Preventive Justice Andrew Ashworth,Lucia Zedner,2014-03-27 This book arises from a three-year study of Preventive Justice directed by Professor Andrew Ashworth and Professor Lucia Zedner at the University of Oxford. The study seeks to develop an account of the principles and values that should guide and limit the state's use of preventive techniques that involve coercion against the individual. States today are increasingly using criminal law or criminal law-like tools to try to prevent or reduce the risk of anticipated future harm. Such measures include criminalizing conduct at an early stage in order to allow authorities to intervene; incapacitating suspected future wrongdoers; and imposing extended sentences or indefinite on past wrongdoers on the basis of their predicted future conduct - all in the name of public protection and security. The chief justification for the state's use of coercion is protecting the public from harm. Although the rationales and justifications of state punishment have been explored extensively, the scope, limits and principles of preventive justice have attracted little doctrinal or conceptual analysis. This book re-assesses the foundations for the range of coercive measures that states now take in the name of prevention and public protection, focussing particularly on coercive measures involving deprivation of liberty. It examines whether these measures are justified, whether they distort the proper boundaries between criminal and civil law, or whether they signal a larger change in the architecture of security. In so doing, it sets out to establish a framework for what we call 'Preventive Justice'.

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Beyond Boundaries Miguel Nicolelis, 2011-03-15 A pioneering neuroscientist shows how the long-sought merger of brains with machines is about to become a paradigm-shifting reality Imagine living in a world where people use their computers, drive their cars, and communicate with one another simply by thinking. In this stunning and inspiring work, Duke University neuroscientist Miguel Nicolelis shares his revolutionary insights into how the brain creates thought and the human sense of self—and how this might be augmented by machines, so that the entire universe will be within our reach. Beyond Boundaries draws on Nicolelis's ground-breaking research with monkeys that he taught to control the movements of a robot located halfway around the globe by using brain signals alone. Nicolelis's work with primates has uncovered a new method for capturing brain function—by recording rich neuronal symphonies rather than the activity of single neurons. His lab is now paving the way for a new treatment for Parkinson's, silk-thin exoskeletons to grant mobility to the paralyzed, and breathtaking leaps in space exploration, global communication, manufacturing, and more. Beyond Boundaries promises to reshape our concept of the technological future, to a world filled with promise and hope.

The Secret Life of Movies Jason Horsley,2009-10-21 Film blurs the line between myth and reality better than any other artistic medium, one could argue. Using movies to explore the unconscious realms of society in order to reach a better understanding of what drives it, this book examines filmmakers and films that center on schizophrenic themes of alienation, paranoia, breakdown, fantasy, dreams, dementia and violence, and that address—as entertainment—the schizophrenic experience. The loss of individual identity as reflected in the films is investigated, as well as the shamanic potential inherent in the broader theme.
