Grammar, Meaning, and Concepts Susan Strauss, Parastou Feiz, Xuehua Xiang, 2018-05-11 Grammar, Meaning, and Concepts: A Discourse-Based Approach to English Grammar is a book for language teachers and learners that focuses on the meanings of grammatical constructions within discourse, rather than on language as structure governed by rigid rules. This text emphasizes the ways in which users of language construct meaning, express viewpoints, and depict imageries using the conceptual, meaning-filled categories that underlie all of grammar. Written by a team of authors with years of experience teaching grammar to future teachers of English, this book puts grammar in the context of real language and illustrates grammar in use through an abundance of authentic data examples. Each chapter also provides a variety of activities that focus on grammar, genre, discourse, and meaning, which can be used as they are or can be adapted for classroom practice. The activities are also designed to raise awareness about discourse, grammar, and meaning in all facets of everyday life, and can be used as springboards for upper high school, undergraduate, and graduate level research projects and inquiry-based grammatical analysis. Grammar, Meaning, and Concepts is an ideal textbook for those in the areas of teacher education, discourse analysis, applied linguistics, second language teaching, ESL, EFL, and communications who are looking to teach and learn grammar from a dynamic perspective.

Implementing Responsive Design Tim Kadlec, 2012-07-30 New devices and platforms emerge daily. Browsers iterate at a remarkable pace. Faced with this volatile landscape we can either struggle for control or we can embrace the inherent flexibility of the web. Responsive design is not just another technique—it is the beginning of the maturation of a medium and a fundamental shift in the way we think about the web. Implementing Responsive Design is a practical examination of how this fundamental shift affects the way we design and build our sites. Readers will learn how to: Build responsive sites using a combination of fluid layouts, media queries, and fluid media Adopt a responsive workflow from the very start of a project Enhance content for different devices Use feature-detection and server-side enhancement to provide a richer experience
