*Emergency Response Guidebook* U.S. Department of Transportation,2013-06-03 Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

**2016 Emergency Response Guidebook** Department of Transportation,2018-04-24 The ERG is the ideal guide to help when responding to transportation emergencies involving hazardous materials. It is a must-have for everyone who handles and transports dangerous goods and hazmat. This guide helps your company comply with the DOT 49 CFR 172.602 requirement that hazmat shipments be accompanied with emergency response information. The Emergency Response Guidebook is updated every 4 years - Don't be caught with the outdated 2012 ERG

Fingerprints and Other Ridge Skin Impressions Christophe Champod,Chris J. Lennard,Pierre Margot,Milutin Stoilovic,2017-12-19 Since its publication, the first edition of Fingerprints and Other Ridge Skin Impressions has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

**High-Performance and Specialty Fibers** Japan The Society of Fiber Science and Techno,2016-08-16 This book reviews the key technologies and characteristics of the modern man-made specialty fibers mainly developed in Japan. Since the production of many low-cost man-made fibers shifted to China and other Asian countries, Japanese companies have focused on production of high-quality, high-performance super fibers as well as highly functionalized fibers so-called 'Shin-gosen'. Zylon™ and Dyneema™ manufactured by Toyobo, Technora™ produced by Teijin, and Vectran™ developed by Kuraray are those examples of super fibers. Carbon fibers Torayca™ from Toray have occupied the most advanced high-performance application area. Various types of polyester fibers having design-shaped cross-sections and special fiber morphologies and those showing specific physico-chemical properties have also been developed to acquire a high-value textile market of the world. This book describes how these high-tech fibers have been developed and what aspects are the most important in each fiber based on its structure-property relationship. Famous specialists both in industry and academia are responsible for the contents, explaining the design concepts and the special technologies for the production of these special fibers. For university teachers and students, this volume is an excellent textbook that elucidates the basic concepts of modern fibers. At the same time, researchers, both in academia and industry, will find a comprehensive overview of recent man-made fibers. This publication, presenting the most easily understandable general survey of specialty man-made fibers to date, is dedicated to the 70th-anniversary of the Society of Fiber Science and Technology, Japan.

Alternative Futures K J Joy,Ashish Kothari,2018-03-06 A remarkable, first-ever collection of 35 essays on India's future, by a diverse set of authors - activists, researchers, media practitioners, those who have influenced policies and those working at the grassroots. This book brings together scenarios of an India that is politically and socially egalitarian, radically democratic, economically sustainable and equitable, and socio-culturally diverse and harmonious. Alternative Futures: India Unshackled covers a wide range of issues, organized under four sections. It explores ecological futures including environmental governance, biodiversity conservation, water and energy. Next, it envisions political futures including those of democracy and power, law, ideology, and India's role in the globe. A number of essays then look at economic futures, including agriculture, pastoralism, industry, crafts, villages and cities, localization, markets, transportation and technology. Finally, it explores socio-cultural futures, encompassing languages, learning and education, knowledge, health, sexuality and gender, and marginalized sections like dalits, adivasis, and religious minorities. Introductory and concluding essays tie these diverse visions together. Most essays include both futuristic scenarios and present initiatives that demonstrate the possibility of such futures. At a time when India faces increasing polarization along parochial, physical and mental boundaries, these essays provide a breath of fresh air and hope in the grounded possibilities for an alternative, decentralized, eco-culturally centred future. The essays range from the dreamy-eyed to the hard-headed, from the provocative to the gently persuasive. This book would hold appeal for a wide range of readers - youth, academics, development professionals, policy makers, government officials, activists, people's movements, media persons, business persons - concerned about the current state of India and the world, and willing to engage critically in the collective search for a better future.

**Abuse of Dominant Position: New Interpretation, New Enforcement Mechanisms?** Mark-Oliver Mackenrodt,Beatriz Conde Gallego,Stefan Enchelmaier,2008-07-25 As part of its review of competition law that started in the late 1990s, the European Commission proposes to revise its

interpretation and application of the Treaty’s prohibition of abuses of dominant positions. Also, it has instigated a debate about the promotion of private enforcement of EC competition law. On the former subject, the Commission published a Discussion Paper in 2005; on the latter, a Green Paper in 2005, followed by a White Paper in 2008. The chapters in this volume critically appraise the Commission’s proposals, including the most recent ones. The authors also highlight the repercussions of the proposed ‘more economic approach’ to abuses of dominant positions on private litigants’ opportunities to bring damages actions in national courts for such abuses.

