The Making of an Economic Superpower Yi Wen,2016-05-13 The rise of China is no doubt one of the most important events in world economic history since the Industrial Revolution. Mainstream economics, especially the institutional theory of economic development based on a dichotomy of extractive vs. inclusive political institutions, is highly inadequate in explaining China's rise. This book argues that only a radical reinterpretation of the history of the Industrial Revolution and the rise of the West (as incorrectly portrayed by the institutional theory) can fully explain China's growth miracle and why the determined rise of China is unstoppable despite its current backward financial system and political institutions. Conversely, China's spectacular and rapid transformation from an impoverished agrarian society to a formidable industrial superpower sheds considerable light on the fundamental shortcomings of the institutional theory and mainstream blackboard economic models, and provides more-accurate reevaluations of historical episodes such as Africa's

enduring poverty trap despite radical political and economic reforms, Latin America's lost decades and frequent debt crises, 19th century Europe's great escape from the Malthusian trap, and the Industrial Revolution itself.

Power Kills R. J. Rummel, 2017-07-12 This volume, newly published in paperback, is part of a comprehensive effort by R. J. Rummel to understand and place in historical perspective the entire subject of genocide and mass murder, or what he calls democide. It is the fifth in a series of volumes in which he offers a detailed analysis of the 120,000,000 people killed as a result of government action or direct intervention. In *Power Kills*, Rummel offers a realistic and practical solution to war, democide, and other collective violence. As he states it, The solution...is to foster democratic freedom and to democratize coercive power and force. That is, mass killing and mass murder carried out by government is a result of indiscriminate, irresponsible Power at the center. Rummel observes that well-established democracies do not make war on and rarely commit lesser violence against each other. The more democratic two nations are, the less likely is war or smaller-scale violence

between them. The more democratic a nation is, the less severe its overall foreign violence, the less likely it will have domestic collective violence, and the less its democide. Rummel argues that the evidence supports overwhelmingly the most important fact of our time: democracy is a method of nonviolence.

Crossing National Borders □□□□, Anna

Vassilieva, 2005 International migration and other types of cross-border movement of people are becoming an important part of international relations in Northeast Asia. In this particular study, experts on China, Japan, Korea, Mongolia and Russia examine the political, economic, social and cultural dimensions of the interaction between border-crossing individuals and host communities, highlighting the challenges that face national and local leaders in each

country and suggesting needed changes in national and international policies. The authors analyze population trends and migration patterns in each country: Chinese migration to the Russian Far East, Chinese, Koreans, and Russians in Japan, North Koreans in China, and migration issues in South Korea and Mongolia. The book introduces a wealth of empirical material and insight to both international migration studies and Northeast Asian area studies.

Advanced Energy Design Guide for Large Hospitals, 2012 Designed to provide recommendations for achieving 50% energy savings over the minimum code requirements of ANSI/ASHRAE/IESNA Standard 90.1-2004 for large hospitals; allows contractors, consulting engineers, architects, and designers to easily achieve advanced levels of energy savings without having to resort to detailed calculations or analyses--

Markets, Rights and Power in Australian Social Policy Professor Gabrielle Meagher, Susan Goodwin, 2015-04-30 The provision of social services in Australia has changed dramatically in recent decades, raising a range of important questions about financial and democratic accountability: 'who benefits', 'who suffers' and 'who decides'. This book explores these developments through rich case studies of a diverse set of social policy domains. The case studies demonstrate a range of effects of marketisation, including the impact on the experience of consumer engagement with social service systems, on the distribution of social advantage and disadvantage, and on the democratic steering of social policy.

