SOA Policy, Service Gateway, and SLA Management Robert Barron,Joel Gauci,Jayanthi Krishnamurthy,Robert Laird,David Shute,Stephen Willoughby,Peter Xu,IBM Redbooks,2013-04-01 This IBM® Redbooks® publication teaches you how to automate your runtime policy by using a centralized policy management system. The SOA Policy Solution provides a centralized policy administration, enforcement, and monitoring for runtime policies that enable traffic management for service level agreement enforcement, service mediation, and other customized policies. Policies can be defined once and reused among multiple services, thus enabling a standardized, consistent approach to a runtime policy that saves time and money for implementation and maintenance of non-functional requirements for the enterprise and assists with faster time to market. Business users can use the SOA Policy Solution to help create the service level agreements for their business services to deliver on promises for business performance. IT Architects can use the SOA Policy Solution to architect the policy solution patterns that standardize the runtime policy usage at their organization. Developers select specific policy patterns to implement the non-functional requirements that are associated with their projects. Operations groups provide information about operation needs and create standardized monitoring policy for operational action at run time.

Keywords for Disability Studies Rachel Adams,Benjamin Reiss,David Serlin,2015-08-14 Introduces key terms, concepts, debates, and histories for Disability Studies Keywords for Disability Studies aims to broaden and define the conceptual framework of disability studies for readers and practitioners in the field and beyond. The volume engages some of the most pressing debates of our time, such as prenatal testing, euthanasia, accessibility in public transportation and the workplace, post-traumatic stress, and questions about the beginning and end of life. Each of the 60 essays in Keywords for Disability Studies focuses on a distinct critical concept, including

"ethics," "medicalization," "performance," "reproduction," "identity," and "stigma," among others. Although the essays recognize that "disability" is often used as an umbrella term, the contributors to the volume avoid treating individual disabilities as keywords, and instead interrogate concepts that encompass different components of the social and bodily experience of disability. The essays approach disability as an embodied condition, a mutable historical phenomenon, and a social, political, and cultural identity. An invaluable resource for students and scholars alike, *Keywords for Disability Studies* brings the debates that have often remained internal to disability studies into a wider field of critical discourse, providing opportunities for fresh theoretical considerations of the field's core presuppositions through a variety of disciplinary perspectives. Visit keywords.nyupress.org for online essays, teaching resources, and more.

Pay for Performance in Health Care Jerry Cromwell, Michael G.

Trisolini, Gregory C. Pope, Janet B. Mitchell, Leslie M. Greenwald, 2011-02-28
This book provides a balanced assessment of pay for performance (P4P), addressing both its promise and its shortcomings. P4P programs have become widespread in health care in just the past decade and have generated a great deal of enthusiasm in health policy circles and among legislators, despite limited evidence of their effectiveness. On a positive note, this movement has developed and tested many new types of health care payment systems and has stimulated much new thinking about how to improve quality of care and reduce the costs of health care. The current interest in P4P echoes earlier enthusiasms in health policy—such as those for capitation and managed care in the 1990s—that failed to live up to their early promise. The fate of P4P is not yet certain, but we can learn a number of lessons from experiences with P4P to date, and ways to improve the designs of P4P programs are becoming apparent. We anticipate that a "second generation" of P4P programs can now be developed that can have greater impact and be better integrated with other interventions to improve the quality of care and reduce costs.

z/VM and Linux Operations for z/OS System Programmers Lydia Parziale,Omar Badreddin,Roy P Costa,Rodrigo Ceron Ferreira de Castro,Marian Gasparovic,Kenneth P Haas,Guillaume Lasmayous,Raymond Van Deurs,IBM Redbooks,2008-10-28 This IBM Redbooks publication discusses z/VM and Linux operations from the perspective of the z/OS programmer or system programmer. Although other books have been written about many of these topics, this book gives enough information about each topic to describe z/VM and Linux on IBM System z operations to somebody who is new to both environments. This book is intended for z/OS programmers and system programmers who are transitioning to the z/VM and Linux on System z environments and who want a translation guide for assistance. We base this book on our experiences using System z10 Enterprise Edition, z/VM version 5.3 RSU 0701, and Novell SUSE Linux Enterprise Server (SLES) 10 on System z.

Food Security in Africa Alexander Sarris,2010-01-01 'As they often do, Jamie Morrison and Alexander Sarris have provided researchers, policy-makers, and the interested public with the firm empirical grounding needed for sound agricultural development policies. They have synthesized from a rich and varied set of country studies a unique contribution to one of the key challenges of our times increasing the productivity of smallholder food production in the age of globalization.' Timothy A. Wise, Tufts University, US 'Food security has been a major concern in Africa for decades, and a more pressing problem with recent increases in food prices. The editors and contributors to this volume are experts in the field and should be commended for a timely, informative and in places challenging analysis of food production and markets in eastern and southern Africa. The volume brings a refreshing variety of theoretical, analytical and informed case study approaches to bear on the food security problem; it should be read by anybody seriously interested in African development.' Oliver Morrissey, University of Nottingham, UK Drawing on insights from theoretical applications, empirically based approaches and case study experience, this book contributes to the improved design and use of trade and related policy interventions in staple food markets. Trade policy interventions have a potentially critical role to play in the development of staple food markets in developing countries and, as a source of revenue, in wider processes of rural development. Governments have long defended trade and related policy interventions in staple food markets on the basis of food security concerns. However, the design and implementation of these policies has often resulted in unintended impacts, increasing the risks faced by private sector actors and reducing their incentives for investment in improved market performance. In the context of increasingly volatile staple food markets, this book, commissioned from leading experts in this field, seeks to enhance dialogue between stakeholders involved in, and affected by, the design and use of trade and related policy

interventions. This significant book will appeal to policy analysts and decision makers influential in the design and implementation of trade and related market interventions, as well as students of development economics. Researchers contributing to debates on the use and impacts of trade and related market interventions in staple food markets in poor countries will also find this volume of great benefit.
