Functional Gradient Materials and Surface Layers Prepared by Fine Particles Technology Marie-Isabelle Baraton, Irina V. Uvarova, 2012-12-06 The NATO Advanced Study Institute on Functional Gradient Materials and Surface Layers Prepared by Fine Particles Technology was held in Kiev (Ukraine) on June 18- 28, 2000 where more than 90 participants, ranging from Ph.D. students to experienced senior scientists, met and exchanged ideas. This meeting was aimed at stimulating the research work across traditional disciplinary lines by bringing together scientists from diverse research areas related to functional gradient materials and surface layers. It also intended to give opportunities for initiating collaborative works between scientists from NATO and Partner countries and to trigger fruitful and exciting discussions between experienced and young researchers. In this respect, this NATO-ASI has been quite successful. The term of functional gradient materials which originates from Japan in the 1980's describes a class of engineering materials with spatially inhomogeneous microstructures and properties (MRS Bulletin, 1995, 20, N°1). These materials can be successfully utilized in various applications like electronic devices, optical films, anti wear and anti-corrosion coatings, thermal barrier coatings, biomaterials, to name only a few. Although these functional gradient materials are not fundamentally new, the use of nanoparticles in their fabrication and in surface layers as well has greatly improved their performances to meet challenging requirements for industrial applications.

Who Will Lead Us? Samuel C. Heilman,2019-07-02 Nearly decimated in the Holocaust and repressed in the Soviet Union, Hasidism has experienced an extraordinary revival. Hasidic communities, now settled primarily in North America and Israel, have reversed the losses they suffered and are growing exponentially. With powerful attachments to the past, mysticism, community, tradition, and charismatic leadership, Hasidism seems the opposite of contemporary Western culture, yet it has thrived in the democratic countries and culture of the West. How? Who Will Lead Us? reveals the answers in the fascinating story of five contemporary Hasidic dynasties and their handling of the delicate issue of leadership and succession. Revolving around the central figure of the rebbe, the book explores two dynasties with too few successors, two with too many successors, and one that believes their last rebbe continues to lead them even after his death. Samuel C. Heilman, recognized as a foremost expert on modern Jewish Orthodoxy, here provides outsiders with the essential guide to continuity in the Hasidic world.
