Genius Foods Max Lugavere,Paul Grewal, M.D.,2018-03-20 New York Times Bestseller Discover the critical link between your brain and the food you eat and change the way your brain ages, in this cutting-edge, practical guide to eliminating brain fog, optimizing brain health, and achieving peak mental performance from media personality and leading voice in health Max Lugavere. After his mother was diagnosed with a mysterious form of dementia, Max Lugavere put his successful media career on hold to learn everything he could about brain health and performance. For the better half of a decade, he consumed the most up-to-date scientific research, talked to dozens of leading scientists and clinicians around the world, and visited the country's best neurology departments—all in the hopes of understanding his mother's condition. Now, in *Genius Foods*, Lugavere presents a comprehensive guide to brain optimization. He uncovers the stunning link between our dietary and lifestyle choices and our brain functions, revealing how the foods you eat directly affect your ability to focus, learn, remember, create, analyze new ideas, and maintain a balanced mood. Weaving together pioneering research on dementia prevention, cognitive optimization, and nutritional psychiatry, Lugavere distills groundbreaking science into actionable lifestyle changes. He shares invaluable insights into how to improve your brain power, including the nutrients that can boost your memory and improve mental clarity (and where to find them); the foods and tactics that can energize and rejuvenate your brain, no matter your age; a brain-boosting fat-loss method so powerful it has been called "biochemical liposuction"; and the foods that can improve your happiness, both now and for the long term. With *Genius Foods*, Lugavere offers a cutting-edge yet practical road map to eliminating brain fog and optimizing the brain's health and performance today—and decades into the future.

The Boy Scouts Book of Campfire Stories Franklin K. Mathiews,2016-08-26 The campfire for ages has been the place of council and friendship and story-telling. The mystic glow of the fire quickens the mind, warms the heart, awakens memories of happy, glowing tales that fairly leap to the lips. The Boy Scouts of America has incorporated the campfire in its program for council and friendship and story-telling. In one volume, the Boy Scouts Book of Campfire Stories makes available to scoutmasters and other leaders a goodly number of stories worthy of their attention, and when well told likely to arrest and hold the interest of boys in their early teens, when stirs the blood—to bubble in the veins. At this time, when the boy is growing so rapidly in brain and body, he can have no better teacher than some mighty woodsman. Now should be presented to him stirring stories of the adventurous lives of men who live in and love the out-of-doors. Says Professor George Walter Fiske: Let him emulate savage woodcraft; the woodsman's keen, practiced vision; his steadiness of nerve; his contempt for pain, hardship and the weather; his power of endurance, his observation and heightened senses; his delight in out-of-door sports and joys and unfettered happiness with untroubled sleep under the stars; his calmness, self-control, emotional steadiness; his utter faithfulness in friendships; his honesty, his personal bravery. The Editor likes to think that quite a few of the stories found in the Boy Scouts Book of Campfire[vi] Stories present companions for the mind of this hardy sort, and hopes, whether boys read or are told these stories, they will prove to be such as exalt and inspire while they thrill and entertain.

Defaming the Dead Don Herzog,2017-03-28 Do the dead have rights? In a persuasive argument, Don Herzog makes the case that the deceased's interests should be protected This is a delightfully deceptive works that start out with a simple, seemingly arcane question—can you libel or slander the dead?—and develops it outward, tackling larger and larger implications, until it ends up straddling the borders between law, culture, philosophy, and the meaning of life. A full answer to this question requires legal scholar Don Herzog to consider what tort law is actually designed to protect, what differences death makes—and what differences it doesn't—and why we value what we value. Herzog is one of those rare scholarly writers who can make the most abstract argument compelling and entertaining.

In the Strange South Seas Beatrice Grimshaw,1907 Beatrice Grimshaw was born in Ireland. She was an adventurer at heart since childhood and an independent soul who longed to travel to far away places. Until 1903 she had been a freelance journalist, a tour organiser and an emigration promoter but her dream was to go to the South Pacific islands. Embarking from San Francisco in 1904, she sailed first to Tahiti, followed by a four month voyage through the South Pacific and an additional two months on the island of Niue. During this trip, she visited Tonga, Samoa, Fiji, Rarotonga and some of the Cook islands. She returned to London and published *In the Strange South Seas* in 1907. In the book, Grimshaw not only recounts her adventures but she also describes the customs and lifestyles of the native populations as well as giving an exhaustive picture of the region's fauna and wildlife. The book also contain accounts of cannibalism, head-hunting, poisoning and tribal magic.

