Statistical Disclosure Control for Microdata Matthias Templ,2017-05-05 This book on statistical disclosure control presents the theory, applications and software implementation of the traditional approach to (micro)data anonymization, including data perturbation methods, disclosure risk, data utility, information loss and methods for simulating synthetic data. Introducing readers to the R packages sdcMicro and simPop, the book also features numerous examples and exercises with solutions, as well as case studies with real-world data, accompanied by the underlying R code to allow readers to reproduce all results. The demand for and volume of data from surveys, registers or other sources containing sensible information on persons or enterprises have increased significantly over the last several years. At the same time, privacy protection principles and regulations have imposed restrictions on the access and use of individual data. Proper and secure microdata dissemination calls for the application of statistical disclosure control methods to the data before release. This book is intended for practitioners at statistical agencies and other national and international organizations that deal with confidential data. It will also be interesting for researchers working in statistical disclosure control and the health sciences.

Tall Man Chloe Hooper,2009-04-07 In 2004 on Palm Island, an Aboriginal settlement in the Deep North of Australia, a thirty-six-year-old man named Cameron Doomadgee was arrested for swearing at a white police officer. Forty minutes later he was dead in the jailhouse. The police claimed he'd tripped on a step, but his liver was ruptured. The main suspect was Senior Sergeant Christopher Hurley, a charismatic cop with long experience in Aboriginal communities and decorations for his work. Chloe Hooper was asked to write about the case by the pro bono lawyer who represented Cameron Doomadgee's family. He told her it would take a couple of weeks. She spent three years following Hurley's trail to some of the wildest and most remote parts of Australia, exploring Aboriginal myths and history and the roots of brutal chaos in the Palm Island community. Her stunning account goes to the heart of a struggle for power, revenge, and justice. Told in luminous detail, Tall Man is as urgent as Bury My Heart at Wounded Knee and The Executioner's Song. It is the story of two worlds clashing -- and a haunting moral puzzle that no reader will forget.

Net Neutrality Christopher T. Marsden,2010-01-18 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Chris Marsden maneuvers through the hype articulated by Network Neutrality advocates and opponents. He offers a clear-headed analysis of the high stakes in this debate about the Internet's future, and fearlessly refutes the misinformation and misconceptions that about. Professor Rob Freiden, Penn State University Net Neutrality is a very heated and contested policy principle regarding access for content providers to the Internet end-user, and potential discrimination in that access where the end-user's ISP (or another ISP) blocks that access in part or whole. The suggestion has been that the problem can be resolved by either introducing greater competition, or closely policing conditions for vertically integrated service, such as VOIP. However, that is not the whole story, and ISPs as a whole have incentives to discriminate between content for matters such as network management of spam, to secure and maintain customer experience at current levels, and for economic benefit from new Quality of Service standards. This includes offering a 'priority lane' on the network for premium content types such as video and voice service. The author considers market developments and policy responses in Europe and the United States, draws conclusions and proposes regulatory recommendations.

Advanced Mechatronics Solutions Ryszard Jabłoński,Tomas Brezina,2015-11-02 Focusing on the most rapidly changing areas of mechatronics, this book discusses signals and system control, mechatronic products, metrology and nanometrology, automatic control & robotics, biomedical engineering, photonics, design manufacturing and testing of MEMS. It is reflected in the list of contributors, including an international group of 302 leading researchers representing 12 countries. The book is intended for use in academic, government and industry R&D departments, as an indispensable reference tool for the years to come. This volume can serve a global community as the definitive reference source in Mechatronics. The book comprises carefully selected 93 contributions presented at the 11th International Conference Mechatronics 2015, organized by Faculty of Mechatronics, Warsaw University of Technology, on September 21-23, in Warsaw, Poland.

