US Foreign Policy Towards Russia in the Post-Cold War Era David Parker,2019-06-07 This book discusses how the ideas, expectations and mind-sets that formed within different US foreign policy making institutions during the Cold War have continued to influence US foreign policy making vis-à-vis Russia in the post-Cold War era, with detrimental consequences for US–Russia relations. It analyses what these ideas, expectations and mind-sets are, explores how they have influenced US foreign policy towards Russia as ideational legacies, including the ideas that Russia is untrustworthy, has to be contained and that in some aspects the relationship is necessarily adversarial, and outlines the consequences for US–Russian relations. It considers these ideational legacies in depth in relation to NATO enlargement, democracy promotion, and arms control and sets the subject in its wider context where other factors, such as increasingly assertive Russian foreign policy, impact on the relationship. It concludes by demonstrating how tension and mistrust have continued to grow during the Trump administration and considers the future for US–Russian relations.

A Century of Ecosystem Science National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Polar Research Board,Committee to Review the Gulf of Alaska Ecosystem Monitoring Program,2002-08-29 This report provides guidance to the Gulf Ecosystem Monitoring (GEM) program to help ensure that it is based on a science plan that is robust, far-reaching, and scientifically sound. The report commends the Trustee Council for its foresight in setting aside funds to create a trust fund to provide long-term research support; it notes that the GEM program offers an unparalleled opportunity to increase understanding of how large marine ecosystems function and change over time. The report outlines elements of a sound long-term science plan, including conceptual foundation, scope and geographic focus, organizational structure, community involvement, data and information management, and synthesis, modeling, and evaluation.

Registries for Evaluating Patient Outcomes Agency for Healthcare Research and Quality/AHRQ,2014-04-01 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Space Fostering Latin American Societies Annette Froehlich,2022-05-09 This peer-reviewed book presents a comprehensive overview of the role space is playing in enabling Latin America to fulfill its developmental aspirations. Following on from the highly acclaimed Part 1 and Part 2, it explains how space and its applications can be used to support the development of the full range and diversity of Latin America societies, while being driven by Latin American goals. The Latin American space sector is currently undergoing a phase of rapid and dynamic expansion, with new actors entering the field and with space applications increasingly being used to support the continent's social, economic, and political development. All across Latin America, attention is shifting to space as a fundamental part of the continental development agenda, and the creation of a Latin American space agency is evidence of this. Additionally, while in recent years, significant advances in economic and social development have lifted many of Latin America's people out of poverty, there is still much that needs to be done to fulfill the basic needs of the population and to afford them the dignity they deserve. To this end, space is already being employed in diverse fields of human endeavor to serve Latin America's goals for its future, but there is still a need for further incorporation of space systems and data. This book will appeal to researchers, professionals and students in fields such as space studies, international relations, governance, and social and rural development.

Administración de organizaciones agrarias en Colombia Ivan Alonso,2022-12-02 La presente obra tiene como objetivo reflexionar sobre algunos aspectos considerados relevantes en la administración de organizaciones agrarias en Colombia, con un propósito divulgativo, orientado a enriquecer los procesos de formación en las aulas, en especial aquellas problemáticas que muy a menudo no pueden ser suficientemente profundizadas, o que requieren la lectura de un buen número de obras para poder lograr una adecuada contextualización. Con este propósito, el texto está organizado en varias secciones, cada una desarrollada para atender objetos y preguntas más específicas, con el fin de conseguir objetivos pedagógicos concretos y de enriquecimiento, que han emergido en los procesos de formación en administración de organizaciones, con un abordaje metodológico específico para cada una de las unidades. El libro busca establecer un sencillo marco para clasificar las organizaciones agrarias, de acuerdo con el grado de profundidad que tiene la división del trabajo en sus procesos y actividades (formas de combinar sus recursos de manera productiva). Esta pretensión, sin embargo, no intenta ser suficiente o completa, y se constituye en un primer paso para buscar una clasificación, tomando como criterio la división del trabajo, el cual es un precepto que le resulta muy propio a las disciplinas de gestión y a los estudios sobre las organizaciones. Para desarrollar esta idea, el libro buscó precisar las conexiones entre los procesos de expansión y crisis agrícolas con la emergencia de las revoluciones industriales, entendidas como intervalos de tiempo en los cuales se profundiza en la actividad productiva.

Fingerprints and Other Ridge Skin Impressions Christophe Champod,Chris J. Lennard,Pierre Margot,Milutin Stoilovic,2017-12-19 Since its publication, the first edition of Fingerprints and Other Ridge Skin Impressions has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear

viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

Communicating Science Toss Gascoigne,Bernard Schiele,Joan Leach,Michelle Riedlinger,Luisa Massarani,Bruce V. Lewenstein,Peter Broks,2020-09-14 Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? Communicating Science describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.

Urban Stormwater Management in the United States National Research Council,Division on Earth and Life Studies,Water Science and Technology Board,Committee on Reducing Stormwater Discharge Contributions to Water Pollution,2009-03-17 The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more pollutants into the nation's rivers, lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.
