Our America: A Hispanic History of the United States Felipe Fernández-Armesto, 2014-01-20 "A rich and moving chronicle for our very present." –Julio Ortega, New York Times Book Review The United States is still typically conceived of as an offshoot of England, with our history unfolding east to west beginning with the first English settlers in Jamestown. This view overlooks the significance of America's Hispanic past. With the profile of the United States increasingly Hispanic, the importance of recovering the Hispanic dimension to our national story has never been greater. This absorbing narrative begins with the explorers and conquistadores who planted Spain's first colonies in Puerto Rico, Florida, and the Southwest. Missionaries and rancheros carry Spain's expansive impulse into the late eighteenth century, settling California, mapping the American interior to the Rockies, and charting the Pacific coast. During the nineteenth century Anglo-America expands west under the banner of "Manifest Destiny" and consolidates control through war with Mexico. In the Hispanic resurgence that follows, it is the peoples of Latin America who overspread the continent, from the Hispanic heartland in the West to major cities such as Chicago, Miami, New York, and Boston. The United States clearly has a Hispanic present and future. And here is its Hispanic past, presented with characteristic insight and wit by one of our greatest historians.

It also presents innovation management from the perspectives of strategy, organization and resource, as well as institution and culture. The book's comprehensive coverage on all areas of innovation management makes this a very useful reference for anyone interested in the subject.

Moon-face and Other Stories Jack London, 1906
JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. *The son of the Wolf* (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, *The Call of the Wild*

(1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.
