*The Origin of Consciousness in the Breakdown of the Bicameral Mind* Julian Jaynes, 2000-08-15  
National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, The New Yorker "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

**Pens** Blaise Pascal, 1995-12 Blaise Pascal, the precociously brilliant contemporary of Descartes, was a gifted mathematician and physicist, but it is his unfinished apologia for the Christian

religion upon which his reputation now rests. The *Penseés* is a collection of philosophical fragments, notes and essays in which Pascal explores the contradictions of human nature in psychological, social, metaphysical and - above all - theological terms. Mankind emerges from Pascal's analysis as a wretched and desolate creature within an impersonal universe, but who can be transformed through faith in God's grace. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is

perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Software-Defined Radio for Engineers Alexander M. Wyglinski, Robin Getz, Travis Collins, Di Pu, 2018-04-30 Based on the popular Artech House classic, *Digital Communication Systems Engineering with Software-Defined Radio*, this book provides a practical approach to quickly learning the software-defined radio (SDR) concepts needed for work in the field. This up-to-date volume guides

readers on how to quickly prototype wireless designs using SDR for real-world testing and experimentation. This book explores advanced wireless communication techniques such as OFDM, LTE, WLA, and hardware targeting. Readers will gain an understanding of the core concepts behind wireless hardware, such as the radio frequency front-end, analog-to-digital and digital-to-analog converters, as well as various processing technologies. Moreover, this volume includes chapters on timing estimation, matched filtering, frame synchronization message decoding, and source coding. The orthogonal frequency division multiplexing is explained and details about HDL code generation and deployment are provided. The book concludes with coverage of the WLAN toolbox with OFDM beacon reception and the LTE toolbox with downlink reception. Multiple case studies are provided throughout the book. Both MATLAB and Simulink source code are included to assist readers with their projects in the field.

The Long Road to Gettysburg Jim Murphy, 1992 Describes the events of the Battle of Gettysburg in 1863 as seen through the eyes of two actual participants, nineteen-year-old Confederate lieutenant John Dooley and seventeen-year-old Union soldier Thomas Galway. Also discusses Lincoln's famous speech delivered at the dedication of the National Cemetery at Gettysburg.

**Divining Victory: Airpower in the 2006 Israel-Hezbollah War** William M. Arkin, 2011-09-16 This is the story of an airpower-dominated campaign, one that was deeply flawed in its design yet impressive in its efficiency. This quick-look study is based upon visits to damaged sites, villages, towns, and cities; discussions with government and military officials; and experience of having evaluated airpower and its effects in Afghanistan, Iraq, and the former Yugoslavia (and previously in Lebanon). Months of follow-up research included exchanges with Israeli, Lebanese, Hezbollah, and US experts. The intent was to develop a timely airpower narrative to enhance professional military education and planning. About the author: William M. Arkin is an independent military analyst, journalist, and author. He writes the "Early Warning" column for [washingtonpost.com](http://washingtonpost.com) (where he previously wrote the "DOT.MIL" column from 1998 to 2003) and is a longtime NBC News military analyst. *The Popol Vuh* Lewis Spence, 1908

**The Conservative Nanny State** Dean Baker, 2006 In his new book, economist Dean Baker debunks the myth that conservatives favor the market over government intervention. In fact, conservatives rely on a range of nanny state policies that ensure the rich get richer while leaving most Americans worse off. It's time for the rules to change. Sound economic policy should harness the

market in ways that produce desirable social outcomes - decent wages, good jobs and affordable health care. Dean Baker is co-director of the Center for Economic and Policy Research.

Toward a Theory of Spacepower: Selected Essays, 2011

**Chariots for Apollo** Courtney G. Brooks, James M. Grimwood, Loyd S. Swenson, 2012-05-14 This illustrated history by a trio of experts is the definitive reference on the Apollo spacecraft and lunar modules. It traces the vehicles' design, development, and operation in space. More than 100 photographs and illustrations.

*The War with Mexico* Justin Harvey Smith, 1919 As every one understands, our conflict with Mexico has been almost entirely eclipsed by the greater wars following it. But in the field of thought mere size does not count for much; and while the number of troops and the lists of casualties give the present subject little comparative importance, it has ample grounds for claiming attention. As a territorial stake New Mexico, Arizona and California were of immense value. National honor was involved, and not a few of the Mexicans thought their national existence imperilled. Some of the diplomatic questions were of the utmost difficulty and interest. The clash of North and South, American and Mexican, produced extraordinary lights and shades, and in both countries the politics that lay behind the military operations made a dramatic and continual by-play. The military conduct of the governments-especially our own-and the behavior of our troops on foreign soil afforded instruction worthy to be

pondered.

**The Annihilation Score** Charles Stross, 2016-06-28  
From the Hugo Award-winning author of *The Rhesus Chart* comes another supernatural case from *The Laundry Files*... Dominique O'Brien—her friends call her Mo—lives a curious double life with her husband, Bob Howard. To the average civilian, they're boring middle-aged civil servants. But within the labyrinthine secret circles of Her Majesty's Government, they're operatives working for the nation's occult security service known as the Laundry, charged with defending Britain against dark supernatural forces threatening humanity. Unfortunately, one of those supernatural threats has come between Mo and Bob. An antique violin, an Erich Zahn original, made of white human bone, was designed to produce music capable of slaughtering demons. Mo is the custodian of this unholy instrument. It invades her dreams and yearns for the blood of her colleagues—and her husband. And despite Mo's proficiency as a world-class violinist, it cannot be controlled...
