Cybersecurity Framework Manufacturing Profile

National Institute of Standards, 2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review.

This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives

manufacturers: * A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system *

An evaluation of their ability to operate the control environment at their acceptable risk level * A standardized approach to

preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can

download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a

network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a

250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer

that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink

jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com

3D Laser Scanning for Heritage Clive Boardman, Paul Bryan, 2018 The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural

heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.

Social Media in Politics Bogdan Pătruț, Monica

Pătruț,2014-05-05 This volume sets out to analyse the relation between social media and politics by investigating the power of the internet and more specifically social media, in the political and social discourse. The volume collects original research on the use of social media in political campaigns, electoral marketing, riots and social revolutions, presenting a range of case studies from across the world as well as theoretical and methodological contributions. Examples that explore the use of social media in electoral campaigns include, for instance, studies on the use of Face book in the 2012 US presidential campaign and in the 2011 Turkish general elections. The final section of the book debates the usage of Twitter and other Web 2.0 tools in mobilizing people for riots and revolutions, presenting and analysing recent events in Istanbul and Egypt, among others.
