The Criminal Prosecution and Capital Punishment of Animals Edward Payson Evans,1906

A Collection of Familiar Quotations John Bartlett,1856

<u>Carcass management guidelines</u> Miller, L.P., Miknis, R.A. and Flory, G.A..,2020-12-28 Animal disease outbreaks pose many challenges for response authorities that can impact livelihoods, food security, and the environment. Proper disposal of animal carcasses that die or are culled during the outbreak is a key component of a successful response to a disease outbreak because it helps prevent or mitigate the further spread of pathogens and in case of zoonotic disease, to further protect human health. The practical guidelines presented hereby provide carcass and related waste management considerations and recommended procedures for use by Veterinary Services and other official response authorities when developing animal disease outbreak containment and eradication plans. The guidelines apply to animal disease outbreaks of varying sizes, whether the outbreak is isolated to a single premise or spans a region to cover numerous premises. However, they are focused on small to medium-sized holdings in countries without access to engineered landfills, rendering plants or controlled incinerators. The guidelines are written in the spirit of "keep it simple and doable", considering the limited human and financial resources that many countries are constrained with. Its presentation and practical approach ensure that countries will find it very useful for their emergency operation procedures toolbox. Further, the guidelines directly contribute to the one-health approach by protecting the health of animals, humans, and the environment.

SAP Backup using Tivoli Storage Manager Budi Darmawan,Miroslav Dvorak,Dhruv Harnal,Gerson Makino,Markus Molnar,Rennad Murugan,Marcos Silva,IBM Redbooks,2013-04-26 In this IBM® Redbooks® publication, we give an overview of different data management topics related to a typical SAP® data center. The intrinsic functionality of SAP is not designed to completely handle all the tasks of a data center by itself, but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task We explain SAP basic concepts and the issues with SAP data management. We introduce Tivoli® Storage Manager and all of its products that are related to SAP data management. We provide some comparison between database backup and recovery tools. Finally, we discuss data archiving using IBM DB2® CommonStore for SAP, and discuss high availability requirements and disaster recovery considerations. The second part of this book discusses a practical implementation of SAP backup and recovery with Tivoli Storage Manager. We implement this setup on two separate SAP systems: one running DB2 and the other running Oracle® database. We also implement LAN-free backup and FlashCopy® scenarios. In the sample implementation section, we show many different tasks, such as backup and restore, database recovery, backup monitoring, and tuning. We also cover some advanced backup/availability considerations, such as split mirror

backup and standby databases. This book helps individuals that operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using the IBM Tivoli Storage Management product family.

<u>English Embroidered Bookbindings</u> Cyril Davenport,2016-08-01 New series of 'Books about Books,' exclusively English in its aims, may seem to savour of the patriotism which, in matters of art and historical research, is, with reason enough, often scoffed at as a treacherous guide. No doubt in these pleasant studies patriotism acts as a magnifying-glass, making us unduly exaggerate details. On the other hand, it encourages us to try to discover them, and just at present this encouragement seems to be needed. There are so many gaps in our knowledge of the history of books in England that we can hardly claim that our own dwelling is set in order, and yet many of our bookmen appear more inclined to re-decorate their neighbours' houses than to do work that still urgently needs to be done at home. The reasons for this transference of energy are not far to seek. It is quite easy to be struck with the inferiority of English books and their accessories, such as bindings and illustrations, to those produced on the Continent. To compare the books printed by Caxton with the best work of his German or Italian contemporaries, to compare the books bound for Henry, Prince of Wales, with those bound for the Kings of France, to try to find even a dozen English books printed before 1640 with woodcutsx (not imported from abroad) of any real artistic merit—if any one is anxious to reinforce his national modesty, here are three very efficacious methods of doing it! On the other hand, English book-collectors have always been cosmopolitan in their tastes, and without leaving England it is possible to study to some effect, in public or private libraries, the finest books of almost any foreign country. It is small wonder, therefore, that our bookmen, when they have been minded to write on