**Coronary Artery CTA** Claudio Smuclovsky,2018-02-10 The second edition of this important work provides a broad range of cardiac CT angiography (CCTA) cases covering normal anatomy, congenital coronary anomalies, coronary artery disease, percutaneous coronary intervention, postsurgical coronary revascularization, and extra-coronary abnormalities. It is designed to help practicing radiologists, cardiologists, and cardiothoracic surgeons understand the current issues involved with clinical, interventional, and surgical management of coronary artery CTA. Each case consists of detailed CCTA images, a brief history, diagnosis, discussion, and pearls and pitfalls. This updated and expanded edition includes new chapters on principles of cardiac CT, patient preparation, cardiomyopathies, pediatric cardiac CT, cardiac CT in the emergency department, CT-FFR, and reporting cardiac CT.

**Friction Ridge Skin** James F. Cowger,2020-07-24 Here is a complete guide to the collection, classification, and comparison of friction skin prints and the determination of identity and nonidentity. It discusses: the cause and significance of variations in prints; the importance of class characteristics in print; the application of probability in decision making; and photographic techniques and considerations.

**Exploratory Data Analysis with MATLAB** Wendy L. Martinez,Angel R. Martinez,Jeffrey Solka,2017-08-07 Praise for the Second Edition: The authors present an intuitive and easy-to-read book. ... accompanied by many examples, proposed exercises, good references, and comprehensive appendices that initiate the reader unfamiliar with MATLAB. —Adolfo Alvarez Pinto, International Statistical Review Practitioners of EDA who use MATLAB will want a copy of this book. ... The authors have done a great service by bringing together so many EDA routines, but their main accomplishment in this dynamic text is providing the understanding and tools to do EDA. —David A Huckaby, MAA Reviews Exploratory Data Analysis (EDA) is an important part of the data analysis process. The methods presented in this text are ones that should be in the toolkit of every data scientist. As computational sophistication has increased and data sets have grown in size and complexity, EDA has become an even more important process for visualizing and summarizing data before making assumptions to generate hypotheses and models. Exploratory Data Analysis with MATLAB, Third Edition presents EDA methods from a computational perspective and uses numerous examples and applications to show how the methods are used in practice. The authors use MATLAB code, pseudo-code, and algorithm descriptions to illustrate the concepts. The MATLAB code for examples, data sets, and the EDA Toolbox are available for download on the book’s website. New to the Third Edition Random projections and estimating local intrinsic dimensionality Deep learning autoencoders and stochastic neighbor embedding Minimum spanning tree and additional cluster validity indices Kernel density estimation Plots for visualizing data distributions, such as beanplots and violin plots A chapter on visualizing categorical data

**Theories of International Politics and Zombies** Daniel W. Drezner,2022-05-03 How international relations theory can be applied to a zombie invasion What would happen to international politics if the dead rose from the grave and started to eat the living? Daniel Drezner’s groundbreaking book answers the question that other international relations scholars have been too scared to ask. Addressing timely issues with analytical bite, Drezner looks at how well-known theories from international relations might be applied to a war with zombies. Exploring the plots of popular zombie films, songs, and books, Theories of International Politics and Zombies predicts realistic scenarios for the political stage in the face of a zombie threat and considers how valid—or how rotten—such scenarios might be. With worldwide calamity feeling ever closer, this new apocalyptic edition includes updates throughout as well as a new chapter on postcolonial perspectives.

**Computer Security - ESORICS 94** Dieter Gollmann,1994-10-19 This volume constitutes the proceedings of the Third European Symposium on Research in Computer Security, held in Brighton, UK in November 1994. The 26 papers presented in the book in revised versions were carefully selected from a total of 79 submissions; they cover many current aspects of computer security research and advanced applications. The papers are grouped in sections on high security assurance software, key management, authentication, digital payment, distributed systems, access control, databases, and measures.

**Nanostructured Materials for Next-Generation Energy Storage and Conversion** Fan Li,Sajid Bashir,Jingbo Louise Liu,2019-02-01 The energy crisis and pollution have posed significant risks to the environment, transportation, and economy over the last century. Thus, green energy becomes one of the critical global technologies and the use of nanomaterials in these technologies is an important and active research area. This book series presents the progress and opportunities in green energy sustainability. Developments in nanoscaled electrocatalysts, solid oxide and proton exchange membrane fuel cells, lithium ion batteries, and photovoltaic techniques comprise the area of energy storage and conversion. Developments in carbon dioxide (CO2) capture and hydrogen (H2) storage using tunable structured materials are discussed. Design and characterization of new nanoscaled materials with controllable particle size, structure, shape, porosity and band gap to enhance next generation energy systems are also included. The technical topics covered in this series are metal organic frameworks, nanoparticles, nanocomposites, proton exchange membrane fuel cell catalysts, solid oxide fuel cell electrode design, trapping of carbon dioxide, and hydrogen gas storage.
