India and Global Governance Harsh V Pant, 2022-03-21 This volume explores India's role in the global governance architecture post-Cold War. It shows how, with a rise in India's capabilities, there is an expectation from its external interlocutors that New Delhi ought to play a larger global role. As Indian policymakers redefine their engagements in the global policy matrix, the chapters in the volume analyse India's role as a challenger and a stakeholder in world politics; its uneasy relationship with Western liberal democracies; and its role in shaping new structures of global governance. The volume focuses on a host of critical issues, including nuclear policy, climate action politics, India's bid for a permanent seat at the UN Security Council, humanitarian interventions, trade governance, democracy promotion, India's engagement with other emerging powers in platforms such as the BRICS, the changing dynamics with its neighbours, and maritime governance. A timely reimagining of global politics, this book will be of great interest to scholars and researchers of politics and international relations, climate change, military and strategic studies, economics, and South Asian studies.

Cyber Conflict Daniel Ventre, 2013-02-07 Today, cyber security, cyber defense, information warfare and cyber warfare issues are among the most relevant topics both at the national and international level. All the major states of the world are facing cyber threats and trying to understand how cyberspace could be used to increase power. Through an empirical, conceptual and theoretical approach, *Cyber Conflict* has been written by researchers and experts in the fields of cyber security, cyber defense and information warfare. It aims to analyze the processes of information warfare and cyber warfare through historical, operational and strategic perspectives of cyber attack. It is original in its delivery because of its multidisciplinary approach within an international framework, with studies dedicated to different states – Canada, Cuba, France, Greece, Italy, Japan, Singapore, Slovenia and South Africa – describing the state's application of information warfare principles both in terms of global development and "local" usage and examples. Contents 1. Canada's Cyber Security Policy: a Tortuous Path Towards a Cyber Security Strategy, Hugo Loiseau and Lina Lemay. 2. Cuba: Towards an Active Cyber-defense, Daniel Ventre. 3. French Perspectives on Cyber-conflict, Daniel Ventre. 4. Digital Sparta: Information Operations and Cyber-warfare in Greece, Joseph Fitsanakis. 5. Energy Security in Asia and Eurasia Mike M. Mochizuki, Deepa M. Ollapally, 2016-12-01 Many states appear to have strong sentiment on energy security and energy transit vulnerability. Some analysts see the rapidly increasing demand for energy and competition for energy resources leading to

nationalistic energy policies. Others argue that global trends with efficient energy markets and growing options on renewables suggest more relaxed energy outlooks. This book focuses on Asia, where global demand for energy is now concentrated in the aspiring and rising powers of the region: China, India, Japan and South Korea, and also recognises the importance of Russia as a growing energy supplier. Contributions by experts in the field provide detailed and parallel case studies. Shedding light on the ongoing debate in the literature regarding energy outlooks of major Asian states, they analyse whether energy policies are expected to evolve along market oriented cooperative lines or more competitive and even destructive mercantile, nationalist lines. The book argues that states are not unitary actors even in the key energy security arena and there are competing and contrasting viewpoints in Asian states on energy security. It suggests that domestic debates structure thinking on energy security, making energy policy more contingent than assumed by purely market or geopolitical logics. Providing a strong contribution to comparative energy security studies, the book fills an important gap in the literature on energy and national security and offers a basis for conducting further inter-state, interactive analysis. It will be of interest to researchers on Asian Studies, energy politics and international relations.