Recent Advances in Mechatronics Tomas Brezina,Ryszard Jablonski,2009-11-29 Mechatronics is a synergic discipline integrating precise mechanics, electrotechnics, electronics and IT technologies. The main goal of mechatronic approach to design of complex products is to achieve new quality of their utility value at reasonable price. Successful accomplishment of this task would not be possible without application of advanced software and hardware tools for simulation of design, technologies and production control and also for simulation of behavior of these products in order to provide the highest possible level of spatial and functional integration of the final product. This book brings a review of the current state of the art in mechatronics, as presented at the 8th International Conference Mechatronics 2009, organized by the Brno Technical University, Faculty of Mechanical Engineering, Czech Republic. The specific topics of the conference are Modelling and Simulation, Metrology & Diagnostics, Sensorics & Photonics, Control & Robotics, MEMS Design & Mechatronic Products, Production Machines and Biomechanics. The selected contributions provide an insight into the current development of these scientific disciplines, present the new results of research and development and indicate the trends of development in the interdisciplinary field of mechatronic systems. Therefore, the book provides the latest and helpful information both for the R&D specialists and for the designers working in mechatronics and related fields.

Oudry's Painted Menagerie Mary Morton,2007-06-25 In the 1720s and 1730s, Jean-Baptiste Oudry established himself as the preeminent painter in France of hunts, animals, still lifes, and landscapes. Oudry's Painted Menagerie focuses on a suite of eleven life-size portraits of exotic animals from the royal menagerie at Versailles, painted by Oudry between 1739 and 1752. These paintings eventually found their way into the ducal collection in Schwerin, Germany. Among them is the magnificent portrait of Clara, an Indian rhinoceros who became a celebrity in mid-eighteenth-century Europe. Her portrait has been out of public view for more than a century, and it is presented here in its newly conserved state.

The Judgment Against Imperialism, Fascism and Racism Against Caliphate and Islam Khondakar Golam Mowla,2008-10 Where are Judges or Judgments with human conscious and high moral when about half of Iraqi population vanished since recent war against Iraq including millions children of Iraq for illegal sanction? Which means there is no justice for those who do not have WMD to attack or to defend own land or dollars or pounds to bribe or to buy few real Judges or Judgment with human conscious or moral. And without money you cannot buy a Judgment. Illegal Governors of present illegal Muslim or Arab client States are also responsible to host most powerful countries on earth with their army, air force and navy with deadly WMD in Muslim land, sea and air to invade Muslim land like Iraq and Afghanistan or to threaten Iran. There were no independent states like Iraq before First World War since those present illegal client States became part of Caliphate/Khilafah 1400 years ago. World Muslims never accepted those illegal Muslim or Arab client States which were created after First European War known as First World War. A policy of attacking the idea of the Caliphate by linking it with the political violence of the jihadi movement cannot eliminate its Koranic authority. The Islamic world may not totally agree with the armed method of the jihadi movement, but the Caliphate's linkage with the Koran is not in dispute. The political and non-violent aspect of the Islamic movement, considered the godfather of reviving the Caliphate idea, has deeper and wider appeal. An attack on the Caliphate is in effect considered an attack against Islam.[i] Readers also must judge on following fact prior to World War as Desert storm in 1991 and subsequent sanction against Iraq which killed millions children was wrong and it was internal matter of destroyed Caliphate. What about genocide in Iraq since 2003 for which half of Iraqi population are gone? What about millions killed in Indonesia after Sukarno was ousted? What about coup in Iran in 1953 which ousted democratic elected Prime Minister of Iran? What about genocide in Bangladesh in 1971 by same Pakistanis Army who is now doing same genocide in Northern Pakistan at this moment? And yet in another recent book 'THE SECRET HISTORY OF SADDAM'S WAR UNHOLY BABYLON BY ADEL DARWISH AND GREGORY ALEXANDER' published by Victor Gollancz Ltd, London, it is mentioned in pg. 3-4 that 'Britain had recognized Kuwait's independence on 19th June 1961, abrogating an agreement signed in 1899 which had made the emirate a British protectorate-..... the 1899 Anglo-Kuwait agreement signed by the former Sheikh of Kuwait for 15,000 Indian rupees from the British commissioner in Abadan..., in pg. 6 it is mentioned 'Britain proceeded to establish posts and naval bases along the trade route to India via the Suez Canal, which was opened in 1866, and also signed exclusive agreements with Arab rulers throughout the Gulf. The first was with Bahrain in 1880, prohibiting the sheikhdom from making any treaties or agreements with any state other than Britain or establishing diplomatic relations with other countries without British consent. there have been 7,000 madrassas built ... and that's where bin Laden lives and we will go at him if we have actually (sic) intelligence.Seven thousand? Where on earth does this figure come from?It's an odd situation. Obama and Biden want to close down Iraq and re-conquer Afghanistan. The Palin College of Clichés characterised this as a white flag of surrender in Iraq while continuing to warn of the dangers of Iran, the name of whose loony president Ahmadinejad defeated McCain three times in last week's pseudo-debate.But it's the same old story. All we have learned in America these past two weeks, to quote Joan Littlewood's Oh! What a Lovely War, is that the war goes on.