The Paleoanthropology and Archaeology of Big-Game Hunting John D. Speth,2010-09-08 Since its inception, paleoanthropology has been closely wedded to the idea that big-game hunting by our hominin ancestors arose, first and foremost, as a means for acquiring energy and vital nutrients. This assumption has rarely been questioned, and seems intuitively obvious—meat is a nutrient-rich food with the ideal array of amino acids, and big animals provide meat in large, convenient packages. Through

new research, the author of this volume provides a strong argument that the primary goals of big-game hunting were actually social and political—increasing hunter’s prestige and standing—and that the nutritional component was just an added bonus. Through a comprehensive, interdisciplinary research approach, the author examines the historical and current perceptions of protein as an important nutrient source, the biological impact of a high-protein diet and the evidence of this in the archaeological record, and provides a compelling reexamination of this long-held conclusion. This volume will be of interest to researchers in Archaeology, Evolutionary Biology, and Paleoanthropology, particularly those studying diet and nutrition.

Cognitive Gadgets Cecilia Heyes,2018-04-16 How did human minds become so different from those of other animals? What accounts for our capacity to understand the way the physical world works, to think ourselves into the minds of others, to gossip, read, tell stories about the past, and imagine the future? These questions are not new: they have been debated by philosophers, psychologists, anthropologists, evolutionists, and neurobiologists over the course of centuries. One explanation widely accepted today is that humans have special cognitive instincts. Unlike other living animal species, we are born with complicated mechanisms for reasoning about causation, reading the minds of others, copying behaviors, and using language. Cecilia Heyes agrees that adult humans have impressive pieces of cognitive equipment. In her framing, however, these cognitive gadgets are not instincts programmed in the genes but are constructed in the course of childhood through social interaction. Cognitive gadgets are products of cultural evolution, rather than genetic evolution. At birth, the minds of human babies are only subtly different from the minds of newborn chimpanzees. We are friendlier, our attention is drawn to different things, and we have a capacity to learn and remember that outstrips the abilities of newborn chimpanzees. Yet when these subtle differences are exposed to culture-soaked human environments, they have enormous effects. They enable us to upload distinctively human ways of thinking from the social world around us. As Cognitive Gadgets makes clear, from birth our malleable human minds can learn through culture not only what to think but how to think it.

On Art and Science Shyam Wuppuluri,Dali Wu,2019-11-02 Einstein once remarked After a certain high level of technical skill is achieved, science and art tend to coalesce in aesthetics, plasticity, and form. The greatest scientists are always artists as well. In this volume, some of the world’s leading thinkers come together to expound on the interrelations between sciences and arts. While one can segregate art and place it outside the scientific realm, it is, nevertheless, inextricably linked to our essential cognitive/emotional/perceptual modalities and abilities, and therefore lies alongside and in close contact with the method of science and philosophy. What inspiration can scientists draw from art and how can scientific spirit foster our understanding and creation of aesthetic works? How are art and science grounded in our cognition? What role does perception play in science and art? Are criteria for beauty in art and science the same? How does evolution shape our understanding of art? How do science, art and scientifico-artistic frameworks shape society as a whole and help us address its pressing issues? The epistemological and ontological aspects haunt artists, philosophers and scientists alike. The essays in this volume address these manifold questions while also elucidating the pragmatic role they play in our daily life.

Strategic Communication for Sustainable Organizations Myria Allen,2015-07-16 This is a seminal book for anyone who wants to understand, shape or study the communication surrounding sustainability in their interactions with colleagues, employees, supply chain partners and external stakeholders. It develops essential insights on the basis of an extensive review of relevant theories and research drawn from multiple disciplines. Interview data gathered from organization members who are currently communicating about sustainability in their cities, universities, nongovernmental organizations, small businesses and large for-profit organizations provide valuable insights from a practitioner’s perspective. The interviewees represent organizations such as the Portland Trailblazers, Tyson Foods, the City and County of Denver and the Natural Resources Defense Council. Theory, research and interview comments combine in a reader-friendly way to provide practical insights and stimulate future research.
