Interdisciplinary Public Health Reasoning and Epidemic Modelling: The Case of Black Death George Christakos,Ricardo A. Olea,Marc L. Serre,Hwa-Lung Yu,Lin-Lin Wang,2006-09-24 This multidisciplinary reference takes the reader through all four major phases of interdisciplinary inquiry: adequate conceptualization, rigorous formulation, substantive interpretation, and innovative implementation. Virtual Screening in Drug Discovery Juan Alvarez,Brian Shoichet,2005-03-24 Virtual screening can reduce costs and increase hit rates for lead discovery by eliminating the need for robotics, reagent acquisition or production, and compound storage facilities. The increased robustness of computational algorithms and scoring functions, the availability of affordable computational power, and the potential for timely structural determination of target molecules, have provided new opportunities for virtual screening, and made it more practical. Why then, isn't everyone using virtual screening? Examining the scope and limitations of this method, Virtual Screening in Drug Discovery explores the algorithms involved and how to actually use them. Part I offers perspectives on both ligand-based and docking-based virtual screens. The authors of these chapters frame many of the challenges currently facing the field. Part II considers the choice of compounds that are best suited as drug leads. Part III discusses ligand-based approaches, including descriptor-based similarity, traditional pharmacophore searching, and similarity based 3D-pharmacophore fingerprints. The final two sections are devoted to molecular docking. Part IV outlines some important and practical considerations relating to the energetics of protein-ligand binding and target-site topography, whereas specific docking algorithms and strategies are discussed in Part V. Notwithstanding this list of subjects, the book does not overwhelm you with more information than you need—many of the strategies outlined will transcend the specifics of any given method. Nor does the book purport to offer single best ways to use the programs. What it does is provide a snapshot of virtual screening that gives you easy access to strategies and techniques for lead discovery. Daniel E. Levy, editor of the Drug Discovery Series, is the founder of DEL BioPharma, a consulting service for drug discovery programs. He also maintains a blog that explores organic chemistry.

Proceeding Book of Proceeding Indonesian Textile Conference : textile 4.0 clothing and beyond (international conference) Asril Senoaji Soekoco, Karlina Somantri,Valentinus Galih Vidia Putra,2019-07-27 Welcome to the 3rd Indonesian Textile Conference (ITC) 2019. It is our great honor and pleasure to have you all here today. Indonesian Textile Conference is by far the only scientific event in the field of textiles in Indonesia aimed to bring together leading researchers, experts, students and people from the industry to share their knowledge and exchange scientific ideas. Indonesia is one of the leading textile exporter countries in the world with a total export value of USD 15.3 billion in 2015 and ranked the third after palm oil and steel (source: Ministry of Industry of Republic of Indonesia). It is one of the ten priority industries and the mainstay of Indonesian national industry. In a global economy and fast changing world, the future of Indonesian textile industry will increasingly depend on the industry's ability to relentlessly innovate in its products, to use the most advanced, flexible and resource-efficient processes and to focus its organizational structure as well as business operations according to the ever changing and growing needs of its customers. In all that, research and innovation are vital and play an ever increasing role. Indonesian Textile Conference was initiated and is dedicated to promote and bring progress to research and innovation in the field of textile and textile-related subjects in Indonesia. Textile is a rich multidisciplinary area of study and in fact has attracted a great deal of attention and numerous contributions from non-textile scientists. It is not just about clothing. It is all about material and all aspects that are inherent in the process of its production and applications. It covers a whole lot of area which includes but not limited to: advanced material and textile fibers, natural fibers and natural dyes, utilization of natural sources for textiles in general and/or functional textiles, environmental protection and ecological considerations in textile industry, life cycle analysis, clean/green production, best practices in energy efficient processes, bio-based polymer, bioengineering, nanotechnology, textile-based composites, industrial management and engineering, traditional textiles and batik, textile preservation and conservation, and design. Smart, functional and interactive textile is another area of interest which is quite recent and resulted from the convergence of latest developments in material science, physics and chemistry, microelectronics and informatics. Stimuli responsive materials, self-healing polymers, textile energy devices, textile sensor and antenna are only a few examples of development in this area. Recently added to this is a new emerging "fashionable technology". It is a new concept that brings fashion to the next level by integrating technology and fashion. It looks at the future fashion as intersection of design, fashion, science, and

