**Fingerprints and Other Ridge Skin Impressions** Christophe Champod, Chris J. Lennard, Pierre Margot, Milutin Stoilovic, 2017-12-19 Since its publication, the first edition of Fingerprints and Other Ridge Skin Impressions has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well as the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

*Napoleon's Egypt* Juan Cole, 2007-08-07 In this vivid and timely history, Juan Cole tells the story of Napoleon's invasion of Egypt. Revealing the young general's reasons for leading the expedition against Egypt in 1798 and showcasing his fascinating views of the Orient, Cole delves into the psychology of the military titan and his entourage. He paints a multi-faceted portrait of the daily travails of the soldiers in Napoleon's army, including how they imagined Egypt, how their expectations differed from what they found, and how they grappled with military challenges in a foreign land. Cole ultimately reveals how Napoleon's invasion, the first modern attempt to invade the Arab world, invented and crystallized the rhetoric of liberal imperialism.

Submarine Power Cables Thomas Worzyk,2009-08-11 The demand for high-performance submarine power cables is increasing as more and more offshore wind parks are installed, and the national electric grids are interconnected. Submarine power cables are installed for the highest voltages and power to transport electric energy under the sea between islands, countries and even continents. The installation and operation of submarine power cables is much different from land cables. Still, in most textbooks on electrical power systems, information on submarine cables is scarce. This book is closing the gap. Different species of submarine power cables and their application are explained. Students and electric engineers learn on the electric and mechanic properties of submarine cables. Project developers and utility managers will gain useful information on the necessary marine activities such as pre-laying survey, cable lay vessels, guard boats etc., for the submarine cable installation and repair. Investors and decision makers will find an overview on environmental aspects of submarine power cables. A comprehensive reference list is given for those who want further reading.

Psychovertical Andy Kirkpatrick,2009 WINNER OF THE BOARDMAN TASKER PRIZE 2008 Metro magazine recently wrote that Andy Kirkpatrick makes Ray Mears look like Paris Hilton. Words like boldness, adventure and risk were surely coined especially for him. As one of the world's most accomplished mountaineers and big-wall climbers, he goes vertically where other climbers (to say nothing of the general public) fear to tread. For the first time, this cult hero of vertical rock has written a book, in which his thirteen-day ascent of Reticent Wall on El Capitan in California - the hardest big-wall climb ever soloed by a Briton - frames a challenging autobiography. From childhood on a grim inner-city housing estate in Hull, the story moves through horrific encounters and unique athletic achievements at the extremes of the earth. As he writes, 'Climbs like this make no sense ... the chances of dying on the route are high.' Yet Andy, in his thirties with young children, has everything to live for. This is the paradox at the heart of the story. This book - by turns gut-wrenching, entertaining and challenging - appeals to the adventurer in all of us.
