Aesthetical and Philosophical Essays Friedrich Schiller,1895

On The Aesthetic Education Of Man Friedrich Schiller,2013-03-13 Art is the right hand of Nature. The latter has only given us being, the former has made us men.-Friedrich Schiller Only through Beauty's morning-gate, dost thou penetrate the land of knowledge. - Friedrich Schiller Friedrich Schiller Grace is the beauty of form under the influence of freedom. The Animal Question : Why Nonhuman Animals Deserve Human Rights Paola Cavalieri,2003-12-24 How much do animals matter--morally? Can we keep considering them as second class beings, to be used merely for our benefit? Or, should we offer them some form of moral egalitarianism? Inserting itself into the passionate debate over animal rights, this fascinating, provocative work by renowned scholar Paola Cavalieri advances a radical proposal: that we extend basic human rights to the nonhuman animals we currently treat as things. Cavalieri first goes back in time, tracing the roots of the debate from the 1970s, then explores not only the ethical but also the scientific viewpoints, examining the debate's precedents in mainstream Western philosophy. She considers the main proposals of reform that recently have been advanced within the framework of today's prevailing ethical perspectives. Are these proposals satisfying? Cavalieri says no, claiming that it is necessary to go beyond the traditional opposition between utilitarianism and Kantianism and focus on the question of fundamental moral protection. In the case of human beings, such protection is granted within the widely shared moral doctrine of universal human rights' theory. Cavalieri argues that if we examine closely this theory, we will discover that its very logic extends to nonhuman animals as beings who are owed basic moral and legal rights and that, as a result, human rights are not human after all.

Cultures of Violence S. Carroll,2007-05-23 Thinkers and historians have long perceived violence and its control as integral to the very idea of 'Western Civilization'. Focusing on interpersonal violence and the huge role it played in human affairs in the post-medieval West, this timely collection brings together the latest interdisciplinary and historical research in the field.

Roberts Vs. Texaco: Bari-Ellen Roberts,Jack E. White,1999-03-09 Texaco recruited banking executive Bari-Ellen Roberts with promises of a professional challenge and advancement. But she and 1400 other African Americans faced a persistent pattern of racial discrimination so onerous that it wound up in a lawsuit-and ultimately in the largest discrimination settlement in U.S. History. This is the true story of how a giant corporation was challenged against all odds by one brave woman who was determined to stand her ground. Here, in Bari-Ellen Roberts' own words, is the fascinating, infuriating, and ultimately triumphant account of how she achieved an electrifying result that could change the face of corporate America, including the inside story of the notorious Texaco Tapes, which recorded senior executives making racially-charged comments while they allegedly plotted the destruction of evidence. Here is a fresh and inspiring vantage point on what is unquestionably the major civil rights battleground of the twenty-first century: the workplace. Spellbinding and eloquent, intensely personal and

dramatically riveting, this is the most persuasive yet damning account of corporate racial discrimination ever written.

War and Human Nature Stephen Peter Rosen, 2009-02-09 Why did President John F. Kennedy choose a strategy of confrontation during the Cuban missile crisis even though his secretary of defense stated that the presence of missiles in Cuba made no difference? Why did large numbers of Iraqi troops surrender during the Gulf War even though they had been ordered to fight and were capable of doing so? Why did Hitler declare war on the United States knowing full well the power of that country? War and Human Nature argues that new findings about the way humans are shaped by their inherited biology may help provide answers to such questions. This seminal work by former Defense Department official Stephen Peter Rosen contends that human evolutionary history has affected the way we process the information we use to make decisions. The result is that human choices and calculations may be very different from those predicted by standard models of rational behavior. This notion is particularly true in the area of war and peace, Rosen contends. Human emotional arousal affects how people learn the lessons of history. For example, stress and distress influence people's views of the future, and testosterone levels play a role in human social conflict. This thought-provoking and timely work explores the mind that has emerged from the biological sciences over the last generation. In doing so, it helps shed new light on many persistent puzzles in the study of war.

The Fragile X Zombies Alan J. Weberman, 2018-05-08 This book puts forth the theory that autism is congenital brain disorder not a neuro-developmental disorder. Autistic humans are the defectives of nature's factory and are not wired right. They should be institutionalized if they show violent tendencies because they lack empathy for other human beings as their illness makes them think only of themselves as in the word auto. Automobile. Self Moving. These misfits have taken more lives in the mass shootings than any other group and it is time for the public to do something about it. This book examines the most gregarious cases one by one and demonstrates that if

not for the Politically Correct BS generated by Obama's Department of Miseducation and Autism Speaks, a lobby group for mass murder, a lot of these attacks could have been prevented. It is not worth sacrificing the lives of normal young people so a bunch of miscreants can be accepted by society. Autistic people should NOT be allowed to own guns nor should they have access to others guns. Look what happened to Nancy Lanza. She let Adam have access to guns and he killed dozens of little children after killing this mother varmint with a varmint gun.