Pirates of Pensacola Keith Thomson,2005-04 The Cooke and Hood families have been at each other's throats since the Spanish Main days. The latest chapter in their piratic rivalry takes place in 2004, when an old treasure map turns up. None of this seems to matter to Morgan Cooke, a cowardly, landlubbing accountant entirely ignorant of his heritage until his estranged father, Isaac, in need of crewmen, kidnaps him and thrusts him into the fray. When Morgan wakes up on a boat in the middle of the Caribbean, he learns that piracy still flourishes, albeit with far more discretion than in the old days--pirates disguise their fast boats as shrimpers or tugs--but with no less bloodshed. Judging even a shot at riches vastly preferable to a return to his lonely, fluorescent-lit work station existence, Morgan pierces his ear, dons the eye patch and peg leg, and set sail for glorious adventure.

Free and Open Source Software and Technology for Sustainable Development Sulayman K. Sowe,Govindan Parayil,Atsushi Sunami,2012 A global collection of experts in social, natural,

and human sciences, with contributions from researchers and practitioners in both developing and developed countries, cover the theoretical and practical implications of FOSS technologies. While FOSS development, education, and business potentials may appear as a phenomenon for the developed world, a sizable number of developing countries have implemented FOSS policies of their own. Empirical and anecdotal evidence continues to demonstrate the potential of FOSS technologies for giving people the opportunity to participate actively in the development and shaping of their own technology, stimulating the growth of indigenous software industries, creating local jobs, and lowering technology acquisition and deployment costs.

The Vega Adventures Shane Granger,2015-07-01 Early in 1892, one of Norway's finest boat builders launched a sailing legend. Over 100 years later Shane Granger and Meggi Macoun were peacefully enjoying a siesta when the great tsunami of 2004 changed their lives forever. With thousands of people desperately in need, they loaded their boat with donated food and medical supplies then set sail for Sumatra. That voyage was the beginning of a rip-roaring real life sea tale complete with storms, adventures, exotic tropical islands, and heart-rending drama. Come feel the wind, smell the riggers tar, and taste the salt in this tale of a century old wooden sailing boat and her crew of intrepid adventurers as they take up their yearly 7,500-mile journey to deliver over 25 tons of educational and medical supplies to some of our world's most remote island communities. About the Author SHANE GRANGER (1948 - until his luck runs out) has been in love with the sea since he was seven years old. Having worked as a radio DJ, advertising photographer, boat builder, director of museum ship restoration, and bush pilot, he has always come back to the sea. Shane has sailed thousands of miles solo, most of that on a square-rigged brigantine he salvaged from a beach in West Africa - a vessel he once single-handedly sailed across the Atlantic without a functioning rudder. After walking across the Sahara Desert, and being kidnapped by bandits in Afghanistan, his greatest ambition in life is to find a comfortable niche where he can enjoy the healthy benefits of monotony and boredom. He currently lives on an ancient wooden sailing boat with his partner Meggi Macoun and their cat Scourge.
