The Ha-Ha Dave King,2005-01-01 Howard Kapostash has not spoken in thirty years. The small repertory of gestures and simple sounds that he uses to communicate lead most people to assume he is disturbed. No one understands that Howard is still the same man he was before his tragic injury. But when he agrees to help an old girlfriend by opening his home to her nine-year-old son, the presence of this nervous, resourceful boy in his life transforms Howard utterly. He is afforded a rare glimpse of life outside his shell? With all its exuberant joys and crushing sorrows.

Linux in a Nutshell Ellen Siever, Aaron Weber, Stephen Figgins, Robert Love, Arnold Robbins, 2005

Over the last few years, Linux has grown both as an operating system and a tool for personal and business use. Simultaneously becoming more user friendly and more powerful as a back-end system, Linux has achieved new plateaus: the newer filesystems have solidified, new commands and tools have appeared and become standard, and the desktop--including new desktop environments--have proved to be viable, stable, and readily accessible to even those who don't consider themselves computer gurus. Whether you're using Linux for personal software projects, for a small office or home office (often termed the SOHO environment), to provide services to a small group of colleagues, or to administer a site responsible for millions of email and web connections each day, you need quick access to information on a wide range of tools. This book covers all aspects of administering and making effective use of Linux systems. Among its topics are booting, package management, and revision control. But foremost in *Linux in a Nutshell* are the utilities and commands that make Linux one of the most powerful and flexible systems available. Now in its fifth edition, *Linux in a Nutshell* brings users up-to-date with the current state of Linux. Considered by many to be the most complete and authoritative command reference for Linux available, the book covers all substantial user, programming, administration, and networking commands for the most common Linux distributions. Comprehensive but concise, the fifth edition has been updated to cover new features of major Linux distributions. Configuration information for the rapidly growing commercial network services and

community update services is one of the subjects covered for the first time. But that's just the beginning. The book covers editors, shells, and LILO and GRUB boot options. There's also coverage of Apache, Samba, Postfix, sendmail, CVS, Subversion, Emacs, vi, sed, gawk, and much more. Everything that system administrators, developers, and power users need to know about Linux is referenced here, and they will turn to this book again and again.

Paul Temple Intervenes (Script of the Eight Part Radio Serial) Francis

Durbridge, 2022-08-06 A series of eight murders, with in each case a card bearing the inscription The Marquis, brings Temple into the hunt for a ruthless master criminal. Suspicion falls on an eminent Egyptologist, but there are other suspects and further murders before the Marquis is identified.

Sailing to Byzantium Robert Silverberg, 2013-05-14 Six science fiction novellas by the author

hailed as “a master” by Robert Jordan—including two Nebula Award winners and two finalists. Robert Silverberg’s novellas open the door to new worlds: In “Born with the Dead,” a woman wills her body to be “rekindled” after death, allowing her to walk among the living, while her husband is left in the impossible position of accepting her death when he can still see her. In the Nebula Award-nominated story “Homefaring,” the time-traveling narrator finds himself trapped in the consciousness of a lobsterlike creature of the far future, leading him to reflect on what it means to be human. And in the collection’s Nebula Award-winning title story, the Earth of the fiftieth century is a place where time is elusive and fluid, and young citizens live as tourists in ancient cities. “When Silverberg is at the top of his form, no one is better,” says George R. R. Martin. Also including Nebula Award finalist “The Secret Sharer,” as well as “Thomas the Proclaimer” and “We Are for the Dark, this collection offers an engrossing exploration of the work of this Grand Master, hailed by the New York Times Book Review as “the John Updike of science fiction.” This ebook features an illustrated biography of Robert Silverberg including rare images and never-before-seen documents from the author’s personal collection.
