The Location of Religion Kim Knott,2015-08-12 The ways in which humans interact with their location is an important topic within sociological studies of religion. It is integral to the place of religion in secular society. 'The Location of Religion: A Spatial Analysis' offers an overview of the ways in which religion can be located within social, cultural and physical space. It examines contemporary spatial theory - notably the work of the influential sociologist Henri Lefebvre - and the many disciplines that have contributed to the spatial study of religion. This volume will be invaluable to all those interested in the role of religion in spatial analysis.

Freedom of Information Matthew Burgess,2015-06-19 Freedom of Information: A Practical Guide for UK Journalists is written to inform, instruct and inspire journalists on the investigative possibilities offered by the Freedom of Information Act. Covering exactly what the Act is, how to make FOI requests and how to use the Act to hold officials to account, Matt Burgess utilises expert opinions, relevant examples and best practice from journalists and investigators working with the Freedom of Information Act at all levels. The book is brimming with illuminating and relevant examples of the Freedom of Information Act being used by journalists, alongside a range of helpful features, including: • end-of-chapter lists of tips and learning points; • sections addressing the different areas of FOI requests; • text boxes on key thoughts and cases; • interviews with leading contemporary journalists and figures working with FOI requests. Supported by the online FOI Directory (www.foidirectory.co.uk), Freedom of Information: A Practical Guide for UK Journalists is a must read for all those training or working as journalists on this essential tool for investigating, researching and reporting.

Protection of Civilians Haidi Willmot,Marc Weller,Ralph Mamiya,Scott Sheeran,2016-04-14 The protection of civilians is a highly topical issue at the forefront of international discourse, and has taken a prominent role in many international deployments. It has been at the centre of debates on the NATO intervention in Libya, UN deployments in Darfur, South Sudan, and the Democratic Republic of the Congo, and on the failures of the international community in Sri Lanka and Syria. Variouslly described as a moral responsibility, a legal obligation, a mandated peacekeeping task, and the culmination of humanitarian activity, it has become a high-profile concern of governments, international organisations, and civil society, and a central issue in international peace and security. This book offers a multidisciplinary treatment of this important topic, harnessing perspectives from international law and international relations, traversing academia and practice. Moving from the historical and philosophical development of the civilian protection concept, through relevant bodies of international law and normative underpinnings, and on to politics and practice, the volume presents coherent cross-cutting analysis of the realities of conflict and diplomacy. In doing so, it engages a series of current debates, including on the role of politics in what has often been characterized as a humanitarian endeavour, and the challenges and impacts of the use of force. The work brings together a wide array of eminent academics and respected practitioners, incorporating contributions from legal scholars and ethicists, political commentators, diplomats, UN officials, military commanders, development experts and humanitarian aid workers. As the most comprehensive publication on the subject, this will be a first port of call for anyone studing or working towards a better protection of civilians in conflict.

World Development Report 2020 World Bank,2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.
