Marine Anthropogenic Litter Melanie Bergmann,Lars Gutow,Michael

Klages,2015-06-01 This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.

Car Crash Culture M. Brottman,2016-04-30 A morbidly fascinating and articulate

collection of essays, this book explores the grim underside of America's cult of the automobile and the disturbing, frequently conspiratorial, speculations that arise whenever the car becomes the cause or the site of human death. Through analysis of fatal celebrity car accidents and other examples of death by automobile, as well as through personal memoir and forensic reports, cultural critics ponder our very human fascination with the car crash. Topics include the roles and experiences of passengers and bystanders, car crash conspiracy theories, the automobile as a site of murder, studies of car crash cinema, and psychological interpretations of the notion of the 'accident.' The book features original essays by such underground icons as Kenneth Anger and Adam Parfrey.

Armenophobia in Azerbaijan Anzhela Elibegova, Armine Adibekian, 2021-06-28 The idea of this book came after the presentation of Azerichild project which represented a systematized compilation of works by Azerbaijani authors intended for children audiences along with a series of examples of works created by children themselves, which gave a

clear demonstration of the gap between the real situation in the Azerbaijani society about anything relating to Armenia and the declared tolerance for diversity of cultures and religions. Naturally enough, we tend to label this hatred as armenophobia often without full awareness of the pivotal role it plays in shaping the ethnic identity of Azerbaijanis; such hatred channeled against all that pertains to Armenia stands as the nemesis of their psychological model and fuels the juxtaposition of us vs. them which is fraught with repercussions for Azerbaijanis themselves. The large archive compiled by the authors of this book a) serves as a thesaurus for an analysis of ongoing processes in the Azerbaijani society and b) allows building a temporal perspective on three levels by covering the past history, current situation and expected ramifications of the armenophobic policy pursued at the state level in Azerbaijan.

The Semantics of Dynamic Space in French Michel Aurnague, Dejan Stosic, 2019-07-29
Research on the semantics of spatial markers in French is known mainly through Vandeloise's (1986, 1991) work on static prepositions. However, interest in the expression of space in French goes back to the mid-1970s and focused first on verbs denoting changes in space, whose syntactic properties were related to specific semantic distinctions, such as the opposition between "movement" and "displacement". This volume provides an overview of recent studies on the semantics of dynamic space in French and addresses important questions about motion expression, among which "goal bias" and asymmetry of motion, the status of locative PPs, the expression of manner, fictive or non-actual motion. Descriptive, experimental and formal or computational analyses are presented, providing complementary perspectives on the main issue. The volume is

intended for researchers and advanced students wishing to learn about both spatial semantics in French and recent debates on the representation of motion events in language and cognition.

Membrane Computing Gheorghe Paun, 2012-12-06 Membrane computing is an unconventional model of computation associated with a new computing paradigm. The field of membrane computing was initiated in 1998 by the author of this book; it is a branch of natural computing inspired by the structure and functioning of the living cell and devises distributed parallel computing models in the form of membrane systems. This book is the first monograph surveying the new field in a systematic and coherent way. It presents the central notions and results: the main classes of P systems, the main results about their computational power and efficiency, a complete bibliography, and a series of open problems and research topics.

Solid Waste Management in the World's Cities , 2010 In a rapidly urbanizing global society, solid waste management will be a key challenge facing all the world's cities. This publication provides a fresh perspective and new data on one of the biggest issues in urban development.

Hazard Mitigation Grant Program Desk Reference (FEMA 345) Federal Emergency Management Agency, 2013-02-01 FEMA's Hazard Mitigation Grant Program is a powerful resource in the combined effort by Federal, State, and local government, as well as private industry and homeowners, to end the cycle of repetitive disaster damage. The Robert T. Stafford Disaster Relief and Emergency Assistance Act was passed on November 23, 1988, amending Public Law 93-288, the Disaster Relief Act of 1974. The

Stafford Act included Section 404, which established the Hazard Mitigation Grant Program. In 1993, the Hazard Mitigation and Relocation Act amended Section 404 to increase the amount of HMGP funds available and the cost-share to 75 percent Federal. This amendment also encouraged the use of property acquisition and other non-structural flood mitigation measures. In an effort to streamline HMGP delivery, FEMA encourages States to develop their mitigation programs before disaster strikes. States are adopting a more active HMGP management role. Increased capabilities may include: Conducting comprehensive all-hazard mitigation planning prior to disaster events; Providing applicants technical assistance on sound mitigation techniques and hazard mitigation policy and procedures; Coordinating mitigation programs through interagency teams or councils. Conducting benefit-cost analyses; and Preparing National Environmental Policy Act reviews for FEMA approval. States that integrate the HMGP with their frequently updated State Administrative and Hazard Mitigation Plans will create cohesive and effective approaches to loss reduction. This type of coordinated approach minimizes the distinction between “predisaster” and “post-disaster” time periods, and instead produces an ongoing mitigation effort. Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. A key purpose of the HMGP is to ensure that the opportunity to take critical mitigation measures to protect life and property from future disasters is not lost during the recovery and reconstruction process following a disaster. Program grant funds available under Section 404 of the Stafford Act provide States with the incentive and capability to implement mitigation measures that previously may have been infeasible. The purpose of

this Desk Reference is to: Provide comprehensive information about FEMA's Hazard Mitigation Grant Program (HMGP); Increase awareness of the HMGP as an integral part of statewide hazard mitigation efforts; and Encourage deeper commitments and increased responsibilities on the part of all States and communities to reduce damage and losses from natural disasters. This Desk Reference is organized to simplify program information and assist the reader with practical guidance for successful participation in the program. Lists of program-related acronyms and definitions are included, along with appendices that amplify selected aspects of the HMGP. This Desk Reference is organized into 14 sections, each of which presents a major HMGP subject area. In each section, information is presented on the right side of the page. In several sections, job aids containing supplemental material are provided. The job aids for each section can be found at the end of the section. At the front of each section, there is a detailed table of contents to help you locate specific information.

