World Development Report 2020 World Bank, 2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. *World Development Report 2020: Trading for Development in the Age of Global Value Chains* examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

Fingerprints and Other Ridge Skin Impressions Christophe Champod, Chris J. Lennard, Pierre Margot, Milutin Stoilovic, 2017-12-19 Since its publication, the first edition of *Fingerprints and Other Ridge Skin Impressions* has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors,

courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

Biologics, Biosimilars, and Biobetters Iqbal Ramzan,2021-02-03 A comprehensive primer and reference, this book provides pharmacists and health practitioners the relevant science and policy concepts behind biologics, biosimilars, and biobetters from a practical and clinical

perspective. Explains what pharmacists need to discuss the equivalence, efficacy, safety, and risks of biosimilars with physicians, health practitioners, and patients about Guides regulators on pragmatic approaches to dealing with these drugs in the context of rapidly evolving scientific and clinical evidence Balances scientific information on complex drugs with practical information, such as a checklist for pharmacists

Financial Modeling Simon Benninga, Benjamin Czaczkes, 2000 Too often, finance courses stop short of making a connection between textbook finance and the problems of real-world business. Financial Modeling bridges this gap between theory and practice by providing a nuts-and-bolts guide to solving common financial problems with spreadsheets. The CD-ROM contains Excel* worksheets and solutions to end-of-chapter exercises. 634 illustrations.

Arbitration and the Constitution Peter B. Rutledge, 2013 Arbitration has become an increasingly important mechanism for dispute resolution, both in the domestic and international setting. Despite its importance as a form of state-sanctioned dispute resolution, it has largely remained outside the spotlight of constitutional law. This landmark work represents one of the first attempts to synthesize the fields of arbitration law and constitutional law. Drawing on the author's extensive experience as a scholar in arbitration law who has lectured and studied around the world, the book offers unique insights into how arbitration law implicates issues such as separation of powers, federalism, and individual liberties.

Evaluation of the Department of Veterans Affairs Mental Health Services National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care

Services, Committee to Evaluate the Department of Veterans Affairs Mental Health Services, 2018-03-29

Approximately 4 million U.S. service members took part in the wars in Afghanistan and Iraq. Shortly after troops started returning from their deployments, some active-duty service members and veterans began experiencing mental health problems. Given the stressors associated with war, it is not surprising that some service members developed such mental health conditions as posttraumatic stress disorder, depression, and substance use disorder. Subsequent epidemiologic studies conducted on military and veteran populations that served in the operations in Afghanistan and Iraq provided scientific evidence that those who fought were in fact being diagnosed with mental illnesses and experiencing mental health-related outcomes—in particular, suicide—at a higher rate than the general population. This report provides a comprehensive assessment of the quality, capacity, and access to mental health care services for veterans who served in the Armed Forces in Operation Enduring Freedom/Operation Iraqi Freedom/Operation New Dawn. It includes an analysis of not only the quality and capacity of mental health care services within the Department of Veterans Affairs, but also barriers faced by patients in utilizing those services.

The State of the World's Children 2019 United Nations, 2019-10-15 This report examines nutrition, providing a fresh perspective on a rapidly evolving challenge. Despite progress in the past two decades, around 200 million under-fives suffer from undernutrition. Adding to this toll is rising obesity, which affects 38 million children. All these forms of malnutrition threaten children's development, while obesity is creating a lifelong

legacy of disease. At the heart of this evolving challenge is a global shift towards modern diets that do not meet children's nutritional requirements. The report provides unique data and analysis of malnutrition in the 21st century and outlines recommendations to put children's needs at the heart of global and national food systems.

Environment of Care Risk Assessment Joint Commission Resources, Inc, 2008 In a health care environment, risks abound. This must-have book provides organizations with the tools and know-how to conduct effective assessments of potential risks and take steps to minimize them. Whether the risk issue is infant and pediatric abduction, infection control during construction, fire safety, or potential disaster emergencies, *Environment of Care Risk Assessment* guides organizations through a basic risk assessment process and suggests potential high-profile, high-risk areas for consideration. It shows how to use existing standards tools such as the Periodic Performance Review, Interim Life Safety Measures, the hazard vulnerability analysis, and more. And, it provides case studies, examples, and worksheets for assessing and minimizing risk and includes a CD-ROM with interactive risk assessment forms. Performing risk assessments can help organizations avoid OSHA fines, accreditation noncompliance, and more. But the bottom line is that by performing prudent and timely risk assessments, organizations can help ensure patient, staff, and visitor safety.

Aviation Systems Andreas Wittmer, Thomas Bieger, Roland Müller, 2011-08-17 This book aims to provide comprehensive coverage of the field of air transportation, giving attention to all major aspects, such as aviation regulation, economics, management and strategy. The book approaches aviation as an interrelated economic system and in so doing presents the "big picture" of aviation in

the market economy. It explains the linkages between domains such as politics, society, technology, economy, ecology, regulation and how these influence each other. Examples of airports and airlines, and case studies in each chapter support the application-oriented approach. Students and researchers in business administration with a focus on the aviation industry, as well as professionals in the industry looking to refresh or broaden their knowledge of the field will benefit from this book.

