Mobilising Politics and Society? Sonia Lucarelli, Claudio Radaelli, 2013-09-13 Mobilising Politics and Society offers a timely analysis of the European Union Convention's impact on the domestic political systems, and civil society in Southern Europe. It provides country chapters on Portugal, Spain, Italy, Greece, Malta, Cyprus and Turkey. All chapters follow a common scientific template, in order to offer material for genuine cross-country comparison. In addition, the volume contains horizontal chapters on three important issues: the mobilisation of intellectuals; sub-national politics; and the participation of women. The editors compare results of the country chapters in their conclusions. The book contains documentation on the EU Convention and South European participants. This volume was previously published as a special issue of the journal South European Society and Politics.

Advances in Cross-Language Information Retrieval Martin Braschler, Julio Gonzalo, Martin Kluck, 2003-11-17 This book presents the thoroughly refereed post-proceedings of a workshop by the Cross-Language Evaluation Forum Campaign, CLEF 2002, held in Rome, Italy in September 2002. The 43 revised full papers presented together with an introduction and run data in an appendix were carefully reviewed and revised upon presentation at the workshop. The papers are organized in topical sections on systems evaluation experiments, cross language and more, monolingual experiments, mainly domain-specific information retrieval, interactive issues, cross-language spoken document retrieval, and cross-language evaluation issues and initiatives.

Sustainability: Business And Investment Implications Diane-charlotte Simon, Alexander S Preker, Susan C Hulton, 2023-09-27 This book explores the business and investment implications of sustainability, both opportunities and challenges. The volume lays the groundwork for understanding the growing areas of sustainable business and sustainable finance. Over the past few decades, the world has witnessed significant improvements in economic development that meet a wide range of human needs. Ensuring that such development takes place in a 'sustainable' way is the central focus of the book. The book provides insights for businesses, investors, and others on how to navigate this complex and evolving landscape. The United Nations and global leaders in business and investment have emphasized the important role that the private sector can play in protecting the environment and promoting a more sustainable use of resources. 'What is needed now is a new era of economic growth — growth that is at the same time socially and environmentally sustainable. This call for action in the Forward to the 1987 Brundtland Report (Our Common Future),

which emphasizes that economic growth is part of the solution not the problem, still rings true nearly 40 years later. Gro Harlem Brundtland Report of the World Commission on Environment and Development, United Nations 1987 'Private sector leadership is vital to advance sustainable development and fight the existential threats of climate change, biodiversity loss and pollution.' António Guterres United Nations Secretary-General Message to International Chamber of Commerce's 13th World Chambers Congress United Nations Press Release on the Environment, June 21, 2023 (SG/SM/21851) Like Henry Ford's strategy over 100 years ago at the time of the mass introduction of the Model T Ford, Elon Musk had a similar strategy for switching from fossil fuels to renewable energy powered cars. '[Initially enter] the high end of the market, where customers are prepared to pay a premium, and then drive down [the] market as fast as possible to higher unit volume and lower prices with each successive model.' Elon Musk CEO Tesla Inc, Interview with Solar Tribune, Feb 16, 2020 'Investing for the long term requires taking a long-term view of what will impact returns, including demographics, government policy, technological advancements, and the transition to a low carbon economy.' Laurence D Fink Blackrock Chairman and Chief Executive Officer, Larry Fink's Annual Chairman's Letter to Investors, Blackrock, 2023 'Capital markets are an extraordinarily powerful tool in the fight against climate change. Government action is certainly critical. But ultimately, reducing emissions globally depends on the private sector recognizing the commercial opportunities that sustainability presents.' Michael R Bloomberg Founder of Bloomberg LP and Bloomberg Philanthropies David M Solomon CEO of Goldman Sachs Mobilize the Market to Fight Global Warming Bloomberg, Opinion Article, April 27, 2021

Strategic Regions in 21st Century Power Politics Jakub Landovský, Martin Riegl, Irina Valko, 2014-11-19 Resource wars, identity conflicts, disinformation, geostrategic rivalries, global power shifts, and an increasing number of non-state actors, make it difficult to analyse contemporary international relations. At the same time, contemporary power rivalries are increasingly affected by currency wars, economic diplomacy, competitive intelligence, economic warfare, indirect strategies, and state capitalism. The events in Ukraine in Spring 2014 reconfirm that Thomas Friedman's flattening of the world (based on the coincidence of the collapse of the Berlin Wall and the emergence of Netscape and the Web; workflow software; uploading; outsourcing; offshoring; supply-chaining; insourcing; in-forming; and "steroids" like Facebook and Instagram) goes hand in hand with the fact that, as postulated by Robert Kaplan, geography still matters in a global world. Globalization exists because of local processes, and local processes are ultimately shaped by globalization. Geography remains among the primary factors shaping a country's foreign policy. This book addresses the most fundamental geopolitical issues observable in a region where the "great game" of geopolitics is particularly still alive - in East- and South-East Asia. The contemporary geopolitical situation in this part of the world is far from stable: the width and depth of economic integration in the region resonates with the nature of political relations, crises in the global financial system, climate change, and the regional security architecture inherited from the Cold-War era. In terms of power relations, the particular changes in the region's status quo imply an immediate intensification of the PRC's activities within the framework of political and security dialogue with its direct neighbors, ultimately leading to a rivalry between China and the United States. The studies presented in this book largely focus on East- and South-East Asian actors and problems, while studies of the situation in other global regions enrich the research by adding a global dimension to the study of regional geopolitical affairs.

