The Failure of China's Democratic Reforms Zaijun Yuan, 2011-12-08 In its propaganda, the Chinese Communist Party does not deny the value of "democracy", but it insists that democracy in China can be only "socialist democracy with Chinese characteristics". The most essential nature of such "democracy" is that it is under the single-party system and it excludes multi-party politics and competitive elections. In recent years, "Chinese democracy" has won more support because of achievements the party has made in developing economy. This raises a question: does this "efficient" authoritarian political system in China, even if it is not democratic, deserve applause because it can facilitate economic development? The party also insists that it is "democratic". But, is the party's theory of "democracy" compatible with western democracy? Since 1998, the party has organized some political reforms, such as "direct elections" for township executives, "direct elections" for township party secretaries, township party congress reform and "deliberative democracy" experiments, while maintaining single-party politics. In the party's propaganda, some of these reforms have become party achievements in improving "socialist democracy with Chinese characteristics". In addition to these four kinds of party-organized reforms, another "reform" originated from the grassroots, the participation of independent candidates in a few local people's congress elections. This book examines these five local political reforms. It demonstrates that the four reforms instigated and organized by the party were tightly controlled and manipulated by the party. Although some reform measures may possibly liberalize parts of China's political mechanism, it is highly unlikely that the four reforms will eventually lead to political democratization in China. In the fifth "reform", which was motivated from outside the bureaucratic system, the party took drastic measures to repress the political participation of grassroots power. As a result, nearly all independent candidates in the local people's congress elections failed in their attempts to gain office. The prospects for this "reform" are also poor. The book argues that all five reforms have failed and that none will lead to China's democratization in the near future. The book concludes that the party's authoritarian regime in China is by nature anti-democratic and that so-called "socialist democracy with Chinese characteristics" is not democratic.

iMuslims Gary R. Bunt,2009-04-30 Exploring the increasing impact of the Internet on Muslims around the world, this book sheds new light on the nature of contemporary Islamic discourse, identity, and community. The Internet has profoundly shaped how both Muslims and non-Muslims perceive Islam and how Islamic societies and networks are evolving and shifting in the twenty-first century, says Gary Bunt. While Islamic society has deep historical patterns of global exchange, the Internet has transformed how many Muslims practice the duties and rituals of Islam. A place of religious instruction may exist solely in the virtual world, for example, or a community may gather only online. Drawing on more than a decade of online research, Bunt shows how social-networking sites, blogs, and other cyber-Islamic environments have exposed Muslims to new influences outside the traditional spheres of Islamic knowledge and authority. Furthermore, the Internet has dramatically influenced forms of Islamic activism and radicalization, including jihad-oriented campaigns by networks such as al-Qaeda. By surveying the broad spectrum of approaches used to present dimensions of Islamic social, spiritual, and political life on the Internet, iMuslims encourages diverse understandings of online Islam and of Islam generally.

The Other Australia/Japan Living Marine Resources Dispute Andrew Serdy,2017-01-05 Comparing the 1999-2000 Australia/New Zealand case against Japan's experimental tuna fishing dismissed for lack of jurisdiction with the ICJ's 2014 judgment against Japan's scientific whaling, Andrew Serdy suggests the scientific flaws in experimental design were similar in both disputes and could have justified a similar outcome in the tuna case.

Climate Change and Its Impact on Fertility Wani, Khursheed Ahmad,Naha, Nibedita,2021-01-22 Climate change is the biggest threat to the fertility of mammals across the globe through its potential effects on heat stress, nutrition security, extreme weather events, vulnerable shelter, and population migration. Climatic variables, such as temperature and humidity, are common environmental stressors as well as nutritional stress, which reduces fertility. Besides climate and nutritional stressors, another major factor responsible for reduced fertility discovered within the past decade is the exposure to potential hazardous substances such as chemical, radiation, physical, biological, and occupational hazards. This exposure includes anything from heavy metals and gases to pathogens and toxins and any substance that interferes with natural biological functions of the exposed workers, pregnant and breast-feeding workers, and young working population. There also must be research focused on developmental hazards that alter the structure and function of the developing embryo as well. The different climatic factors in the era of climate change need to be explored to discuss the impacts on fertility. Climate Change and Its Impact on Fertility highlights the issues and concerns that address the latest impact of climate change and mitigation strategies for enhancing early embryo survival and uterine potential. This book covers the effects of climate change on both the biological parents and the embryo by discussing the negative impacts, providing an overview of the variety of climate changes currently affecting fertility, and exploring possible solutions. This book is ideally intended for medical scientists and doctors, reproductive biologists, experimental toxicologists, mammalian cell biologists, clinicians, embryologists, health and safety agencies/regulatory authorities, public health officials, and policymakers along with practitioners, stakeholders, researchers, academicians, and students interested in climate change and its link to embryo growth, developmental risk, implantation failure, and fertility.

Report of the First Meeting of the Ad Hoc Working Group on the Future of APFIC – Virtual meeting, 18-19 August 2021 and Report of the Second Meeting of the Ad Hoc Working Group on the Future of APFIC – Virtual meeting, 24-25 February 2022 ?Food and Agriculture Organization of the United Nations,2022-08-02 The Asia-Pacific Fishery Commission (APFIC) was established in 1948 and has undergone various reforms since then to adapt to the changing international governance of fisheries as well as reforms in the function and resourcing of FAO's regional fishery bodies. This gradually induced a major crisis in the commission's ability to develop and execute a work programme for servicing its members. The 36th Session of the Asia-Pacific Fishery Commission, held in May 2021, recognized the pressing issues of financial unsustainability and FAO's declining willingness and ability to provide Regular Programme funding for commission activities. It recommended the establishment of an 'ad hoc working group on the future of APFIC' to analyse issues and explore possible options to advise the commission on its future. In a majority, the ad hoc working group recommended to support temporary suspension of the commission, in the light of questionnaire responses and the limited prospects for identifying financial resources for the activities of the commission. It prepared a draft resolution regarding suspension for consideration by the 37th session and recommended that suspension of the commission should be for a period five years. Noting that some Member Countries supported continuation, the ad hoc working group also prepared a draft resolution for continuation of the activities of the commission, should this be the decision of the 37th session. The text of this resolution incorporates specific reference to the establishment of a financial arrangement to support the work programme of the commission.
