**Noise and Military Service** Institute of Medicine,Medical Follow-up Agency,Committee on Noise-Induced Hearing Loss and Tinnitus Associated with Military Service from World War II to the Present,2006-01-20 The Institute of Medicine carried out a study mandated by Congress and sponsored by the Department of Veterans Affairs to provide an assessment of several issues related to noise-induced hearing loss and tinnitus associated with service in the Armed Forces since World War II. The resulting book, *Noise and Military Service: Implications for Hearing Loss and Tinnitus*, presents findings on the presence of hazardous noise in military settings, levels of noise exposure necessary to cause hearing loss or tinnitus, risk factors for noise-induced hearing loss and tinnitus, the timing of the effects of noise exposure on hearing, and the adequacy of military hearing conservation programs and audiometric testing. The book stresses the importance of conducting hearing tests (audiograms) at the beginning and end of military service for all military personnel and recommends several steps aimed at improving the military services' prevention of and surveillance for hearing loss and tinnitus. **Urban Heat Island (UHI) Mitigation** Napoleon Enteria,Matteos Santamouris,Ursula Eicker,2020-12-14 This book discusses the concepts and technologies associated with the mitigation of urban heat islands (UHIs) that are applicable in hot and humid regions. It presents several city case studies on how UHIs can be reduced in various areas to provide readers, researchers, and policymakers with insights into the concepts and technologies that should be considered when planning and constructing urban centres and buildings. The rapid development of urban areas in hot and humid regions has led to an increase in urban temperatures, a decrease in ventilation in buildings, and a transformation of the once green outdoor environment into areas full of solar-energy-absorbing concrete and asphalt. This situation has increased the discomfort of people living in these areas regardless of whether they occupy concrete structures. This is because indoor and outdoor air quality have both suffered from urbanisation. The development of urban areas has also increased energy consumption so that the occupants of buildings can enjoy indoor thermal comfort and air quality that they need via air conditioning systems. This book offers solutions to the recent increase in the number of heat islands in hot and humid regions.

KAOS. Ten Years of Hacking and Media Activism AUTISTICI INVENTATI. -,2017-04-20 Autistici/Inventati was funded in 2001 with the goal of creating an autonomous server and providing free web services which respected users' privacy and anonymity. Having grown into a distributed network spread over several countries, their projects and servers have repeatedly been subjected to legal pressure by governments: however, even while being forcibly seized, shut down and under invasive surveillance operations, they survived. As of today they still offer secure and non-commercial tools for free communication to thousands of users. +KAOS is a cut and paste of interviews, like a documentary film transposed on paper. It describes the peculiar relationship between hacktivism and activism, in Italy and beyond, highlighting the importance of maintaining digital infrastructures. While this may not sound as glamorous as sneaking into a server and leaking data, it is a fundamental topic: not even the most emblematic group of hacktivists can operate without the services of radical server collectives.
