, Kevin Jones, Tom Urtis, 2012-07-01 Written in a question-and-answer format, this lowest-level beginner book covers the extreme basics of using spreadsheets in Excel. Instead of delving into advanced topics that scare most Excel novices away, the guide starts at a much more basic level, quickly providing a passable knowledge of the

program and allowing users to overcome their fears and frustrations. It answers hundreds of common questions, including Can I delete data from a spreadsheet without changing the formatting? How can I merge two cells, columns, or rows? How do I use text-wrapping? How do I create custom functions? and What is a Macro and how do I go about creating it? Intended for the roughly 40 percent Excel users who have never even entered a formula, this book will demystify the problems and confusion that prevent them from using the program to its potential.

humanities with media studies and graphic design history, Graphesis offers a critical language for analysis of graphical knowledge and argues for studying visuality from a humanistic perspective, exploring how graphic languages can serve fields where qualitative judgments take priority over quantitative statements of fact.

Genealogy of the Anglo-Norman Lynches Paul McNulty, 2013 The pedigrees of the Anglo-Norman Lynches who settled in Galway are mostly derived from the descendants of James and William, the sons of Thomas Lynch, the first Provost of Galway in 1274. The progression of the family in Ireland was emphasised by the appointment of more than eighty mayors of Galway named Lynch between 1485 and 1654. When James I bestowed a baronetcy on Henry Lynch, a rich merchant, in 1622 their elevated status was confirmed. However, political controversy intervened when Henry Lynch, 3rd Bt, was attainted of high treason following the defeat of James II at the Battle of the Boyne. Personal controversy followed with the liaison of Henry Lynch-Blosse, 7th Bt with the alluring Sibella Cottle which scandalized the community. The story has been outlined by the author in his historical novel, *Spellbound by Sibella*. The Lynch-Blosses continued to serve in Ireland until the purchase of their estate of 18,566 acres by the Congested District's Board in 1909 for 154,000. Thereafter, the family settled in Wales and later in England. The current incumbent is Richard Hely Lynch-Blosse, 17th Bt, a general practitioner in Oxfordshire. The Anglo-Norman Lynches who settled in Galway have been connected to famous people and events including the Bodkin massacre, Che Guevara, James II, Richard 'Humanity Dick' Martin MP, Grace O'Malley, Patrick Sarsfield and Bram Stoker. These connections are illustrated in pedigree charts derived from a BrothersKeeper.com database of 2843 individuals. The database also includes members of

the extended family of the author.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Signal Processing for Cognitive Radios Sudharman K. Jayaweera, 2014-11-19 This book examines signal processing techniques for cognitive radios. The book is divided into three parts: Part I, is an introduction to cognitive radios and presents a history of the cognitive radio (CR), and introduce their architecture, functionalities, ideal aspects, hardware platforms, and state-of-the-art developments. Dr. Jayaweera also introduces the specific type of CR that has gained the most

research attention in recent years: the CR for Dynamic Spectrum Access (DSA). Part II of the book, *Theoretical Foundations*, guides the reader from classical to modern theories on statistical signal processing and inference. The author addresses detection and estimation theory, power spectrum estimation, classification, adaptive algorithms (machine learning), and inference and decision processes. Applications to the signal processing, inference and learning problems encountered in cognitive radios are interspersed throughout with concrete and accessible examples. Part III of the book, *Signal Processing in Radios*, identifies the key signal processing, inference, and learning tasks to be performed by wideband autonomous cognitive radios. The author provides signal processing solutions to each task by relating the tasks to materials covered in Part II. Specialized chapters then discuss specific signal processing algorithms required for DSA and DSS cognitive radios.

Adultery and Divorce in Calvin's Geneva Robert McCune Kingdon, 1994 In Calvin's Geneva, the changes associated with the Reformation were particularly abrupt and far-reaching, in large part owing to John Calvin himself. *Adultery and Divorce in Calvin's Geneva* makes two major contributions to our understanding of this time. The first is to the history of divorce. The second is in illustrating the operations of the Consistory of Geneva--an institution designed to control in all its variety the behavior of the entire population--which was established at Calvin's insistence in 1541. This mandate came

shortly after the city officially adopted Protestantism in 1536, a time when divorce became legally possible for the first time in centuries. Robert Kingdon illustrates the changes that accompanied the earliest Calvinist divorces by examining in depth a few of the most dramatic cases and showing how divorce affected real individuals. He considers first, and in the most detail, divorce for adultery, the best-known grounds for divorce and the best documented. He also covers the only other generally accepted grounds for these early divorces--desertion. The second contribution of the book, to show the work of the Consistory of Geneva, is a first step toward a fuller study of the institution. Kingdon has supervised the first accurate and complete transcription of the twenty-one volumes of registers of the Consistory and has made the first extended use of these materials, as well as other documents that have never before been so fully utilized.
