Libraries, Archives and Museums as Democratic Spaces in a Digital Age Ragnar Audunson, Herbjørn Andresen, Cicilie Fagerlid, Erik Henningsen, Hans-Christoph Hobohm, Henrik Jochumsen, Håkon Larsen, Tonje Vold, 2020-09-07 Libraries, archives and museums have traditionally been a part of the public sphere's infrastructure. They have been so by providing public access to culture and knowledge, by being agents for enlightenment and by being public meeting places in their communities. Digitization and globalization poses new challenges in relation to upholding a sustainable public sphere. Can libraries, archives and museums contribute in meeting these challenges?

Brain-Computer Interfaces Aboul Ella Hassanien, Ahmad Taher Azar, 2014-11-01 The success of a BCI system depends as much on the system itself as on the user's ability to produce distinctive EEG activity. BCI systems can be divided into two groups according to the placement of the electrodes used to detect and measure neurons firing in the brain. These groups are: invasive systems, electrodes are inserted directly into the cortex are used for single cell or multi unit recording, and electrocorticography (EcoG), electrodes are placed on the surface of the cortex (or dura); noninvasive systems, they are placed on the scalp and use electroencephalography (EEG) or magnetoencephalography (MEG) to detect neuron activity. The book is basically divided into three parts. The first part of the book covers the basic concepts and overviews of Brain Computer Interface. The second part describes new theoretical developments of BCI systems. The third part covers views on real applications of BCI systems.

The Rosemary Nelson Inquiry Report Rosemary Nelson Inquiry, 2011 Rosemary Nelson, a solicitor in Lurgan, Northern Ireland, was murdered by a bomb exploding under her car near her home in March 1999. There were claims the police and government ignored a series of warnings about threats against her: concerns about her safety had been raised over a two-year period before she was killed. She had become a hate figure for hardline loyalists - and reportedly some police officers - because of some of the Republican clients she represented. It was claimed she had been threatened by RUC officers as well as loyalist paramilitaries. The Cory Collusion Inquiry (2004, ISBN 9780102927443) investigated the allegations of collusion between British security forces and paramilitaries in her murder, and concluded that there was enough evidence to warrant a full public inquiry. This Inquiry finds no evidence of any act by or within any of the state agencies (Royal Ulster Constabulary, the Northern Ireland Office or the Security Service) which directly facilitated the murder. Some members of the RUC did publicly abuse and assault her in 1997, and make abusive/threatening remarks about her to her clients, which became publicly known. Combined with intelligence leaks these had the effect of legitimising her as a target. There were omissions by the RUC and NIO which rendered her more at risk and more vulnerable. These omissions meant the state failed to take reasonable and proportionate steps to safeguard the life of Rosemary Nelson. The Inquiry finds no evidence of obstruction into the murder investigation, which was carried out with due diligence.

Custodians of the Internet Tarleton Gillespie, 2018-06-26 A revealing and gripping investigation into how social media platforms police what we post online—and the large societal impact of these decisions Most users want their Twitter feed, Facebook page, and YouTube comments to be free of harassment and porn. Whether faced with “fake news” or livestreamed violence, “content moderators”—who censor or promote user†posted content—have never been more important. This is especially true when the tools that social media platforms use to curb trolling, ban hate speech, and censor pornography can also silence the speech you need to hear. In this revealing and nuanced exploration, award†winning sociologist and cultural observer Tarleton Gillespie provides an overview of current social media practices and explains the underlying rationales for how, when, and why these policies are enforced. In doing so, Gillespie highlights that content moderation receives too little public scrutiny even as it shapes social norms and creates consequences for public discourse, cultural production, and the fabric of society. Based on interviews with content moderators, creators, and consumers, this accessible, timely book is a must†read for anyone who's ever clicked “like” or “retweet.”

Astrobiology Julian Chela-Flores, Guillermo A. Lemarchand, John Oró, 2012-12-06 The general topic of this book concerns the origin, evolution, distribution, and destiny of life in the Universe. It discusses the transition from inert matter to cellular life and its evolution to fully developed intelligent beings, and also the possibility of life occurring elsewhere, particularly in other environments in our own and other solar systems. The theoretical framework of Astrobiology may be probed with a forthcoming series of space missions, which at the time of writing are being planned for the next 10 to 15 years. Advanced extraterrestrial life can also be probed by means of radioastronomy in the well-established project of search for extraterrestrial intelligence. Astrobiology pays special attention to the robust growth in our capacity to search for microorganisms, as well as signals of extraterrestrial life, with recent significant technological progress in planetary science and radioastronomy. The progress of the main space agencies is highlighted. Audience: This volume is aimed at advanced undergraduate and graduate students, as well as researchers in the many areas of basic, earth, and life sciences that contribute to the study of chemical evolution and the origin of life.

Crisis Communications Kathleen Fearn-Banks,2002 A casebook approach to studying crisis communications means learning from the actions of those who have experienced crises. What did they expect? What actually happened? Were they prepared? What were their strategies? What were their challenges, pressures, and problems? Were the news media adversarial or supportive? If they had to do it again, what would they do differently? These and other questions are answered in the case studies of this second edition. Presenting organizational and individual problems that may become crises and the communication responses to these situations, this revision of Fearn-Banks' very successful text: * presents crisis communication theory, including a critique of the communications of White Star Lines after its Titanic sank on its maiden voyage; * describes ways of determining the most likely and most damaging crises that may strike an organization; * centers on causes of crisis--rumor, gotcha television news and the non-expert expert, and crises caused by the news media; * gets into the 21st century and cyberspace-caused crises, including mini-cases of rogue Web sites and e-mail rumors; * explains how to communicate with the news media, lawyers, internal publics or audiences, and external publics; and * includes narrated case studies illustrating how spokespersons and managers used communication in several kinds of crises. The text is supplemented by a workbook, enabling students to test their knowledge and develop their skills. Written as a primer for crisis communications, public relations, and communications management, Crisis Communications serves as an essential resource in the practice of public relations and corporate communications.
