Pre-Incident Indicators of Terrorist Incidents Brent L. Smith, 2011 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Fairness and Effectiveness in Policing National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee to Review Research on Police Policy and Practices, 2004-04-06 Because police are the most visible face of government power for most citizens, they are expected to deal effectively with crime and disorder and to be impartial. Producing justice through the fair, and restrained use of their authority. The standards by which the public judges police success have become more exacting and challenging. Fairness and Effectiveness in Policing explores police work in the new century. It replaces myths with research findings and provides recommendations for updated policy and practices to guide it. The book provides answers to the most basic questions: What do police do? It reviews how police work is organized, explores the expanding responsibilities of police, examines the increasing diversity among police employees, and discusses the complex interactions between officers and citizens. It also addresses such topics as community policing, use of force, racial profiling, and evaluates the success of common police techniques, such as focusing on crime hot spots. It goes on to look at the issue of legitimacy—how the public gets information about police work, and how police are viewed by different groups, and how police can gain community trust. Fairness and Effectiveness in Policing will be important to anyone concerned about police work: policy makers, administrators, educators, police supervisors and officers, journalists, and interested citizens.

Diversity, Inc. Pamela Newkirk, 2019-10-22 One of Time Magazine's Must-Read Books of 2019 An award-winning journalist shows how workplace diversity initiatives have turned into a profoundly misguided industry--and have done little to bring equality to America's major industries and institutions. Diversity has become the new buzzword, championed by elite institutions from academia to Hollywood to corporate America. In an effort to ensure their organizations represent the racial and ethnic makeup of the country, industry and foundation leaders have pledged hundreds of millions of dollars to commission studies, launch training sessions, and hire consultants and diversity czars. But is it working? In *Diversity, Inc.*, award-winning journalist Pamela Newkirk shines a bright light on the diversity industry, asking the tough questions about what has been effective--and why progress has been so slow. Newkirk highlights the rare success stories, sharing valuable lessons about how other industries can match those gains. But as she argues, despite decades of handwringing, costly initiatives, and uncomfortable conversations, organizations have, apart from a few exceptions, fallen far short of their goals. *Diversity, Inc.* incisively shows the vast gap between the rhetoric of inclusivity and real achievements. If we are to deliver on the promise of true equality, we need to abandon ineffective, costly measures and commit ourselves to combatting enduring racial attitudes

Blood and Earth Kevin Bales, 2016-01-19 For readers of such crusading works of nonfiction as Katherine Boo's *Beyond the Beautiful Forevers* and Tracy Kidder's *Mountains Beyond Mountains* comes a powerful and captivating examination of two entwined global crises: environmental destruction and human trafficking—and an inspiring, bold plan for how we can solve them. A leading expert on modern-day slavery, Kevin Bales has traveled to some of the world's most dangerous places documenting and battling human trafficking. In the course of his reporting, Bales began to notice a pattern emerging: Where slavery existed, so did massive, unchecked environmental destruction. But why? Bales set off to find the answer in a fascinating and moving journey that took him into the lives of modern-day slaves and along a supply chain that leads directly to the cellphones in our pockets. What he discovered is that even as it destroys individuals, families, and communities, new forms of slavery that proliferate in the world's lawless zones also pose a grave threat to the environment. Simply put, modern-day slavery is destroying the planet. The product of seven years of travel and research, *Blood and Earth* brings us dramatic stories from the world's most beautiful and tragic places, the environmental and human-rights hotspots where this crisis is concentrated. But it also tells the stories of some of the most common products we all consume—from computers to shrimp to jewelry—whose origins are found in these same places. *Blood and Earth* calls on us to recognize the grievous harm we have done to one another, put an end to it, and recommit to repairing the world. This is a clear-eyed and inspiring book that suggests how we can begin the work of healing humanity and the planet we share. Praise for *Blood and Earth* “A heart-wrenching narrative . . . Weaving together interviews, history, and statistics, the author shines a light on how the poverty, chaos, wars, and government corruption create the perfect storm where slavery flourishes and environmental destruction follows. . . . A clear-eyed account of man's inhumanity to man and Earth. Read it to get informed, and then take action.”—Kirkus Reviews (starred review) “[An] exposé of the global economy's ‘deadly dance’ between slavery and environmental disaster . . . Based on extensive travels through eastern Congo's mineral mines, Bangladeshi fisheries, Ghanaian gold mines, and Brazilian forests, Bales reveals the appalling truth in graphic detail. . . . Readers will be deeply disturbed to learn how the links connecting slavery, environmental issues, and modern convenience are forged.”—Publishers Weekly “This well-researched and vivid book studies the connection between slavery and environmental destruction, and what it will take to end both.”—Shelf Awareness (starred review) “This is a remarkable book, demonstrating once more the deep links between the ongoing

degradation of the planet and the ongoing degradation of its most vulnerable people. It's a bracing reminder that a mentality that allows throwaway people also allows a throwaway earth."—Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet*

Assembled and written by experts from the Centers for Disease Control and Prevention as well as other leading public health agencies, it offers current and field-tested guidance for every stage of an outbreak investigation -- from identification to intervention and other core considerations along the way. Additional coverage includes: · Updated guidance for new tools in field investigations, including the latest technologies for data collection and incorporating data from geographic information systems (GIS) · Tips for investigations in unique settings, including healthcare and community-congregate sites · Advice for responding to different types of outbreaks, including acute enteric disease; suspected biologic or toxic agents; and outbreaks of violence, suicide, and other forms of injury For the ever-changing public health landscape, The CDC Field Epidemiology Manual offers a new, authoritative resource for effective outbreak response to acute and emerging threats. *** Oxford University Press will donate a portion of the proceeds from this book to the CDC Foundation, an independent nonprofit and the sole entity created by Congress to mobilize philanthropic and private-sector resources to support the Centers for Disease Control and Prevention's critical health protection work. Understanding Knowledge as a Commons Charlotte Hess, Elinor Ostrom, 2011-01-21 Looking at knowledge as a shared resource: experts discuss how to define, protect, and build the knowledge commons in the digital age. Knowledge in digital form offers unprecedented access to information through the Internet but at the same time is subject to ever-greater restrictions through intellectual property legislation, overpatenting, licensing, overpricing, and lack of preservation. Looking at knowledge as a commons—as a shared resource—allows us to understand both its limitless possibilities and what threatens it. In *Understanding Knowledge as a Commons*, experts from a range of disciplines discuss the knowledge commons in the digital era—how to conceptualize it, protect it, and build it. Contributors consider the concept of the commons historically and offer an analytical framework for understanding knowledge as a shared social-ecological system. They look at ways to guard against enclosure of the knowledge commons, considering, among other topics, the role of research libraries, the advantages of making scholarly material available outside the academy, and the problem of disappearing Web pages. They discuss the role of intellectual property in a new

knowledge commons, the open access movement (including possible funding models for scholarly publications), the development of associational commons, the application of a free/open source framework to scientific knowledge, and the effect on scholarly communication of collaborative communities within academia, and offer a case study of EconPort, an open access, open source digital library for students and researchers in microeconomics. The essays clarify critical issues that arise within these new types of commons—and offer guideposts for future theory and practice. Contributors David Bollier, James Boyle, James C. Cox, Shubha Ghosh, Charlotte Hess, Nancy Kranich, Peter Levine, Wendy Pradt Lougee, Elinor Ostrom, Charles Schweik, Peter Suber, J. Todd Swarthout, Donald Waters
