Implementing an IBM/Cisco SAN Jon Tate,Michael Engelbrecht,Jacek Koman,IBM Redbooks,2009-03-09 Do everything that is necessary and absolutely nothing that is not. In this IBM® Redbooks® publication, which is an update and major revision of the previous version, we have consolidated as much of the critical information as possible while discussing procedures and tasks that are likely to be encountered on a daily basis. Each of the products described has much more functionality than we could cover in just one book. The IBM SAN portfolio is rich in quality products that bring a vast amount of technicality and vitality to the SAN world. Their inclusion and selection is based on a thorough understanding of the storage networking environment that positions IBM, and therefore its customers and partners, in an ideal position to take advantage by their deployment. We discuss the latest additions to the IBM/Cisco SAN family and we show how they can be implemented in an open systems environment, focusing on the Fibre Channel protocol (FCP) environment. We address some of the key concepts that they bring to the market, and in each case, we give an overview of those functions that are essential to building a robust SAN environment.

Governing Cyberspace Dennis Broeders,Bibi van den Berg,2020-06-26 Cyber norms and other ways to regulate responsible state behavior in cyberspace is a fast-moving political and diplomatic field. The academic study of these processes is varied and interdisciplinary, but much of the literature has been organized according to discipline. Seeking to cross disciplinary boundaries, this timely book brings together researchers in fields ranging from international law, international relations, and political science to business studies and philosophy to explore the theme of responsible state behavior in cyberspace. . Divided into three parts, *Governing Cyberspace* first looks at current debates in and about international law and diplomacy in cyberspace. How does international law regulate state behaviour and what are its limits? How do cyber superpowers like China and Russia shape their foreign policy in relation to cyberspace? The second focuses on power and governance. What is the role for international organisations like NATO or for substate actors like intelligence agencies? How do they adapt to the realities of cyberspace and digital conflict? How does the classic balance of power play out in cyberspace and how do different states position themselves? The third part takes a critical look at multistakeholder and corporate diplomacy. How do global tech companies shape their role as norm entrepreneurs in cyberspace, and how do their cyber diplomatic efforts relate to their corporate identity?

The Snowy Nap Jan Brett,2018-10-16 In this instant winter classic, Jan Brett's Hedgie tries to stay awake so he doesn't miss out on all the snowy

fun his friends are having. A chill is in the air, and as Hedgie trundles around the farm all his friends tell him of the winter-time fun he will miss as he hibernates: Icicles decorating the chicken coop! Lisa making snowmen! The pond turned to slippery ice! It sounds so amazing that Hedgie decides to stay awake instead of going to his burrow. But then, a snowstorm starts. Luckily, Lisa finds him and brings him to her home, so Hedgie gets to see the wonders of winter from inside the cozy house. From the creator of winter classics like *The Mitten*, *The Animals' Santa*, and *The Three Snow Bears* comes another seasonal adventure that is sure to warm the heart.

Statistics for Lawyers Michael O. Finkelstein, Bruce Levin, 2012-12-06 Statistics for Lawyers presents the science of statistics in action at the cutting edge of legal problems. A series of more than 90 case studies, drawn principally from actual litigation, have been selected to illustrate important areas of the law in which statistics has played a role and to demonstrate a variety of statistical tools. Some case studies raise legal issues that are being intensely debated and lie at the edge of the law. Of particular note are problems involving toxic torts, employment discrimination, stock market manipulation, paternity, tax legislation, and drug testing. The case studies are presented in the form of legal/statistical puzzles to challenge the reader and focus discussion on the legal implications of statistical findings. The techniques range from simple averaging for the estimation of thefts from parking meters to complex logistic regression models for the demonstration of discrimination in the death penalty. Excerpts of data allow the reader to compute statistical results and an appendix contains the authors' calculations.
