Europe's Evolving Deterrence Discourse Anna Péczeli,Amelia

Morgan,2021-02-15 For decades, nuclear deterrence has been at the heart of the transatlantic relationship between the United States and Europe. It underpins European security, and the North Atlantic Treaty Organization (NATO) continuously commits to remaining a nuclear alliance as long as nuclear weapons exist. And yet, with a few important exceptions, transatlantic dialogue on nuclear issues largely declined with the end of the Cold War, particularly among non-governmental experts--and has only started to be revived in recent years. Rebuilding deterrence dialogue in response to a shifting strategic landscape is an important step in strengthening not only the transatlantic partnership, but also European security. This paper collection explores the evolving deterrence dialogue in Europe and identifies ways to inject new momentum into that dialogue. Renewed attention on the issue is particularly timely as European actors confront an adventurist Russia, rising China, and new technologies that will impact nuclear deterrence, U.S.-Europe relations, and institutions such as the Nuclear Non-Proliferation Treaty.

Libraries, Archives and Museums as Democratic Spaces in a Digital Age

Ragnar Audunson,Herbjørn Andresen,Cicilie Fagerlid,Erik Henningsen,Hans-Christoph Hobohm,Henrik Jochumsen,Håkon Larsen,Tonje Vold,2020-09-07

Libraries, archives and museums have traditionally been a part of the public

sphere's infrastructure. They have been so by providing public access to culture and knowledge, by being agents for enlightenment and by being public meeting places in their communities. Digitization and globalization poses new challenges in relation to upholding a sustainable public sphere. Can libraries, archives and museums contribute in meeting these challenges?

Future Forsaken Zama Coursen-Neff, 2004 Hundreds of thousands of children in India are living with HIV/AIDS. Many more children are otherwise seriously affected by India's burgeoning epidemic-when they are forced to withdraw from school to care for sick parents, are forced to work to replace their parents' income, or are orphaned (losing one or both parents to AIDS).

High Efficiency Video Coding (HEVC) Vivienne Sze, Madhukar Budagavi, Gary J. Sullivan, 2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable

color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

Cybersecurity Framework Manufacturing Profile National Institute of

Standards, 2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers: * A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system * An evaluation of their ability to operate the control

environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology. Social Robots: Technological, Societal and Ethical Aspects of Human-Robot Interaction Oliver Korn, 2019-07-01 Social robots not only work with humans in collaborative workspaces – we meet them in shopping malls and even more personal settings like health and care. Does this imply they should become more human, able to interpret and adequately respond to human emotions? Do we want them to help elderly people? Do we want them to support us when we are old ourselves? Do we want them to just clean and keep things orderly – or would we accept them helping us to go to the toilet, or even feed us if we suffer from Parkinson's disease? The answers to these questions differ from

person to person. They depend on cultural background, personal experiences – but probably most of all on the robot in question. This book covers the phenomenon of social robots from the historic roots to today's best practices and future perspectives. To achieve this, we used a hands-on, interdisciplinary approach, incorporating findings from computer scientists, engineers, designers, psychologists, doctors, nurses, historians and many more. The book also covers a vast spectrum of applications, from collaborative industrial work over education to sales. Especially for developments with a high societal impact like robots in health and care settings, the authors discuss not only technology, design and usage but also ethical aspects. Thus this book creates both a compendium and a guideline, helping to navigate the design space for future developments in social robotics.

Japanese Encephalitis and West Nile Viruses John Mackenzie,A.D.T. Barrett,V. Deubel,2012-12-06 Japanese encephalitis and West Nile viruses are members of the Japanese encephalitis serological group of the genus Flavivirus and therefore closely related genetically and antigenically. They share a number of properties, including the use of birds as their major wildlife maintenance host and Culicine mosquitoes for transmission, and they are both associated with severe human disease, as well as fatal infections in horses. The emergence of these two viruses, and their well-established propensity to colonise new areas, make it timely to re-examine their ecology,

biology, molecular structure, replication and epidemiology, and these therefore provide the focus of this volume.

Humanitarian Diplomacy Larry Minear, Hazel Smith, 2007 Humanitarian professionals are on the front lines of today's internal armed conflicts, working with politicians and diplomats in countries wracked by violence, in capitals of donor governments that underwrite humanitarian work, as well as within the United Nations Security Council and providing information to the media. This publication sets out a compendium of essays written by 14 senior humanitarian practitioners who led humanitarian operations in settings as diverse as the Balkans and Nepal, Somalia and East Timor, and across a time frame from the 1970s in Cambodia and 1980s in Lebanon to more recent engagement in Colombia and Iraq.

What a Waste 2.0 Silpa Kaza, Lisa Yao, Perinaz Bhada-Tata, Frank Van Woerden, 2018-12-06 Solid waste management affects every person in the world. By 2050, the world is expected to increase waste generation by 70 percent, from 2.01 billion tonnes of waste in 2016 to 3.40 billion tonnes of waste annually. Individuals and governments make decisions about consumption and waste management that affect the daily health, productivity, and cleanliness of communities. Poorly managed waste is contaminating the world's oceans, clogging drains and causing flooding, transmitting diseases, increasing respiratory problems, harming animals that consume waste unknowingly, and affecting economic development. Unmanaged and improperly managed waste from decades of economic growth requires urgent action at all levels of society. **What a Waste 2.0: A Global Snapshot of Solid Waste Management to 2050** aggregates extensive solid waste data at the national and urban levels. It estimates and projects waste generation to 2030 and 2050. Beyond the core data metrics from waste generation to disposal, the report provides information on waste management costs, revenues, and tariffs; special wastes; regulations; public communication; administrative and operational models; and the informal sector. Solid waste management accounts for approximately 20 percent of municipal budgets in low-income countries and 10 percent of municipal budgets in middle-income countries, on average. Waste management is often under the jurisdiction of local authorities facing competing priorities and limited resources and capacities in planning, contract management, and

operational monitoring. These factors make sustainable waste management a complicated proposition; most low- and middle-income countries, and their respective cities, are struggling to address these challenges. Waste management data are critical to creating policy and planning for local contexts. Understanding how much waste is generated—especially with rapid urbanization and population growth—as well as the types of waste generated helps local governments to select appropriate management methods and plan for future demand. It allows governments to design a system with a suitable number of vehicles, establish efficient routes, set targets for diversion of waste, track progress, and adapt as consumption patterns change. With accurate data, governments can realistically allocate resources, assess relevant technologies, and consider strategic partners for service provision, such as the private sector or nongovernmental organizations. What a Waste 2.0: A Global Snapshot of Solid Waste Management to 2050 provides the most up-to-date information available to empower citizens and governments around the world to effectively address the pressing global crisis of waste. Additional information is available at <http://www.worldbank.org/what-a-waste>.