Translation and Translation Studies in the Japanese Context Nana Sato-Rosberg, 2012-08-09 Japan is often regarded as a 'culture of translation'. Oral and written translation has played a vital role in Japan over the centuries and led to a formidable body of thinking and research. This is rooted in a context about which little information has been available outside of Japan in the past. The chapters examine the current state of translation studies

as an academic discipline in Japan and a range of historical aspects (for example, translation of Chinese vernacular novels in early modern times, the role of translation in Japan's modernization, changes in stylistic norms in Meiji-period translations, 'thick translation' of indigenous Ainu place names), as well as creative aspects of translation in modern and postwar Japan. Other chapters explore contemporary phenomena such as the intralingual translation of Japanese expressions embedded in English texts emanating from diasporic contexts, the practice of pre-translation or writing for an international audience from the outset, the innovative practice of reverse localization of Japanese video games back into Japanese, and community interpreting practices and research.

Imagining Ireland Abroad, 1904-1945 Lili Zách, 2021-07-29 Offering a unique account of identity formation in Ireland and Central Europe, this book explores and contextualises transfers and comparisons between Ireland and the successor states of the Austro-Hungarian Empire. It reveals how Irish perceptions of borders and identities changed after the (re)birth of the small states of Austria, Hungary and Czechoslovakia and the creation of the Irish Free State. Adopting a transnational approach, the book documents the outward-looking attitude of Irish nationalists and provides original insights into the significance of personal encounters that transcended the borders of nation-states. Drawing on a wide range of official records, private papers, contemporary press accounts and journal articles, *Imagining Ireland Abroad, 1904-1945* bridges the gap between historiographies of the East and West by opening up a new perspective on Irish national identity.

High-Tech Terror Robert Samuel Cromartie, Richard J. Duma, 2009 The purpose of this book is to remind us that terrible weapons will always exist and are certain to be used against humanity in the future-not just in the military, but also in civilian areas. Thus, the more health care providers and everyone else involved with the health care industry know about this subject and the diseases and injuries these agents and weapons can produce, the more likely mankind will be able to successfully mute, survive, or prevent their catastrophic consequences. Divided into three parts, Part I begins with a discussion on the identification and classification of expected.

Thematic Background Study - Incorporating genetic diversity and indicators into statistics and monitoring of farmed aquatic species and their wild relatives Food and Agriculture Organization of the United Nations, 2021-12-29 Regular reporting and monitoring of fishery and aquaculture production using genetic information, i.e. using information on stocks, breeds, monosex groups, polyploids, products of modern biotechnology and hybrids, would allow aquaculturists to assess which breeds or strains could be most useful for production, and help fishery managers better manage and trace products from capture fisheries. Genetic information would be useful to both aquaculturists and fishery managers in assessing which stocks are under threat or endangered and in traceability requirements for the origin and handling of aquatic food products. However, the capacity and information requirements for incorporating genetic information into national and global statistics are significant and, in many cases, currently prohibitive. A key source of information for this paper was the reports currently being submitted to the FAO Fisheries and Aquaculture Department by countries as part of the process to produce the first report on The State of the World's Aquatic Genetic Resources for Food and Agriculture (SoW AqGR). Through this country-driven process, FAO is receiving information on stocks, varieties, strains and other farmed types that are currently being used in aquaculture and fisheries or that are being actively researched for future use. The country reports will further attempt to include relevant policies and constraints relating to the collection and monitoring of genetic data.

Ozawa Ichirō and Japanese Politics Aurelia George Mulgan,2014-11-27 Ozawa Ichirō was the axis on which Japanese politics turned for more than two decades. He helped to reshape the electoral system, political funding rules, the evolution of the party system, the nature of executive government, the roles and powers of bureaucrats, and the conduct of parliamentary and policymaking processes. Admired and reviled in almost equal measure, Ozawa has been the most debated and yet least understood politician in Japan, with little agreement to be found amongst the many who have debated his patent political assets and palpable political flaws. This book examines the political goals, behaviour, methods and practices of Ozawa Ichirō, and in doing so, provides fascinating insights into the inner workings of Japanese politics. It explores Ozawa's paradoxical and conflicting contributions in terms of two contrasting models of 'old' and 'new' politics. Indeed, therein lies the problem of understanding the 'real' Ozawa: he remained a practitioner of old politics despite his rhetorical agenda of change to bring about new politics. In seeking to unravel the Ozawa enigma, Aurelia George Mulgan reveals his primary motivations, to establish whether he sought power primarily to enact reforms, or, whether his reform goals simply disguised power-seeking objectives. This volume seeks to illuminate Ozawa's true character as a politician, and untangle the complex elements of old and new politics that he represents. Through an in-depth study of Ozawa and his political activities, this book shows how the Japanese political system works at the micro level of individual politicians, political relationships and systems. As such it will be of huge interest to students and scholars of Japanese politics, Asian politics and political systems.

The State of the World's Aquatic Genetic Resources for Food and Agriculture Food and Agriculture Organization of the United Nations,2019-07-24 The conservation, sustainable use and development of aquatic genetic resources (AqGR) is critical to the future supply of fish. The State of the World's Aquatic Genetic Resources for Food and Agriculture is the first ever global assessment of these resources, with the scope of this first Report being limited to cultured AqGR and their wild relatives, within national jurisdiction. The Report draws on 92 reports from FAO member countries and five specially commissioned thematic background studies. The reporting countries are responsible for 96 percent of global aquaculture production. The Report sets the context with a review of the state of world's aquaculture and fisheries and includes overviews of the uses and exchanges of AqGR, the drivers and trends impacting AqGR and the extent of ex situ and in situ conservation efforts. The Report also investigates the roles of stakeholders in AqGR and the levels of activity in research, education, training and extension, and reviews national policies and the levels of regional and international cooperation on AqGR. Finally, needs and challenges are assessed in the context of the findings from the data collected from the countries. The Report represents a snapshot of the present status of AqGR and forms a valuable technical reference document, particularly where it presents standardized key terminology and concepts.
