Gun Control Randolph C. Hite,2000-08 Provides info. on a wide variety of topics related to the permanent provisions (phase II) of the Brady Handgun Violence Prevention Act. On Nov. 30, 1998, the Brady Act's permanent provisions went into effect with implementation of the Nat. Instant Criminal Background Check System (NICS). Managed by the FBI, this computerized system is used to make presale background checks for purchases from Federal firearms licensees of all firearms, not just handguns. This report focuses on background checks conducted by the FBI's NICS Office. Presents info. on 4 topics: statistics on background checks, NICS operations; denials, & appeals; enforcement actions; & pawnshop issues.

Managing Cover Crops Profitably (3rd Ed.) Andy Clark,2008-07 Cover crops slow erosion, improve soil, smother weeds, enhance nutrient and moisture availability, help control many pests and bring a host of other benefits to your farm. At the same time, they can reduce costs, increase profits and even create new sources of income. You'll reap dividends on your cover crop investments for years, since their benefits accumulate over the long term. This book will help you find which ones are right for you. Captures farmer and other research results from the past ten years. The authors verified the info. from the 2nd ed., added new results and updated farmer profiles and research data, and added 2 chap. Includes maps and charts, detailed narratives about individual cover crop species, and chap. about aspects of cover cropping.

Psychology of Space Exploration: Contemporary Research in Historical Perspective Douglas A. Vakoch,National Aeronautics and Space Administration,2012-01-27 Through essays on topics including survival in extreme environments and the multicultural dimensions of exploration, readers will gain an understanding of the psychological challenges that have faced the space program since its earliest days. An engaging read for those interested in space, history, and psychology alike, this is a highly relevant read as we stand poised on the edge of a new era of spaceflight. Each essay also explicitly addresses the history of the psychology of space exploration.

Protection from Fire and Thieves George Hayter Chubb,2019-12-09 Protection from Fire and Thieves is a treatise on the different technologies of the 19th century designed to keep out fire and the robber from accessing valuables. It gives in vivid description the construction of locks, safes, strong-rooms, and fireproof buildings; burglary, and the means of preventing it. The book also spans the topic of fire, its detection, prevention, and extinction. Author George Hayter Chubb draws from his experience as a designer of locks and his ownership of several patents to look at the emerging trends of his day, giving what he sees as the solutions to the increasing sophistication of the methods employed by thieves, for those organisations that have high security requirements.

A Dictionary of the Space Age Paul Dickson,2009-04-14 The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement. As television news anchors, radio hosts, and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens, words that belonged to the worlds of science, aviation, and science fiction suddenly became part of the colloquial language. What's more, NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible. To translate this peculiar vocabulary, Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names, words, and phrases of the Space Age. This dictionary captures a broader foundation for the language of the Space Age based on the historical principles employed by the Oxford English Dictionary and Webster's Third New International Dictionary. Word histories for major terms are detailed in a conversational tone, and technical terms are deciphered for the interested student and lay reader. This is a must-own reference for space history buffs. --Book Jacket.

Archaeology Anthropology and Interstellar Communication Douglas A. Douglas A. Vakoch,2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

Abundant Harvests John Dietler,Heather Gibson,James M. Potter,2015 This book is no longer in print, but is available for download as a free e-book through SWCA, Inc. Mission San Gabriel Arcángel was known as the Pride of the Missions due to its legendary agricultural productivity and its prominence in Southern California as a center of commerce and social interaction during the mission period (1771-1834). This volume, SWCA Anthropological Research Paper No. 11, reports on the first archaeological data recovery undertaken at the mission. Working within the mission's garden area, the study revealed more than 300,000 artifacts and 45 archaeological features, including a large granary, a reservoir complex, and one of the first industrial properties on the West Coast: Chapman's Mill and Millrace. Using archaeological results to critically examine historical narratives, the project examined the economic and social organization of the mission through detailed analyses of the public architecture and everyday materials left behind by Native American residents in the productive heart of the community, including animal bones, plant remains, ceramics, and tools. These studies revealed a dynamic and resilient native population that, despite clear hardships, was well-supplied with domesticated meat and locally gathered plant foods. The architectural remains clearly demonstrate the stepwise process through which a European worldview was molded to the unfamiliar California landscape, where self-taught engineers developed techniques of harnessing water that enabled the population explosion that came to characterize the Los Angeles Basin in succeeding decades. Lavishly illustrated and richly detailed, the volume is a resource for archaeologists, historians, and mission scholars alike.

Transportation Decision Making Kumares C. Sinha,Samuel Labi,2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decisionmaking. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is

anideal coursebook for the subject of transportation systems analysisand evaluation.
