Understanding Media Marshall McLuhan,2016-09-04 When first

published, Marshall McLuhan's *Understanding Media* made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

Marie H. Rider Haggard, 2015-10-19 Although in my old age I, Allan Quatermain, have taken to writing--after a fashion--never yet have I set down a single word of the tale of my first love and of the adventures that are grouped around her beautiful and tragic history. I suppose this is because it has always seemed to me too holy and far-off a matter--as holy and far-off as is that heaven which holds the splendid spirit of Marie Marais. But now, in my age, that which was far-off draws near again; and at night, in the depths between the stars, sometimes I seem to see the opening doors through which I must pass, and leaning earthwards across their threshold, with outstretched arms and dark and dewy eyes, a shadow long forgotten by all save me--the shadow of Marie Marais. An old man's dream, doubtless, no more. Still, I will try to set down that history which ended in so great a sacrifice, and one so worthy of record, though I hope that no human eye will read it until I also am forgotten, or, at any rate, have grown dim in the gathering mists of oblivion. And I am glad that I have waited to make this attempt, for it seems to me that only of late have I come to

understand and appreciate at its true value the character of her of whom I tell, and the passionate affection which was her bounteous offering to one so utterly unworthy as myself. What have I done, I wonder, that to me should have been decreed the love of two such women as Marie and that of Stella, also now long dead, to whom alone in the world I told all her tale? I remember I feared lest she should take it ill, but this was not so. Indeed, during our brief married days, she thought and talked much of Marie, and some of her last words to me were that she was going to seek her, and that they would wait for me together in the land of love, pure and immortal....

Writing and Literature Tanya Long Bennett, 2018-01-10 In the age of Buzzfeeds, hashtags, and Tweets, students are increasingly favoring conversational writing and regarding academic writing as less pertinent in their personal lives, education, and future careers. Writing and Literature: Composition as Inquiry, Learning, Thinking and Communication connects students with works and exercises and promotes student learning that is kairotic and constructive. Dr. Tanya Long Bennett, professor of English at the University of North Georgia, poses questions that encourage active rather than passive learning. Furthering ideas presented in *Contribute a Verse*:

A Guide to First-Year Composition as a complimentary companion, Writing and Literature builds a new conversation covering various genres of literature and writing. Students learn the various writing styles appropriate for analyzing, addressing, and critiquing these genres including poetry, novels, dramas, and research writing. The text and its pairing of helpful visual aids throughout emphasizes the importance of critical reading and analysis in producing a successful composition. Writing and Literature is a refreshing textbook that links learning, literature, and life.

History of Shock Waves, Explosions and Impact Peter O. K. Krehl, 2008-09-24 This unique and encyclopedic reference work describes the evolution of the physics of modern shock wave and detonation from the earlier and classical percussion. The history of this complex process is first reviewed in a general survey.

On Their Own Terms Benjamin A. Elman, 2009-07-01 In *On Their Own Terms*, Benjamin A. Elman offers a much-needed synthesis of early Chinese science during the Jesuit period (1600-1800) and the modern sciences as they evolved in China under Protestant influence (1840s-1900). By 1600 Europe was ahead of Asia in producing basic machines, such as clocks, levers, and pulleys, that would be necessary for the mechanization of agriculture and industry. In the seventeenth and eighteenth centuries, Elman shows, Europeans still sought from the Chinese their secrets of producing silk, fine textiles, and porcelain, as well as large-scale tea cultivation. Chinese literati borrowed in turn new algebraic notations of Hindu-Arabic origin, Tychonic cosmology, Euclidian geometry, and various computational advances. Since the middle of the nineteenth century, imperial reformers, early Republicans, Guomindang party cadres, and Chinese Communists have all prioritized science and technology. In this book, Elman gives a nuanced account of the ways in which native Chinese science evolved over four centuries, under the influence of both

Jesuit and Protestant missionaries. In the end, he argues, the Chinese produced modern science on their own terms.

Refiguring the Archive Carolyn Hamilton, Verne Harris, Michèle Pickover, Graeme Reid, Razia Saleh, Jane Taylor, 2012-12-06

Refiguring the Archive at once expresses cutting-edge debates on 'the archive' in South Africa and internationally, and pushes the boundaries of those debates. It brings together prominent thinkers from a range of disciplines, mainly South Africans but a number from other countries. Traditionally archives have been seen as preserving memory and as holding the past. The contributors to this book question this orthodoxy, unfolding the ways in which archives construct, sanctify, and bury pasts. In his contribution, Jacques Derrida (an instantly recognisable name in intellectual discourse worldwide) shows how remembering can never be

separated from forgetting, and argues that the archive is about the future rather than the past. Collectively the contributors demonstrate the degree to which thinking about archives is embracing new realities and new possibilities. The book expresses a confidence in claiming for archival discourse previously unentered terrains. It serves as an early manual for a time that has already begun.

Reading the Market Peter Knight, 2016-09-01 America's fascination with the stock market dates back to the Gilded Age. Winner of the BAAS Book Prize of the British Association of American Studies Americans pay famously close attention to "the market," obsessively watching trends, patterns, and swings and looking for clues in every fluctuation. In *Reading the Market*, Peter Knight explores the Gilded Age origins and development of this peculiar interest. He tracks the historic shift in market operations from local to national while examining how present-day ideas about the nature of markets are tied to past genres of financial representation. Drawing on the late nineteenth-century explosion of

art, literature, and media, which sought to dramatize the workings of the stock market for a wide audience, Knight shows how ordinary Americans became both emotionally and financially invested in the market. He analyzes popular investment manuals, brokers' newsletters, newspaper columns, magazine articles, illustrations, and cartoons. He also introduces readers to fiction featuring financial tricksters, which was characterized by themes of personal trust and insider information. The book reveals how the popular culture of the period shaped the very idea of the market as a self-regulating mechanism by making the impersonal abstractions of high finance personal and concrete. From the rise of ticker-tape technology to the development of conspiracy theories, *Reading the Market* argues that commentary on the Stock Exchange between 1870 and 1915 changed how Americans understood finance—and explains what our pervasive interest in Wall Street says about us now.

Munitions of the mind Philip M. Taylor, 2013-07-19 New edition of a classic work on the history of propaganda. Topical new chapters on the 1991 Gulf War, September 11 and terrorism. An ideal textbook for all international courses covering media and communication studies. Considers the history of propaganda and

how it has become increasingly pervasive due to access to ever-complex and versatile media. Written in an accessible style and format, this book has proven its appeal to the general reader as the public becomes more and more cynical of the manipulations of the political sphere.
