Conference, 2009-07-01 Here are eleven essays addressing various aspects of the application process: building an office, engaging students in research, connecting them to internships and other special opportunities, embracing diversity, defining leadership, involving faculty, and preparing for an interview. There are also realistic assessments of the odds of winning a scholarship. Three of the essays are by directors or presidents of the Ron Brown Scholar Program, the Senator George J. Mitchell Scholarship Research Institute, and the Coca-Cola Scholars Foundation. The essays are a result of the National Association of Fellowships Advisors conference, NAFA in Washington: Scholarships in a National Context, held in Washington, D.C., in July of 2007. Carcass management guidelines Miller, L.P., Miknis, R.A. and Flory, G.A.,2020-12-28 Animal disease outbreaks pose many challenges for response authorities that can impact livelihoods, food security, and the environment. Proper disposal of animal carcasses that die or are culled during the outbreak is a key component of a successful response to a disease outbreak because it helps prevent or mitigate the further spread of pathogens and in case of zoonotic disease, to further protect human health. The practical guidelines presented hereby provide carcass and related waste management considerations and recommended procedures for use by Veterinary Services and other official response authorities when developing animal disease outbreak containment and eradication plans. The guidelines apply to animal disease outbreaks of varying sizes, whether the outbreak is isolated to a single premise or spans a region to cover numerous premises. However, they are focused on small to medium-sized holdings in countries without access to engineered landfills, rendering plants or controlled incinerators. The guidelines are written in the spirit of "keep it simple and doable", considering the limited human and financial resources that many countries are constrained with. Its presentation and practical approach ensure that countries will find it very useful for their emergency operation procedures toolbox. Further, the guidelines directly contribute to the one-health approach by protecting the health of animals, humans, and the environment.

The Palgrave Handbook of Wine Industry Economics Adeline Alonso Ugaglia,Jean-Marie Cardebat,Alessandro Corsi,2019-03-15 This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.