Handbook of Modern Sensors Jacob Fraden,2006-04-29 Seven years have passed since the publication of the previous edition of this book. During that time, sensor technologies have made a remarkable leap forward. The sensitivity of the sensors became higher, the dimensions became smaller, the sensitivity became better, and the prices became lower. What have not changed are the fundamental principles of the sensor design. They are still governed by the laws of Nature. Arguably one of the greatest geniuses who ever lived, Leonardo Da Vinci, had his own peculiar way of praying. He was saying, "Oh Lord, thanks for Thou do not violate your own laws. " It is comforting indeed that the laws of Nature do

not change as time goes by; it is just our appreciation of them that is being re?ned. Thus, this new edition examines the same good old laws of Nature that are employed in the designs of various sensors. This has not changed much since the previous edition. Yet, the sections that describe the practical designs are revised substantially. Recent ideas and developments have been added, and less important and nonessential designs were dropped. Probably the most dramatic recent progress in the sensor technologies relates to wide use of MEMS and MEOMS (micro-electro-mechanical systems and micro-electro-opto-mechanical systems). These are examined in this new edition with greater detail. This book is about devices commonly called sensors. The invention of a - croprocessor has brought highly sophisticated instruments into our everyday lives.

Water and Sanitation in the World's Cities Un-Habitat, 2013-06-17 'This is surely the most impressive and important publication to come out of the UN system for many years.' Peter Adamson, founder, New Internationalist, and author and researcher of UNICEF's The State of the World's Children from 1980 to 1995 The world's governments agreed at the Millennium Summit to halve, by 2015, the number of people who lack access to safe water. With rapidly growing urban populations the challenge is immense. Water and Sanitation in the World's Cities is a comprehensive and authoritative assessment of the problems and how they can be addressed. This influential publication by the United Nations Human Settlements Programme (UN-HABITAT) sets out in detail the scale of inadequate provision of water and sanitation. It describes the impacts on health and economic performance, showing the potential gains of remedial action; it analyses the proximate and underlying causes of poor provision and identifies information gaps

affecting resource allocation; it outlines the consequences of further deterioration; and it explains how resources and institutional capacities - public, private and community - can be used to deliver proper services through integrated water resource management.

Vendetta James Neff,2015-07-07 One of America's greatest investigative reporters brings to life the gripping, no-holds-barred clash of two American titans: Robert Kennedy and his nemesis Jimmy Hoffa. From 1957 to 1964, Robert Kennedy and Jimmy Hoffa channeled nearly all of their considerable powers into destroying each other. Kennedy's battle with Hoffa burst into the public consciousness with the 1957 Senate Rackets Committee hearings and intensified when his brother named him attorney general in 1961. RFK put together a Get Hoffa squad within the Justice Department, devoted to destroying one man. But Hoffa, with nearly unlimited Teamster funds, was not about to roll over. Drawing upon a treasure trove of previously secret and undisclosed documents, James Neff has crafted a brilliant, heart-pounding epic of crime and punishment, a saga of

venom and relentlessness and two men willing to do anything to demolish each other.

Nomadic Societies in the Middle East and North Africa Dawn Chatty,2018-11-12 A volume devoted to an understanding of contemporary nomadic and pastoral societies in the Middle East and North Africa. It recognizes the variable mobile quality of the ways of life of these societies which accommodate the 'nation-state' but remain firmly transnational and highly adaptive.

Plastics and the Environment Anthony L. Andrady,2003-02-20 Plastics offer a variety of environmental benefits. However, their production, applications, and disposal present many environmental concerns. *Plastics and the Environment* provides state-of-the-art technical and research information on the complex relationship between the plastic and polymer industry and the environment, focusing on the sustainability, environmental impact, and cost—benefit tradeoffs associated with different technologies. Bringing together the field's leading researchers, Anthony Andrady's innovative collection not only covers how plastics affect the environment, but also how environmental factors affect plastics. The relative benefits of recycling, resource recovery, and energy recovery are also discussed in detail. The first of the book's four sections represents a basic introduction to the key subject matter of plastics and the environment; the second explores several pertinent applications of plastics with environmental implications—packaging, paints and coatings, textiles, and agricultural film use. The third section discusses the behavior of plastics in some of the environments in which they are typically used, such as the outdoors, in biotic environments, or in fires. The final section

consists of chapters on recycling and thermal treatment of plastics waste. Chapters include: Commodity Polymers Plastics in Transportation Biodegradation of Common Polymers Thermal Treatment of Polymer Waste Incineration of Plastics The contributors also focus on the effectiveness of recent technologies in mitigating environmental impacts, particularly those for managing plastics in the solid waste stream. Plastic and design engineers, polymer chemists, material scientists, and ecologists will find Plastics and the Environment to be a vital resource to this critical industry.