Cross-Language Information Retrieval Jian-Yun Nie, 2022-05-31 Search for information is no longer exclusively limited within the native language of the user, but is more and more extended to other languages. This

gives rise to the problem of cross-language information retrieval (CLIR), whose goal is to find relevant information written in a different language to a query. In addition to the problems of monolingual information retrieval (IR), translation is the key problem in CLIR: one should translate either the query or the documents from a language to another. However, this translation problem is not identical to full-text machine translation (MT): the goal is not to produce a human-readable translation, but a translation suitable for finding relevant documents. Specific translation methods are thus required. The goal of this book is to provide a comprehensive description of the specific problems arising in CLIR, the solutions proposed in this area, as well as the remaining problems. The book starts with a general description of the monolingual IR and CLIR problems. Different classes of approaches to translation are then presented: approaches using an MT system, dictionary-based translation and approaches based on parallel and comparable corpora. In addition, the typical retrieval effectiveness using different approaches is compared. It will be shown that translation approaches specifically designed for CLIR can rival and outperform high-quality MT systems. Finally, the book offers a look into the future that draws a strong parallel between query expansion in monolingual IR and query translation in CLIR, suggesting that many approaches developed in monolingual IR can be adapted to CLIR. The book can be used as an introduction to CLIR. Advanced readers can also find more technical details and discussions about the remaining research challenges in the future. It is suitable to new researchers who intend to carry out research on CLIR.

Death by Government R. J. Rummel,1997-01-01 This is R. J. Rummel's fourth book in a series devoted to genocide and government mass murder, or what he calls democide. He presents the primary results, in tables and figures, as well as a historical sketch of the major cases of democide, those in which one million or more people were killed by a regime. In *Death by Government*, Rummel does not aim to describe democide itself, but to determine its nature and scope in order to test the theory that democracies are inherently nonviolent. Rummel discusses genocide in China, Nazi Germany, Japan, Cambodia, Turkey, Yugoslavia, Poland, the Soviet Union, and Pakistan. He also writes about areas of suspected genocide: North Korea, Mexico, and feudal Russia. His results clearly and decisively show that democracies commit less democide than other regimes. The underlying principle is that the less freedom people have, the greater the violence; the more freedom, the less the violence. Thus, as Rummel says, "The problem is power. The solution is democracy. The course of action is to foster freedom." *Death by Government* is a compelling look at the horrors that occur in modern societies. It depicts how democide has been very much a part of human history. Among other examples, the book includes the massacre of Europeans during the Thirty Years' War, the relatively unknown genocide of the French Revolution, and the slaughtering of American Indians by colonists in the New World. This riveting account is an essential tool for historians, political scientists, and scholars interested in the study of genocide.

Ethics in Psychology Gerald P. Koocher, Patricia Keith-Spiegel, 1998 Written in a highly readable and accessible style, this new edition retains the key features that have contributed to its popularity, including hundreds of case studies that provide illustrative guidance on a wide variety of topics, including fee setting, advertising for clients, research ethics, sexual attraction, how to confront observed unethical conduct in others, and confidentiality. *Ethics in Psychology and the Mental Health Professions* will be important reading for practitioners and students in training. -BOOK JACKET.

China's Bloody Century R. J. Rummel, 2017-07-12 Except for Soviet citizens, no people in this century have endured so much mass killing as have the Chinese. They have been murdered by rebels conniving with their own rulers, and then, after the defeat in war of the imperial dynasty, by soldiers of other lands. They have been killed by warlords who ruled one part of China or another. They have been executed by Nationalists or Communists because they had the wrong beliefs or attitudes or were simply in the wrong place at the wrong time. In *China's Bloody Century*, R.J. Rummel's careful estimate of the total number of killings exceeds 5 million. How do we explain such killings, crossing ideological bounds and political conditions? According to Rummel, the one constant factor in all the Chinese mass murder, as it was in the Soviet Union and Nazi Germany, is arbitrary power. It was the factor that united warlords, Nationalists, Communists, and foreign armies. The author argues that whenever such undisciplined power is centralized and unchecked, the possibility exists that it will be used at the whim of dictators to kill for their own ends, whether the aim is ethnic-racial purity, national unity, development, or utopia. The book presents successive periods in modern Chinese history, with each chapter

divided into three parts. Rummel first relates the history of the period within which the nature and the amount of killings are presented. He then provides a detailed statistical table giving the basic estimates with their sources and qualifications. The final part offers an appendix that explains and elaborates the statistical computations and estimates. While estimates are available in the literature on the number of Chinese killed in Communist land reform, or in Tibet, or by the Nationalists in one military campaign or another, until this book no one has tried to systematically accumulate, organize, add up, and analyze these diverse killings for all of China's governments in this century.