technology beyond wearable technology. Still another important and interesting issue in textile is sustainability, especially due to the stigma associated with the industry as the big polluter and being not environmentally-friendly. Sustainable textiles and clothing involves the choice of materials, technologies and processing methods that ensure environmental and social friendliness and safety to human health throughout the entire life-cycle phases. Thus, there is an ample room for almost everyone to contribute in this conference. On behalf of the Organizing Committee and the management of Politeknik STTT Bandung, have a productive and fruitful conference.

Abortion and Nation Lisa Smyth,2017-03-02 Abortion politics are contentious and divisive in many parts of the world, but nowhere more so than in Ireland. Abortion and Nation examines the connection between abortion politics and hegemonic struggles over national identity and the nation-state in the Irish Republic. Situating the abortion question in the global context of human rights politics, as well as international social movements, Lisa Smyth analyses the formation and transformation of abortion politics in Ireland from the early 1980s to the present day. She considers whether or not the shifting connections between morality, rights and nationhood promise a new era of gender equality in the context of nation-state citizenship. The book provides a new sociological framework through which the significance of conflict over abortion and reproductive freedom is connected to conflict over national identity. It also offers a distinctive in-depth consideration of the connection between gender and nationhood, particularly in terms of its impact on women's status as citizens; within the nation-state; within the European Union; and as members of a global civil society.

Conspiracies and Secret Societies Brad Steiger,Sherry Steiger,2012-06-01 Startling allegations. Suppressed evidence. Missing witnesses. Assassinations. Cover-ups and threats. Documented connections to even deeper intrigue. Allusions to the New World Order. Coincidences? Too many to be mere coincidence? American history is replete with warnings of hidden plots by the Illuminati, the Freemasons, the Zionists, the Roman Catholics, the Communists, World Bankers, the Secret Government, and Extra-Terrestrial Invaders, to name a few. Separating fact from fiction, this compelling work provides gripping details and presents the information without bias, including hundreds of individuals, organizations, and events where official claims and standard explanations of actions and events remain shrouded in mystery. Conspiracies and Secret Societies: The Complete Dossier examines the most common subjects among conspiracy theorists, from historical topics such as the true relationship between Jesus and Mary Magdalene, the Roswell UFO crash, and the assassinations of John F. Kennedy and Martin Luther King Jr. to more current issues such as the death of Princess Diana, FEMA's response following hurricane Katrina, and the recent earthquake and tsunami in Japan.

Cure Tooth Decay Ramiel Nagel,2012-02-01 Forget about drilling, filling, and the inevitable billing. Your teeth can heal naturally because they were never designed to decay in the first place! They were designed to remain strong and healthy for your entire life. But the false promises of conventional dentistry have led us down the wrong path, leading to invasive surgical treatments that include fillings, crowns, root canals and dental implants. Now there is a natural way to take control of your dental health by changing the food that you eat. Cure Tooth Decay is based upon the pioneering nutritional program of dentist Weston Price, former head of research at the National Dental

Association. Dr. Price's program proved to be 90-95% or more effective in remineralizing tooth cavities utilizing only nutritional improvements in the diet. Cure Tooth Decay is the result of five years of research and trial and error that started as one father's journey to cure his daughter's rapidly progressing tooth decay. With Cure Tooth Decay you will join the thousands of people who have learned how to remineralize teeth, eliminate tooth pain or sensitivity, avoid root canals, stop cavities -- sometimes instantaneously, regrow secondary dentin, form new tooth enamel, avoid or minimize gum loss, heal and repair tooth infections, only use dental treatments when medically necessary, save your mouth (and your pocketbook) from thousands of dollars of unneeded dental procedures, and increase your overall health and vitality.