Tar Heels in Gray John B. Cameron, 2021-09-30 The 30th North Carolina Infantry was involved in most of the major battles in Virginia from the Seven Days through the surrender at Appomattox, and saw some of the bloodiest fighting of the American Civil War. Two-thirds of these men volunteered early; the others were enlisted at the point of a bayonet. Their casualty rate was high, the rate of death from disease was higher and the desertion and AWOL rate was higher still. What was the war actually like for these men? What was their economic status? To what extent were they involved in the institution of slavery? What were their lives like in the Army? What did they believe they were fighting for and did those views change over time? This book answers those questions and depicts Civil War soldiers as they were, rather than as appendages to famous generals or symbols of myth. It focuses on the realities of the men themselves, not their battles. In addition to the author's personal collection of letters and other contemporary records, it draws upon newly discovered letters, diaries, memoirs, census records, and published works.

Dictionary and Thesaurus of Tocharian A Gerd Carling, 2009 This dictionary describes Tocharian A, one of two Tocharian languages documented in manuscripts of Buddhist texts from the second half of the 1st millennium CE, excavated in the oases of the Tarim basin. The dictionary contains also a thesaurus, based on all the identified texts in Tocharian A, including previously published and unpublished texts from various collections (Paris, Berlin). All forms of words, including variants occurring in the texts, are listed separately with reference to all occurrences and a sample of passages in transcription and translation. The meaning of a number of words has been better defined and, when necessary, corrected against previous glossaries. Much focus has been laid on phraseology and literary parallels with other Buddhist texts in Sanskrit and Uighur. The description of the verbal forms has been listed according to the stems of the paradigms. The sources of loanwords, e.g., from Tocharian B, Old and Middle Indo-Aryan, Iranian, Old Turkic, and Chinese, as well as the corresponding words in Tocharian B, are also given.

Indigenous Peoples' Land Rights under International Law Jérémie Gilbert, 2016-07-08 This book addresses the right of indigenous peoples to live, own and use their traditional territories, and analyses how international law addresses this. Through its meticulous examination of the interaction between international law and indigenous peoples' land rights, the work explores several burning issues such as collective rights, self-determination, property rights, cultural rights and restitution of land. It delves into the notion of past violations and the role of international law in providing for remedies, reparation and restitution. It also argues that there is a new phase in the relationship between States, indigenous peoples and private actors, such as corporations, in the

making of territorial agreements.

Epstein Dylan Howard, Melissa Cronin, James Robertson, 2019-12-03 This is—for the first time—the full and unedited story behind the sick life and mysterious death of Jeffrey Epstein that is being called one of the most significant scandals in American history. He was the billionaire financier and close confidant of presidents, prime ministers, movie stars and British royalty, the mysterious self-made man who rose from blue-collar Brooklyn to the heights of luxury. But while he was flying around the world on his private jet and hosting lavish parties at his private island in the Caribbean, he also was secretly masterminding an international child sex ring—one that may have involved the richest and most influential men in the world. The conspiracy of corruption was an open secret for decades. And then this summer, it all came crashing down. After his arrest on sex trafficking charges in July, it seemed Epstein's darkest secrets would finally see the light. But hopes for true justice were shattered on August 10 this year, when he was found dead in his cell at the Metropolitan Correctional Center, New York. The verdict: suicide. The timing: convenient, to say the least. Now, *Epstein: Dead Men Tell No Tales* delivers bombshell new revelations, uncovers how the man President Trump once described as a “terrific guy” abused hundreds of underage girls at his mansions in Palm Beach and Manhattan... all while entertaining the world's most powerful men—including President Clinton, Prince Andrew, and Donald Trump himself. How much did they know about his perversions? And did they take part? How might they have helped him to continue his abuse, and to escape justice for it? What responsibility might they have for his sudden, shocking death? And is there a shocking spy and blackmail story at the heart of the scandal? The answers to these questions and more will be explored in *Epstein: Dead Men Tell No Tales* with groundbreaking new reporting, never-before-seen court files, and interviews with new witnesses and confidants. Combining the very best investigative reporting from investigative journalists Dylan Howard, Melissa Cronin and James Robertson—who have been covering the case for close to a decade—will send shockwaves through the highest levels of the establishment.
