Rosie Revere, Engineer Andrea Beaty, 2013-09-03 New York Times Bestseller Rosie may seem quiet during the day, but at night she's a brilliant inventor of gizmos and gadgets who dreams of becoming a great engineer. When her great-great-aunt Rose (Rosie the Riveter) comes for a visit and mentions her one unfinished goal—to fly—Rosie sets to work building a contraption to make her aunt's dream come true. But when her contraption doesn't fly but rather hovers for a moment and then crashes, Rosie deems the invention a failure. On the contrary, Aunt Rose insists that Rosie's contraption was a raging success: you can only truly fail, she explains, if you quit. From the powerhouse author-illustrator team of Iggy Peck, Architect comes Rosie Revere, Engineer, another charming, witty picture book about believing in yourself and pursuing your passion. Ada Twist, Scientist, the companion picture book featuring the next kid from Iggy Peck's class, is available in September 2016.!--?xml:namespace prefix = o ns = urn:schemas-microsoft-com:office:office /-- Praise for Rosie Revere, Engineer Comically detailed mixed-media illustrations that keep the mood light and emphasize Rosie's creativity at every turn.—Publishers Weekly The detritus of Rosie's collections is fascinating, from broken dolls and stuffed animals to nails, tools, pencils, old lamps and possibly an erector set. And cheddar-cheese spray. —Kirkus Reviews This celebration of creativity and perseverance is told through rhyming text, which gives momentum and steady pacing to a story, consistent with the celebration of its heroine, Rosie. She's an imaginative thinker who hides her light under a bushel (well, really, the bed) after being laughed at for one of her inventions. —Booklist Award 2013 Parents' Choice Award - GOLD 2014 Amelia Bloomer Project List Read Boston's Best Read Aloud Book

One Acre and Security Bradford Angier, 2017-09-15 A passport to freedom that shows how to find fun, food, shelter, and income on land that may be within easy-driving distance of the city and suburbs. Why work a lifetime, asks Angier, to accumulate enough money to retire from the rat race during the last, least active years of life, when a little ground can provide healthful, relaxed living—now—and income too? One Acre and Security explains how “three-squares-a-day” and money to spend can come from the earth with instructions on: sheep or pig farming, raising bees for honey, keeping dairy herbs of cows or goats, making money with herb culture, raising and selling rabbits and earthworms, running a poultry farm, raising fish, frogs, and turtles for profit and fun. Angier, the man who has done it all himself, shares too what he has learned about some of the ways to eat from nature's free banquet table, how to stretch country-living with hikes on famous trails or on any untrammelled path, where to find the best hunting and fishing, and how to catch bigger, healthier fish. “This book is written for those who want to move—not to the distant wilderness—but just far enough away from the smog and the screaming traffic to be where meat will be theirs for the raising, fish for the catching, fruit and vegetables for the picking, fuel for the cutting, home for the satisfaction of building...breathing cleaner air, beholden to none, doing what they want to do most and giving it their best,” says Bradford Angier in One Acre and Security...

Learning Theology Amos Yong, 2018-09-04 Theology—the attempt to come to a deeper, more faithful understanding of one's encounter with God—is something to which all Christians are called. In Learning Theology, Amos Yong invites the reader to lay claim to that calling and to see it as yet another opportunity to love God. Written for those taking their first course in the subject, this book introduces the foundational sources and tasks of theology. It asks what difference theology makes in our lives, how it can influence the way we write and study, and how we understand other forms of learning as part of the Spirit's leadership. Yong encourages the reader to see all of life through the lens of faith, and Learning Theology offers tools to more thoughtfully and faithfully perform that task.

High Efficiency Video Coding (HEVC) Vivienne Sze, Madhukar Budagavi, Gary J. Sullivan, 2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

Radio in the Digital Age Andrew Dubber, 2014-01-21 Radio's influence can be found in almost every corner of new media. Radio in the Digital Age assesses a medium that has not only survived the challenges of a new technological age but indeed has extended its reach. This is not a book about digital radio, but rather about the medium of radio in its many analogue and digital forms in an age characterised by digital technologies. The context of the digital age reveals new insights about the nature of radio. In this important addition to the world of radio scholarship, Dubber provides a theoretical framework for understanding the medium - allowing for complexity and contradiction, while avoiding essentialism and technological determinism. Introducing radio as a series of practices and phenomena that can be understood through a range of discursive categories, this book explores the relationships between radio, music, politics, storytelling and society in a new and thoughtful way. This book will make essential reading for students of media, communication, broadcasting and the digital industries. It offers a timely and comprehensive introduction for anyone who wishes to understand the role of radio in today's media landscape.

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.
