## **Introduction to Permanent Plug and Abandonment of Wells**

Mahmoud Khalifeh, Arild Saasen, 2020-01-27 This open access book offers a timely guide to challenges and current practices to permanently plug and abandon hydrocarbon wells. With a focus on offshore North Sea, it analyzes the process of plug and abandonment of hydrocarbon wells through the establishment of permanent well barriers. It provides the reader with extensive knowledge on the type of barriers, their functioning and verification. It then discusses plug and abandonment methodologies, analyzing different types of permanent plugging materials. Last, it describes some tests for verifying the integrity and functionality of installed permanent barriers. The book offers a comprehensive reference guide to well plugging and abandonment (P&A) and well integrity testing. The book also presents new technologies that have been proposed to be used in plugging and abandoning of wells, which might be game-changing technologies, but they are still in laboratory or testing level. Given its scope, it addresses students and researchers in both academia and industry. It also provides information for engineers who work in petroleum industry and should be familiarized with P&A of hydrocarbon wells to reduce the time of P&A by considering it during well planning and construction.

Chinese Military Reform in the Age of Xi Jinping: Drivers, Challenges, and Implications Joel Wuthnow, Phillip Charles Saunders, China's People's Liberation Army (PLA) has embarked on its most wide-ranging and ambitious restructuring since 1949, including major changes to most of its key organizations. The restructuring reflects the desire to strengthen PLA joint operation capabilities- on land, sea, in

the air, and in the space and cyber domains. The reforms could result in a more adept joint warfighting force, though the PLA will continue to face a number of key hurdles to effective joint operations. Several potential actions would indicate that the PLA is overcoming obstacles to a stronger joint operations capability. The reforms are also intended to increase Chairman Xi Jinping's control over the PLA and to reinvigorate Chinese Communist Party (CCP) organs within the military. Xi Jinping's ability to push through reforms indicates that he has more authority over the PLA than his recent predecessors. The restructuring could create new opportunities for U.S.-China military contacts.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple

examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

### **Transatlantic Security from the Sahel to the Horn of Africa**

Riccardo Alcaro, Nicoletta Pirozzi, 2014-05-21 As the so-called Arab Spring has slid into political uncertainty, lingering insecurity and civil conflict, European and American initial enthusiasm for anti-authoritarian protests has given way to growing concerns that revolutionary turmoil in North Africa may in fact have exposed the West to new risks. Critical in cementing this conviction has been the realisation that developments originated from Arab Mediterranean countries and spread to the Sahel have now such a potential to affect Western security and interests as to warrant even military intervention, as France's operation in Mali attests. EU and US involvement in fighting piracy off the Horn of Africa had already laid bare the nexus between their security interests and protracted crises in sub-Saharan Africa. But the new centrality acquired by the Sahel

after the Arab uprisings – particularly after Libya’s civil war – has elevated this nexus to a new, larger dimension. The centre of gravity of Europe’s security may be swinging to Africa, encompassing a wide portion of the continental landmass extending south of Mediterranean coastal states. The recrudescence of the terrorist threat from Mali to Algeria might pave the way to an American pivot to Africa, thus requiring fresh thinking on how the European Union and the United States can better collaborate with each other and with relevant regional actors.

*Achieving the Paris Climate Agreement Goals* Sven

Teske, 2019-02-01 This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and

feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.

**Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary** Truth and Reconciliation Commission of Canada,2015-07-22 This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed

in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to emotional, psychological and often physical abuse. In this setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide. The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions, and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology for these events to true reconciliation that can be embraced by all Canadians.

**Operation Iraqi Freedom** Catherine Dale, 2011-04 Operation Iraqi Freedom (OIF), the U.S.-led coalition military operation in Iraq, was launched on March 20, 2003, with the goal of removing Saddam Hussein's regime and destroying its ability to use weapons of mass destruction. The focus of OIF has shifted from regime removal to helping the Gov't. of Iraq improve security, establish a system of governance, and foster economic development. This report addresses these policy issues: Identifying how U.S. national interests and strategic objectives, in Iraq and the region, should guide further U.S.

engagement; Monitoring and evaluating the impact of the changes in the U.S. presence and role in Iraq; and Laying the groundwork for a traditional bilateral relationship. Map. A print on demand report.

United Nations E-Government Survey 2014 United Nations Publications, 2014-09-30 The UN E-Government Survey 2008: From E-Government to Connected Governance assesses the e-government readiness of the 192 Member States of the UN according to a quantitative composite index of e-readiness based on website assessment, telecommunication infrastructure, and human resource endowment. ICTs can help reinvent government in such a way that existing institutional arrangements can be restructured and new innovative arrangements can flourish, paving the way for a transformed government. The focus of the report this year, in Part 2, is e-government initiatives directed at improving operational efficiency through the integration of back-office functions. Whilst such initiatives, if successful, will deliver benefits to citizens, the primary purpose is to improve the effectiveness of government and governmental agencies. Models of back-office integration, irrespective of the delivery mode, fall into three broad categories: single function integration, cross functional integration, and back-office to front-office integration. The level of complexity, expressed in terms of the number of functions within the scope and number of organizations involved, is the primary factor influencing a successful outcome - with a tendency amongst the more ambitious projects to fail to deliver the full anticipated benefits. The key variables involved in the delivery of back-office integration are the people, processes and technology required. Whilst the technology is increasingly resilient and 'fit for purpose', the evidence indicates that success or failure is less a technological issue and more a people issue - in particular, the

ability to change public service cultures and motivate public sector workers to new ways of working, address trade union concerns, and provide adequately skilled and competent management