Caffeine for the Sustainment of Mental Task Performance Institute of Medicine, Food and Nutrition Board, Committee on Military Nutrition Research, 2002-01-07 This report from the Committee on Military Nutrition Research reviews the history of caffeine usage, the metabolism of caffeine, and its physiological effects. The effects of caffeine on physical performance, cognitive function and alertness, and alleviation of sleep deprivation impairments are discussed in light of recent scientific literature. The impact of caffeine consumption on various aspects of health, including cardiovascular disease, reproduction, bone mineral density, and fluid homeostasis are reviewed. The behavioral effects of caffeine are also discussed, including the effect of caffeine on reaction to stress, withdrawal effects, and detrimental effects of high intakes. The amounts of caffeine found to enhance vigilance and reaction time consistently are reviewed and recommendations are made with respect to amounts of caffeine appropriate for maintaining alertness of military personnel during field operations. Recommendations are also provided on the need for appropriate labeling of caffeine-containing supplements, and education of military personnel on the use of these supplements. A brief review of some alternatives to caffeine is also provided.

School-based food and nutrition education Food

and Agriculture Organization of the United Nations ,2020-12-10 School-based food and nutrition education (SFNE) helps schoolchildren and the school community to achieve lasting improvements in their food practices and outlooks; build the capacity to change and to adapt to external change; and pass on their learning to others. SFNE has also an important role in complementing efforts that are being made globally to improve food environments, and in empowering children and adolescents to become active participants in shaping the food system to be better able to deliver healthy and sustainable diets. Despite increasing interest for SFNE, the evidence that supports it and its potential, much of traditional SFNE, particularly in LMICs, is largely underfunded, not delivering results, and disconnected from other key interventions that aim to support the food, nutrition, environment, and education nexus. SFNE is under-resourced, with capacity development opportunities lacking throughout the school system. This White Paper is the first document of its kind, and it is based on the evidence, professional expertise, and field experience, lessons learned, and documented challenges of SFNE work in a variety of contexts. It presents the case for raising the profile and transforming the vision and learning model of SFNE. This document is directed firstly to a technical audience working in governmental organizations that deal with schoolchildren and adolescents and is also of interest to researchers, technical advisors, decision-makers, donors and investors, civil society, and UN organizations.

Patents in the Knowledge-Based Economy National Research Council, Policy and Global Affairs, Board

on Science, Technology, and Economic Policy, Committee on Intellectual Property Rights in the Knowledge-Based Economy, 2003-09-11 This volume assembles papers commissioned by the National Research Council's Board on Science, Technology, and Economic Policy (STEP) to inform judgments about the significant institutional and policy changes in the patent system made over the past two decades. The chapters fall into three areas. The first four chapters consider the determinants and effects of changes in patent quality. Quality refers to whether patents issued by the U.S. Patent and Trademark Office (USPTO) meet the statutory standards of patentability, including novelty, nonobviousness, and utility. The fifth and sixth chapters consider the growth in patent litigation, which may itself be a function of changes in the quality of contested patents. The final three chapters explore controversies associated with the extension of patents into new domains of technology, including biomedicine, software, and business methods.

Violence and Mental Disorders Bernardo

Carpiniello, Antonio Vita, Claudio Mencacci, 2019-11-30 This book explores the issue of violence in detail, taking into account the role of contextual factors, as well as the epidemiology, risk factors and clinical aspects of violence related to the main mental disorders. It also offers practical information on its management - from prevention to treatment. Covering all aspects of the problem of violence in mental disorders, the book is divided into four parts: general aspects; risk factors, phenomenology and characteristics of violence in mental disorders; contexts of violence; and prevention and management of violence in mental health. It also discusses violence in the various settings of mental health system, an aspect that has not previously been fully addressed. The

volume is intended for all those who are interested in mental health, including scholars, professionals, and students.

Biennial Report to Congress National Earthquake Hazards Reduction Program (U.S.), 1983

Development of Novel Vaccines Alexander von Gabain, Christoph Klade, 2012-04-23 "Development of novel vaccines" gives an overview of the tasks in basic research leading to the final product - the vaccine and its applications, belonging to the most complex biologics in the pharmaceutical field. Distinct from most textbooks in the vaccine arena, the current issue focuses on the translational aspect, namely, how research results can be transformed into life-saving medical interventions. Each chapter of the book deals with one important paradigm for the development of novel vaccines, along the value chain towards the final vaccine, and furthermore, with the inevitable tools required for this process. Contributions are prepared by teams of scientists, all of whom are experts in the field, most of them anchored in biomedical organizations devoted to translational culture, thereby lighting the certain topics from different views. This volume is a must read for researchers engaged in vaccine development and who really want to see their research results to become a product.
