*Bank 2.0* Brett King, 2010 The financial crisis is just beginning for retail institutions. Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking, app phones and mobility are also stretching traditional banking models to the limit. BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years.

**Fields of Gold** Madeleine Fairbairn, 2020-07-15 Fields of Gold critically examines the history, ideas, and political struggles surrounding the financialization of farmland. In particular, Madeleine Fairbairn focuses on developments in two of the most popular investment locations, the US and Brazil, looking at the implications of financiers' acquisition of land and control over resources for rural livelihoods and economic justice. At the heart of Fields of Gold is a tension between efforts to transform farmland into a new financial asset class, and land's physical and social properties, which frequently obstruct that transformation. But what makes the book unique among the growing body of work on the global land grab is Fairbairn's interest in those acquiring land, rather than those affected by land acquisitions. Fairbairn's work sheds ethnographic light on the actors and relationships—from Iowa to Manhattan to São Paulo—that have helped to turn land into an attractive financial asset class. Thanks to generous funding from UC Santa Cruz, the ebook editions of this book are available as Open Access volumes from Cornell Open ([cornellpress.cornell.edu/cornell-open](https://cornellpress.cornell.edu/cornell-open)) and other repositories.
