Practical Reliability Engineering Patrick O'Connor,1997-02-24 This classic textbook/reference contains a complete integration of the processes which influence quality and reliability in product specification, design, test, manufacture and support. Provides a step-by-step explanation of proven techniques for the development and production of reliable engineering equipment as well as details of the highly regarded work of Taguchi and Shainin. New to this edition: over 75 pages of self-assessment questions plus a revised bibliography and references. The book fulfills the requirements of the qualifying examinations in reliability engineering of the Institute of Quality Assurance, UK and the American Society of Quality Control.

IBM Power 520 Technical Overview Scott Vetter,Giuliano Anselmi,YoungHoon Cho,Jim Cook,Gregor Linzmeier,Marcos Quezada,John T Schmidt,Guido Somers,IBM Redbooks,2010-04-02 This IBM Redpaper publication is a comprehensive guide covering the IBM Power 520 server, machine type model 8203-E4A. The goal of this paper is to introduce this innovative server that includes IBM System i and IBM System p and new hardware technologies. The major hardware offerings include: - The POWER6 processor, available at frequencies of 4.2 GHz and 4.7 GHz. - Specialized POWER6 DDR2 memory that provides greater bandwidth, capacity, and reliability. - The 1 Gb or 10 Gb Integrated Virtual Ethernet adapter that brings native hardware virtualization to this server. - EnergyScale technology that provides features such as power trending, power-saving, capping of power, and thermal measurement. - PowerVM virtualization technology. - Mainframe continuous availability brought to the entry server environment. This Redpaper expands the current set of IBM Power System documentation by providing a desktop reference that offers a detailed technical description of the Power 520 system. This Redpaper does not replace the latest marketing materials and tools. It is intended as an additional source of information that, together with existing sources, can be used to enhance your knowledge of IBM server solutions.

Monitoring for Gaseous Pollutants in Museum Environments Cecily M. Grzywacz,2006-09-01 With an emphasis on passive sampling, this volume focuses on the environmental monitoring for common gaseous pollutants. It offers an overview of the history and nature of pollutants of concern to museums and the challenges facing scientists, conservators, and managers seeking to develop target pollutant guidelines to protect cultural property.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

The Red Bandanna (Young Readers Adaptation) Tom Rinaldi,2018-08-14 Winner of the Christopher Award An ILA-CBC Children's Choices Book A NCSS-CBC Notable Social Studies Book Welles Crowther did not see himself as hero. He was just an ordinary kid who played sports, volunteered at his local fire department, and eventually headed off to college and then Wall Street to start a career. Throughout it all, he always kept a red bandanna in his pocket, a gift from his father. On September 11, 2001, Welles was working on the 104th floor of the South Tower of the World Trade Center when the Twin Towers were attacked. That day, Welles made a fearless choice and in doing so, saved many lives. The survivors didn't know his name, but one of them remembered a single detail clearly: the man was wearing a red bandanna. Welles Crowther was a hero. Award-winning ESPN reporter Tom Rinaldi brings Welles's inspirational story of selflessness and compassion to life in this accessible young readers' adaptation of his New York Times bestselling book. This powerful story of making a difference through our actions is perfect for helping the post-9/11 generation understand the meaning of this historic day through the eyes of one young man. "Rinaldi's young reader edition of his award-winning adult story puts a face on that day (9/11), a hero's face, and brings to young people someone who stood brave in the toughest of times and who, in the end, was lost doing his best to help others survive."—VOYA

Federal Funding of Astronomical Research National Research Council,Commission on Physical Sciences, Mathematics, and Applications,Space Studies Board,Board on Physics and Astronomy,Committee on Astronomy and Astrophysics,2000-01-01 The Committee on Astronomy and Astrophysics (CAA), at its meeting on September 8, 1997, was briefed on the legislative report accompanying the bill to authorize appropriations for fiscal years 1998 and 1999 for the National Science Foundation (NSF). The report raised a number of questions about trends in support for research in astronomy and the overall robustness of the programs providing that support. At its meeting, the CAA heard the views of NSF and the National Aeronautics and Space Administration (NASA) on these issues. In consultation with the Board on Physics and Astronomy, the Space Studies Board, and representatives of NASA and NSF, the committee accepted the task of studying three of the questions raised by the House Science Committee (HSC). It was intended that the results of the study would help guide federal support of basic research for the next decade and serve as analytical input to the new 2000 decadal survey of the Astronomy and Astrophysics Survey Committee (AASC). The study would not offer specific funding recommendations, but rather would provide a background analysis of the alignment between available resources, agency priorities, and the vitality of the basic research program.

