Hacking the Planet with Notcurses Nick Black,2020-03-31 Nick Black, prolific Free Software developer and designer of Notcurses, introduces character graphics and Text User Interface design. The examples use the modern Notcurses library, but many of the lessons are applicable to TUI programming using NCURSES or Newt. Topics include the history of and current practice of terminals, Unicode (through 2020's Unicode 13.0), handling input from keyboards and mice, effective use of RGB DirectColor, palette-indexed pseudocolor, and alpha blending, loading images and video, construction of reusable TUI widgets, and more. These concepts are developed using rich examples. Nick graduated with a handful of degrees from the Georgia Institute of Technology, and has hacked away in the code mines of NVIDIA, Google, and several successful startups. He is a Senior Member of the ACM, and a consulting scientist at Dirty South Supercomputing and Waffles.

Data Center Fundamentals Mauricio Arregoces,Maurizio Portolani,2003-12-04 Master the basics of data centers to build server farms that enhance your Web site performance Learn design guidelines

that show how to deploy server farms in highly available and scalable environments Plan site

performance capacity with discussions of server farm architectures and their real-life applications to

determine your system needs Today's market demands that businesses have an Internet presence

through which they can perform e-commerce and customer support, and establish a presence that can

attract and increase their customer base. Underestimated hit ratios, compromised credit card records,

perceived slow Web site access, or the infamous Object Not Found alerts make the difference

between a successful online presence and one that is bound to fail. These challenges can be solved

in part with the use of data center technology. Data centers switch traffic based on information at the

Network, Transport, or Application layers. Content switches perform the best server selection process

to direct users' requests for a specific service to a server in a server farm. The best server selection

process takes into account both server load and availability, and the existence and consistency of the

requested content. Data Center Fundamentals helps you understand the basic concepts behind the

design and scaling of server farms using data center and content switching technologies. It addresses

the principles and concepts needed to take on the most common challenges encountered during planning, implementing, and managing Internet and intranet IP-based server farms. An in-depth analysis of the data center technology with real-life scenarios make Data Center Fundamentals an ideal reference for understanding, planning, and designing Web hosting and e-commerce environments.

Data Studio and DB2 for z/OS Stored Procedures Paolo Bruni,Marichu Scanlon,IBM Redbooks,2011-03-15 Stored procedures can provide major benefits in the areas of application performance, code re-use, security, and integrity. DB2® has offered ever-improving support for developing and operating stored procedures. This IBM® RedpaperTM publication is devoted to tools that can be used for accelerating the development and debugging process, in particular to the stored procedure support provided by the latest and fastest evolving IBM product: Data Studio. We discuss topics related to handling stored procedures across different platforms. We concentrate on how to use tools for deployment of stored procedures on z/OS®, but most considerations apply to the other

members of the DB2 family. This paper is a major update of Part 6, Cool tools for an easier life, of the IBM Redbooks® publication DB2 9 for z/OS Stored Procedures: Through the CALL and Beyond, SG24-7604.

Policing Democracy Mark Ungar,2020-03-03 2011 Winner of the Charles H. Levine Memorial Book Prize of the International Political Science Association Latin America's crime rates are astonishing by

any standard—the region's homicide rate is the world's highest. This crisis continually traps governments between the need for comprehensive reform and the public demand for immediate action, usually meaning iron-fisted police tactics harking back to the repressive pre-1980s dictatorships. In Policing Democracy, Mark Ungar situates Latin America at a crossroads between its longstanding form of reactive policing and a problem-oriented approach based on prevention and citizen participation. Drawing on extensive case studies from Argentina, Bolivia, and Honduras, he reviews the full spectrum of areas needing reform: criminal law, policing, investigation, trial practices, and incarceration. Finally, Policing Democracy probes democratic politics, power relations, and regional disparities of security and reform to establish a framework for understanding the crisis and moving beyond it.

Your Money, Your Goals Consumer Financial Consumer Financial Protection Bureau,2015-03-18 Welcome to the Consumer Financial Protection Bureau's Your Money, Your Goals: A financial empowerment toolkit for social services programs! If you're reading this, you are probably a case

manager, or you work with case managers. Finances affect nearly every aspect of life in the United States. But many people feel overwhelmed by their financial situations, and they don't know where to go for help. As a case manager, you're in a unique position to provide that help. Clients already know you and trust you, and in many cases, they're already sharing financial and other personal information with you. The financial stresses your clients face may interfere with their progress toward other goals, and providing financial empowerment information and tools is a natural extension of what you are already doing. What is financial empowerment and how is it different from financial education or financial literacy? Financial education is a strategy that provides people with financial knowledge, skills, and resources so they can get, manage, and use their money to achieve their goals. Financial education is about building an individual's knowledge, skills, and capacity to use resources and tools, including financial products and services. Financial education leads to financial literacy. Financial empowerment includes financial education and financial literacy, but it is focused both on building the ability of individuals to manage money and use financial services and on providing access to products

that work for them. Financially empowered individuals are informed and skilled; they know where to get help with their financial challenges. This sense of empowerment can build confidence that they can effectively use their financial knowledge, skills, and resources to reach their goals. We designed this toolkit to help you help your clients become financially empowered consumers. This financial empowerment toolkit is different from a financial education curriculum. With a curriculum, you are generally expected to work through most or all of the material in the order presented to achieve a specific set of objectives. This toolkit is a collection of important financial empowerment information and tools you can access as needed based on the client's goals. In other words, the aim is not to cover all of the information and tools in the toolkit - it is to identify and use the information and tools that are best suited to help your clients reach their goals.

Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment.

The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid $75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than $10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book

Forensis Lawrence Abu Hamdan,Nabil Ahmed,Maayan Amir,Hisham Ashkar,Emily Dische-Becker,Ryan Bishop,2014 The role of material forensics in articulating new notions of the public truth of political struggle, violent conflict, and climate change are the focus of Forensis, the HKW exhibition catalog based on the theories of Eyal Weizman. - The concept of forensis was developed as a research project by Goldsmiths College, Centre for Research Architecture by theorist Eyal Weizman. The project is the subject of a major exhibition at the Haus der Kulturen der Welt (HKW) and catalog cum theoretical reader presenting the findings and contributions of over 20 influential architects, artists, filmmakers, and academics. Forensis, (Latin for pertaining to the forum) argues for the role of material forensics as central to the interpretation of the ways in which states police and govern their subjects. Forensics engages struggles for justice across frontiers of contemporary conflict through the study of how technology mediates the testimony of material objects such as bones, ruins, toxic substances, etc.

In the hopes of unlocking forensics potential as a political practice, the project participants present innovative investigations aimed at producing new kinds of evidence for use by international prosecutorial teams, political organizations, NGOs, and the UN.

In Search of Gravestones Old and Curious William Thomas Vincent,1896 ...] Gravestone plagiarism of this sort is very common, and there is to be found at West Ham, Essex, the same symbolical flight of the angel and child repeated as many as five times. The pilfering is not so weak and lamentable when the copyist appropriates merely the idea and works it out in a new fashion. The term new can hardly be attributed to the notion of a plucked flower as a type of death, but it occurs in so many varieties as almost to redeem its conventionality. ...].
