It presents tech. testing and examination methods and techniques that an org. might use as part of an ISA, and offers insights to assessors on their execution and the potential impact they may have on systems and networks. Low Carbon Energy Technologies in Sustainable Energy

Systems Grigorios L. Kyriakopoulos,2021-01-08 Low Carbon Energy Technologies for Sustainable Energy Systems examines, investigates, and integrates current research aimed at operationalizing low carbon technologies within complex transitioning energy economies. Scholarly research has traditionally focused on the technical aspects of exploitation, R&D, operation, infrastructure, and decommissioning, while approaches which can realistically inform their reception and scale-up across real societies and real markets are piecemeal and isolated in separate literatures. Addressing both the technical foundations of each technology together with the sociotechnical ways in which they are spread in markets and societies, this work integrates the technoeconomic assessment of low carbon technologies with direct discussion on legislative and regulatory policies in energy markets. Chapters address issues, such as social acceptance, consumer awareness, environmental valuation systems, and the circular economy, as low carbon technologies expand into energy systems sustainability, sensitivity, and stability. This collective research work is relevant to both researchers and practitioners working in sustainable energy systems. The combination of these features makes it a timely book that is useful and attractive to university students, researchers, academia, and public or private energy policy makers. Combines socio-cultural perspectives, environmental sustainability, and economic feasibility in the analysis of low carbon energy technologies Assesses regulatory governance impacting the environmental protection and the social cohesion of environmentally-directed energy markets Reviews the carbon trade exchange, attributing economic value to carbon and enabling its trading perspectives by people, companies or countries invested in low carbon technologies

So Far from the Sea Eve Bunting,2009-06-29 Laura Iwasaki and her family are paying what may be their last visit to Laura's grandfather's grave. The grave is at Manzanar, where thousands of Americans of Japanese heritage were interned during World War II. Among those rounded up and taken to the internment camp were Laura's father, then a small boy, and his parents. Now Laura says goodbye to Grandfather in her own special way, with a gesture that crosses generational lines and bears witness to the patriotism that survived a shameful episode in America's history. Eve Bunting's poignant text and Chris K. Soentpiet's detailed, evocative paintings make the story of this family's visit to Manzanar, and of the memories stirred by the experience, one that will linger in readers' minds and hearts. Afterword.