Sewing Success? Gladys Lopez-Acevedo,Raymond Robertson,2012-03-14 The end of the MFA was followed by rising apparel exports, falling prices, and a reallocation of production and employment between countries. There were also significant changes within countries. The first main finding of this report is that export and employment patterns after the MFA/ATC did not necessarily match predictions. While many predicted that production would shift to low-wage countries, this book shows that only 13 percent of variation in export changes post-MFA can be explained by the differences in wage levels. Second, changes in exports are usually, but not always, good indicators of what happens to wages and employment within countries. This is especially important for policy because it shows that simply using exports as a metric of 'success' in terms of helping the poor is not sufficient. Third, the Book identifies the specific ways that changes in the global apparel market affected earnings. The Book shows that wage premiums change in predictable ways: rising (in most cases) in countries that were proactive in adapting to the MFA phase-out and expanded their market shares, and falling in countries that failed to respond in a timely

fashion to the changing environment. The Book shows that promoting 'upgrading' (defined as shifting to higher-value goods, shifting up the value chain, or 'modernizing' production techniques) seems to be necessary for sustainable competitiveness in the apparel sector but does not necessarily help the poor. Policies that support upgrading need to be complemented with targeted workforce development to make sure that the most vulnerable workers are not left behind. Having a vision for the evolution of the apparel sector that incorporates developing worker skills seems crucial. Otherwise, less-skilled workers could miss out on opportunities to gain valuable work experience in manufacturing.

Bioinformatics for Beginners Supratim Choudhuri,2014-05-09 Bioinformatics for Beginners: Genes, Genomes, Molecular Evolution, Databases and Analytical Tools provides a coherent and friendly treatment of bioinformatics for any student or scientist within biology who has not routinely performed bioinformatic analysis. The book discusses the relevant principles needed to understand the theoretical underpinnings of bioinformatic analysis and demonstrates, with examples, targeted analysis using freely available web-based software and publicly available databases. Eschewing non-essential information, the work focuses on principles and hands-on analysis, also pointing to further study options. Avoids non-essential coverage, yet fully describes the field for beginners Explains the molecular basis of evolution to place bioinformatic analysis in biological context Provides useful links to the vast resource of publicly available bioinformatic databases and analysis tools Contains over 100 figures that aid in concept discovery and illustration

Industrial Development for the 21st Century David O'Connor,Monica Kjollerstrom,2008-06-01 With very few exceptions, industrial development has been central to the process of structural transformation which characterises economic development. Industrial Development for the 21st century examines the new challenges and opportunities arising from globalization, technological change and new international trade rules. The first part focuses on key sectors with potential for developing countries, focussing on two key themes. First, traditional points of entry for late industrializers - like textiles and clothing - have become even more intensely competitive than ever before, requiring more innovative adaptive strategies for success. Second, countries now recognize that manufacturing does not exhaust the opportunities for producing high value-added goods and services for international markets. Knowledge intensity is increasing across all spheres of economic activity, including agriculture and services, which can offer promising development paths for some developing countries. The final section addresses social and environmental aspects of industrial development. Labour-intensive, but not necessarily other patterns of industrial development can be highly effective in poverty reduction though further industrial progress may be less labour-intensive. A range of policies can promote industrial energy and materials efficiency, often with positive impacts on firms' financial performance as well as the environment. Promoting materials recycling and reuse is an effective, if indirect means of conserving resources. Finally, the growth of multinational interest in corporate social responsibility is traced, with consideration given to both the barriers and opportunities this can pose for developing country enterprises linked to global supply chains.
