Reading Prehistoric Human Tracks Andreas Pastoors,Tilman Lenssen-Erz,2021 This Open Access book explains that after long periods of prehistoric research in which the importance of the archaeological as well as the natural context of rock art has been constantly underestimated, research has now begun to take this context into focus for documentation, analysis, interpretation and understanding. Human footprints are prominent among the long-time under-researched features of the context in caves with rock art. In order to compensate for this neglect an innovative research program has been established several years ago that focuses on the merging of indigenous knowledge and western archaeological science for the benefit of both sides. The book gathers first the methodological diversity in the analysis of human tracks. Here major representatives of anthropological, statistical and traditional approaches feature the multi-layered methods available for the analysis of human tracks. Second it compiles case studies from around the globe of prehistoric human tracks. For the first time, the most important sites which have been found worldwide are published in a single publication. The third focus of this book is on firsthand experiences of researchers with indigenous tracking experts from around the globe, expounding on how archaeological science can benefit from the ancestral knowledge. This book will be of interest to professional archaeologists, graduate students, ecologists, cultural anthropologists and laypeople, especially those focussing on hunting-gathering and pastoralist communities and who appreciate indigenous knowledge.--

A Quest for Equality ,2007 Though Turkey is a land of vast ethnic, linguistic and religious diversity - home not only to Turks, Kurds and Armenians, but also, among others, Alevis, Ezidis, Assyrians, Laz, Caferis, Roma, Rum, Caucasians and Jews, the history of the state is one of severe repression of minorities in the name of nationalism. This report sets current law and practice in Turkey against the backdrop of equivalent international standards on linguistic rights of minorities; freedom of religion, thought and conscience; freedom of expression; freedom of assembly and association; political participation; property rights and anti-discrimination.

Oral Tradition and Book Culture Pertti Anttonen,Cecilia af Forselles,Kirsti Salmi-Niklander,2018-10-17 Traditionally, oral traditions were considered to diffuse only orally, outside the influence of literature and other printed media. Eventually, more attention was given to interaction between literacy and orality, but it is only recently that oral tradition has come to be seen as a modern construct both conceptually and in terms of accessibility. Oral traditions cannot be studied independently from the culture of writing and reading. Lately, a new interdisciplinary interest has risen to study interconnections between oral tradition and book culture. In addition to the use and dissemination of printed books, newspapers etc., book culture denotes manuscript media and the circulation of written documents of oral tradition in and through the archive, into published collections. Book culture also intertwines the process of framing and defining oral genres with literary interests and ideologies. In addition to writing and reading, the study of oral traditions must also take into consideration the culture of publishing. The present volume highlights varied and selected aspects of the expanding field of research into oral tradition and book culture. The questions discussed include the following: How have printing and book publishing set terms for oral tradition scholarship? How have the practices of reading affected the circulation of oral traditions? Which books and publishing projects have played a key role in this and how? How have the written representations of oral traditions, as well as the roles of editors and publishers, introduced authorship to materials customarily regarded as anonymous and collective? The editors represent some of the key institutions in the study of oral traditions in Finland: the University of Helsinki, the Finnish Literature Society, and the University of Eastern Finland. The authors are folklorists, anthropologists, historians and literary historians, and scholars in information studies from Finland, Sweden, Norway, Ireland, and the United States.

Food Insecurity in Asia Zhang-Yue Zhou, Guanghua Wan, 2017 Achieving food security is vital for any nation. But despite progress in food availability in the postwar period, food insecurity still prevails in many developing countries, with more than half the world's undernourished in Asia. This unacceptable number calls for urgent action. Differences in levels of food security across countries cannot be explained solely by conventional economic arguments, such as resource endowments, country or population size, the level of economic development, and cultural or social differences. This book approaches the issue of food security in a number of Asian and other countries by highlighting the crucial role played by government and economic institutions and by examining how they influence food availability. It lays out valuable policy initiatives for national governments and international bodies, acting through improved institutions, to reduce poverty and inequality and to achieve higher levels of food security nationally and globally.
