Libraries: A Design Manual Nolan

Lushington, Wolfgang Rudolf, Liliane Wong, 2016-04-25

Libraries as a building type have been subjected to substantial changes in particular in the past ten years. Milestones such as Rem Koolhaas' Seattle Central Library from 2004 reinvented the typology completely and reflected a development from elitist temple of learning to a public living room. Hybrids between library and department store or theater were conceived. Today, the ubiquity of electronic devices and media needs to be taken into account by the designer: every new library has areas without any books now. This work of reference explains systematically all technological and planning requirements of library design. Special features such as RFID, signage, acoustics or specific structural load issues are explained in texts by experts from the fields of architecture and library science. Finally, approximately 40 best-practice case studies of contemporary library design are documented extensively. They are organized in four categories – national libraries, large public libraries, small public libraries, university libraries – and comprise high-profile examples such as Jo Coenen's Openbare Bibliotheek Amsterdam, Alvaro Siza's Public Library Viana do Castelo in Portugal or Mecanoo's Library of Birmingham from 2013.

Kenneth Burke's Permanence and Change Ann

George,2018-11-27 A guide to and analysis of a seminal books key concepts and methodology Since its publication in 1935, Kenneth Burke's Permanence and Change, a text that can serve as an introduction to all his theories, has become a landmark of rhetorical theory. Using new archival sources and contextualizing Burke in the past and present, Ann George offers the first sustained exploration of this work and seeks to clarify the challenging book for both amateurs and scholars of rhetoric. This companion to Permanence and Change explains Burke's theories through analysis of key concepts and methodology, demonstrating how, for Burke, all language and therefore all culture is persuasive by nature. Positioning Burke's book as a pioneering volume of New Rhetoric, George presents it as an argument against systemic violence, positivism, and moral relativism. Permanence and Change has become the focus of much current rhetorical study, but George introduces Burke's previously unavailable outlines and notes, as well as four drafts of the volume, to investigate his work more deeply than ever before. Through further illumination of the book's development, publication, and reception, George

reveals Burke as a public intellectual and critical educator, rather than the eccentric, aloof genius earlier scholars imagined him to be. George argues that Burke was not ahead of his time, but rather deeply engaged with societal issues of the era. She redefines Burke's mission as one of civic engagement, to convey the ethics and rhetorical practices necessary to build communities interested in democracy and human welfare—lessons that George argues are as needed today as they were in the 1930s.

Building Chicago's Subways David Sadowski, 2018

While the elevated Chicago Loop is justly famous as a symbol of the city, the fascinating history of its subways is less well known. The City of Chicago broke ground on what would become the Initial System of Subways during the Great Depression and finished 20 years later. This gigantic construction project, a part of the New Deal, would overcome many obstacles while tunneling through Chicago's soft blue clay, under congested downtown streets, and even beneath the mighty Chicago River. Chicago's first rapid transit subway opened in 1943 after decades of wrangling over routes, financing, and logistics. It grew to encompass the State Street, Dearborn-Milwaukee, and West Side Subways, with the latter modernizing the old Garfield Park L into the median of Chicago's first expressway. Take a trip underground and see how Chicago's I Will spirit overcame challenges and persevered to help with the successful building of the subways that move millions. Building Chicago's subways was national

news and a matter of considerable civic pride-- making it a Second City no more

Moon-face and Other Stories Jack London, 1906

JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways - robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. *The Son of the Wolf* (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, *The Call of the Wild* (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

P.O. Ackley Fred Zeglin, 2017 In *P.O. Ackley: America's gunsmith*, author Fred Zeglin's years of extensive research highlight not just the history of cartridge and rifle development, but an insider's look at a humble man who influenced nearly everything we know about shooting and ballistics today. P.O. Ackley's ideas on reloading, rifle accuracy, barrel making,

cartridge choice, and wildcats are just as relevant for modern gun cranks as they were in Ackley's heyday. Zeglin delivers the most complete collection of accurate dimensions, loading data and history for the lifetime of cartridges created by P.O. Ackley, the most influential gunsmith in America. Most shooters know him today because of his Ackley Improved cartridge designs. But those cartridges are only the tip of the iceberg. P.O. Ackley: America's gunsmith is the whole story. Includes a full-color photo section and an exclusive never-before-printed article by P.O. Ackley. -- back cover.

On the Turn Bárbara Arizti,Silvia Martínez-Falquina,2007 On the Turn: The Ethics of Fiction in Contemporary Narrative in English is an attempt to listen to the various voices that participate in the current dialogue on the relationship between fiction and ethics. The editorsâ (TM) introduction investigates the current state of affairs on the return to ethics in critical and literary consideration, and it opens up the way for the variety of approaches that follows.

Participants include internationally recognized scholars like Andrew Gibson, Patricia Waugh, or Native American fiction writer and poet Gordon Henry, winner of the American Book Award in 1995. All in all, contributors cover a significant geographical diversity, and their approaches also vary from general theory to particular examples, from traditional interpretations to post-deconstruction ethics. Authors analyze texts both mainstream and marginal, colonial and postcolonial; they examine the ethics of race, gender and sexuality; the ethics of self-positioning and orientation; the ethics of style; the ethics of reception; the ethics of mode and

genre; the ethics of extreme situations of evil, disease and fascism. In its search for a better understanding of the global/nationalistic world of today, On the Turn therefore moves beyond the scope of literary criticism into issues of wider, more urgent relevance. What should I, ought I, may I, must I, do, if anything, on the basis of reading, when I have read a literary work? What does reading a literary work authorize, or even command, me to do? Writing an essay about the work would be one response. On the Turn is a wonderfully diverse, learned, challenging, provocative, even sometimes controversial, collection of essays on the ethical dimensions of literature. This book is testimony to the continued lively interest in the ethical turn in literary studies. The authors are, for the most part, concerned with ethical theory and with ethically charged situations in postmodern novels in English, as they shape readers's (TM) values and judgments. Poetry and non-print media are, however, also discussed. J. Hillis Miller UCI Distinguished Research Professor of Comparative Literature and English, University of California at Irvine The Ethics of Fiction is an important and exciting volume that explores with energy and rigour the connections between ethics and literature. Relating literature to philosophy, neurobiology, politics, religion, deconstruction and psychoanalysis, the twenty two contributors richly advance â ~the ethical turnâ (TM) recently embraced by many critics. Works by authors such as Ian McEwan, A.S.Byatt, Charles Palliser, Hanif Kureishi, J.M. Coetzee, David Malouf, George

Orwell, E.L. Doctorow, Flannery Oâ (TM)Connor, Toni Morrison and Paul Auster are presented in a new light and complex topics such as territoriality, the nature of love, Islamophobia and the politics of representation are tackled with imagination and intellectual integrity. This book is essential reading for anyone interested in the dialogue between ethics and literature. Avril Horner, Professor of English, Kingston University
