The diversity of participants in the event from academia, industry, and research reflects in the articles appearing in the volume. The book theme encompasses all industrial and non-industrial applications in which a combination of hardware and software provides operational guidance to devices in the execution of their functions based on the capture and processing of images. This book covers a wide range of topics such as modeling of disease transformation, epidemic forecast, COVID-19, image processing and computer vision, augmented intelligence, soft computing, deep learning, image reconstruction, artificial intelligence in healthcare, brain-computer interface, cybersecurity, and social network analysis, natural language processing, etc.

Sensory Intelligence Annemarie Lombard, 2007 We experience our environment in a unique way through our senses. Some people thrive in a busy environment with lots going on and many people involved. They like everything brighter, louder, hotter, faster and find these inputs enjoyable and stimulating. Others avoid a crowded, noisy environment and will escape to ordered tranquillity whenever they can. They prefer everything softer, milder, slower and quickly feel overwhelmed and irritated by too much fuss and flutter. Sensory intelligence explains in clear layman's terms how this works to help you understand why you and others respond to sensory input the way you do. It then tells you how to modulate your senses to adapt to your environment and other people, or change your environment to fit your sensory preferences. It will help you to function more

effectively and give you greater understanding and adaptability within your relationships, both at home and at work. ;Annemarie Lombard is bridging the gap between what professionals and researchers know about sensation and what the public would benefit from knowing ... When parents, partners, friends and co-workers understand each other and why they are reacting the way they do, it is easier to make adjustments ...; Winnie Dunn (PhD OTR FAOTA), Professor & Chair Department of Occupational Therapy Education, University of Kansas Medical Center.

Policing the Future Hoogenboom, 2023-09-14 International policing is a neglected area of interest. As the world gets smaller due to political, economic, social and technological developments, an evident need arises to understand the implications of (inter)national policing. On both national and international levels, policing is undergoing drastic changes as it continuously adapts itself to changes in society and new forms of crime. This collection of papers addresses two central themes - community policing and organisational crime - and brings together insights and experiences on crime, law enforcement and cooperation from both the academic and the professional policing world. Moreover, the various contributions derive from different countries (both the East and the West) and different institutions such as the Council of Europe and the United Nations.

If you'd like to get the most out of your dollar and your trip, this is the guide for you. I put a fresh spin on budget travel, showing you how to see the best for less and how to see it in a more authentic way--the way the locals do. Plus, you'll learn the tips of the trade to scoring big on resort sales and packages. I'll steer you away from the bland Americanized menus and tell you where to find the region's simple, ultra-fresh cooking, from just-caught fish and lobster grilled on the beach to hand-pressed tortillas stuffed with the local speciality, spicy cochinita pibil. Let me show you the other Cancun--the one only insiders know about.

Hunt for recently unearthed Mayan ruins or learn Spanish the easy way---while living with a Mexican family. These are only a few of the great ways to get closer to the culture of this dynamic region. Read on for more! Happy Travels, Pauline Frommer
