Nursing Care in Pediatric Respiratory Disease Concettina Tolomeo, 2012-01-03

Pediatric respiratory disorders are responsible for a number of acute and chronic health conditions and are a leading cause of pediatric emergency room visits and hospitalizations. More than ever, nurses and nurse practitioners must have an understanding of the anatomy, pathophysiology, diagnosis and state of the art treatments in pediatric respiratory disease as they are often the first to come in contact with and recognize respiratory problems in children. *Nursing Care in Pediatric Respiratory Disease* seeks to provide both nurses and nurse practitioners with this information in order to aid them in the diagnosis and treatment of children suffering from acute and chronic respiratory disorders. *Nursing Care in Pediatric Respiratory Disease* opens with an overview of the anatomy and physiology of the respiratory system, best practices for assessing respiratory symptoms in children, and common respiratory therapies and treatment methods. It then proceeds through an examination of varying acute and chronic upper and lower respiratory diseases spanning from asthma and cystic fibrosis to vocal cord paralysis and sinusitis in both hospital and ambulatory settings. *Nursing Care in Pediatric Respiratory Disease* provides nurses and other health care providers with a comprehensive and practical resource which allows them to collaborate and advocate more effectively, as well as educate both the family and child in

management of respiratory disorders.

Individual Preparedness and Response to Chemical, Radiological, Nuclear, and Biological Terrorist Attacks Lynn E. Davis,Arthur Melmed,Richard Krop,2003-09-05 Individual preparedness is an important element of our nation's strategy for homeland security. This report adopts a scenario-driven approach that provides a rigorous way to identify actions-linked specifically to terrorist attacks-individuals can take to protect their health and safety. The result is an individual's strategy across four types of terrorist attacks-chemical, radiological, nuclear, and biological-consisting of overarching goals and simple and directive response and preparatory actions.

The actions are appropriate regardless of likelihood of an attack, scale of attack, or government alert level; designed to be sensitive to potential variations; and defined in terms of simple rules that should be easy for individuals to adopt.
