Saving Lives, Buying Time Institute of Medicine, Board on Global Health, Committee on the Economics of Antimalarial Drugs, 2004-09-09 For more than 50 years, low-cost antimalarial drugs silently saved millions of lives and cured billions of debilitating infections. Today, however, these drugs no longer work against the deadliest form of malaria that exists throughout the world. Malaria deaths in sub-Saharan Africa—currently just over one million per year—are rising because of increased resistance to the old, inexpensive drugs. Although effective new drugs called artemisinins are available, they are unaffordable for the majority of the affected population, even at a cost of one dollar per course. *Saving Lives, Buying Time: Economics of Malaria Drugs in an Age of Resistance* examines the history of malaria treatments, provides an overview of the current drug crisis, and offers recommendations on maximizing access to and effectiveness of antimalarial drugs. The book finds that most people in endemic countries will not have access to currently effective combination treatments, which should include an artemisinin, without financing from the global community. Without funding for effective treatment, malaria mortality could double over the next 10 to 20 years and transmission will intensify.

Cloud Computing Rajkumar Buyya, James Broberg, Andrzej M. Goscinski, 2010-12-17 The primary purpose of this book is to capture the state-of-the-art in Cloud Computing technologies and applications. The book will also aim to identify potential research directions and technologies that will facilitate creation a global market-place of cloud computing services supporting scientific, industrial, business, and consumer applications. We expect the book to serve as a reference for larger audience such as systems architects, practitioners, developers, new researchers and graduate level students. This book will be a timely contribution to a field that is gaining considerable research interest, momentum, and is expected to be of increasing interest to commercial developers. The book is targeted for professional computer science developers and graduate students especially at Masters level. As Cloud Computing is recognized as one of the top five emerging technologies that will have a major impact on the quality of science and society over the next 20 years, its knowledge will help position our readers at the forefront of the field.

Saving Animals Elan Abrell, 2021-05-04 A fascinating and unprecedented ethnography of animal sanctuaries in the United States In the past three decades, animal rights advocates have established everything from elephant sanctuaries in Africa to shelters that rehabilitate animals used in medical testing, to homes for farmed animals, abandoned pets, and entertainment animals that have outlived their “usefulness.” *Saving Animals* is the first major ethnography to focus on the ethical issues animating the establishment of such places, where animals who have been mistreated or destined for slaughter are allowed to live out their lives simply being animals. Based on fieldwork at animal rescue facilities across the United States, Elan Abrell asks what “saving,” “caring for,” and “sanctuary” actually mean. He considers sanctuaries as laboratories where caregivers conceive and implement new models of caring for and relating to animals. He explores the ethical decision making around sanctuary efforts to unmake property-based human-animal relations by creating spaces in which humans interact with animals as autonomous subjects. *Saving Animals* illustrates how caregivers and animals respond by cocreating new human-animal ecologies adapted to the material and social conditions of the Anthropocene. Bridging anthropology with animal studies and political philosophy, *Saving Animals* asks us to imagine less harmful modes of existence in a troubled world where both animals and humans seek sanctuary.

First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from

American Men of Action Burton Egbert Stevenson,1913

James Russell Lowell and His Friends Edward Everett Hale,1898 When my friend Mr. Howland, of the Outlook magazine, asked me if I could write for that magazine a Life of James Russell Lowell, I said at once that I could not. While there were certain periods of our lives when we met almost daily, for other periods we were parted, so that for many years I never saw him. I said that the materials for any Life of him were in the hands of others, who would probably use them at the proper time. Then Mr. Howland suggested that, without attempting anything which should be called a Life of Mr. Lowell, I might write for the Outlook a review, as it were, of the last sixty years among literary and scientific people in Boston and its neighborhood. I do not think he wanted my autobiography, nor had I any thought of preparing it for him; but he suggested the book which is in the reader's hands. This was in April, 1897.

The Caspian Sea Encyclopedia Igor S. Zonn,Aleksey N Kosarev,Michael Glantz,Andrey G. Kostianoy,2010-05-26 “The Caspian Sea Encyclopedia” is the second one in the new series of encyclo- dias about the seas of the former Soviet Union published by Springer-Verlag. The 1st volume - “The Aral Sea Encyclopedia” was published by Springer in 2009. The series will be continued by “The Black Sea Encyclopedia” in 2010. Today the Caspian Sea is known to readers thanks to its oil and gas resources, sturgeon and caviar, significant sea-level variations, socio-economic and political problems. The Caucasus and Central Asia (http://eurodialogue.org/?les/fckeditor_?les/Caspian-s-map2.png) vii viii Introduction For more than 250 years the Caspian Sea was shared by two states: Russia (the Soviet Union) and Persia (Iran). After the disintegration of the USSR in 1992, the new independent states of Azerbaijan, Turkmenistan and Kazakhstan have radically changed the political and economic situation in the region. In addition to Russia and Iran, who had determined the situation on the Caspian for a long period, Azerbaijan, Turkmenistan and Kazakhstan are now interested parties, beginning a new stage in the historical development of the Caspian region. This increase in the number of the Caspian legal entities from two to three has given rise to a whole tangle of geopolitical, economic, international legal, ethnic and environmental problems, each of which demands its own approach and settlement mechanism.

Urban Resilience in a Global Context Dorothee Brantz,Avi Sharma,2020-10-31 Urban Resilience is seen by many as a tool to mitigate harm in times of extreme social, political, financial, and environmental stress. Despite its widespread usage, however, resilience is used in different ways by policy makers, activists, academics, and practitioners. Some see it as a key to unlocking a more stable and secure urban future in times of extreme global insecurity; for others, it is a neoliberal technology that marginalizes the voices of already marginal peoples. This volume moves beyond praise and critique by focusing on the actors, narratives and temporalities that define urban resilience in a global context. By exploring the past, present, and future of urban resilience, this volume unlocks the potential of this concept to build more sustainable, inclusive, and secure cities in the 21st century.
