Sustainable Management Development in Africa

Hamid Kazeroony, 2016-04-14 Sustainable Management Development in Africa examines how African management and business scholarship can serve African and multinational management and organizations operating in Africa. In a broader sense, this book, within an African context, explores how human capital and intellectual capabilities can be organized at the higher education level; describes the cultural, social, and political influencers impacting management and organization; helps conceptualize African management theories to address organizational effectiveness; addresses the current management and organizational practices in Africa in identifying challenges; and provides guidance for more effective management and organizational operation. Aimed at researchers, academics, and advanced students alike, this book lays the

groundwork for the application of uniquely African theoretical and practical perspectives for sustainable management and organizational operation, as explained from a contemporary African point of view. In addition and most important, this book contains a uniquely African content that allows for developing new theories and examining new ways of doing business, thus reaffirming the rise of African scholarship in the fields of management, organization, and business.

Network Governance of Global Religions Michel S. Laguerre, 2012-03-28 This study seeks to explain three models of network governance embedded in digital practices that the mainstream monotheistic religions—Judaism, Catholic Christianity, and Islam—have used to lead and manage the worldwide distribution of their local nodes, exploring the connection between network governance and its digital embeddedness and showing how the latter enhances the performance of the former.

Multilevel Pedagogical Leadership in Higher Education Janne Elo,

Sustainable Business Change Vladimir Obradović, 2023-03-31 This volume aims to explore project management contributions to sustainable business change based on renewability, reuse, and repair as well as the effect of circular economy business solutions on project management in terms of the management approach, governance, and leadership. The main aim of integrating project management with a circular business paradigm is not only to learn how project management can contribute to achieving circular economy principles, but also to understand the impact of

business needs on project management. By understanding these needs, recommendations can be developed and promoted among different stakeholders such as governments, financial institutions, and education institutions with the goal of supporting and assisting project management to drive sustainable business change. This approach will enable readers to assess how project management professions can support a shift toward sustainable business. The primary audience of this work is management scholars, educators, researchers, and students. Scholars, government representatives, financial institutions, management educators, start-up companies, innovative entrepreneurs, and all others who use the circular economy to support sustainable development can also find much of use in this book.

Transitioning to Decent Work and Economic Growth
Philipp Aerni, Marianthe Stavridou, Isabelle Schluep, 2021-06-25 According to the United Nations Development Program (UNDP) and the United Nations Conference on Trade and Development (UNCTAD), the private sector plays a key role in achieving the UN Sustainable Development Goals (SDGs). After all, sustainable and inclusive economic growth is essential to enable more people to participate in global prosperity. Encouraging entrepreneurship and job creation are key to SDG 8, as are effective measures to eradicate forced labor, slavery, and human trafficking. Since more than 90 percent of jobs are created by the private sector, more attention must be paid to entrepreneurs that help create dynamic and responsible enterprises

that often generate positive externalities for society and the environment through investments in scalable innovations and a commitment to local embeddedness. As such, they help lift people out of poverty through new and relatively well-paid jobs and enable local economies to become more sustainable through global value chain integration. Transitioning to Decent Work and Economic Growth explores the prospects for SDG 8 in the Global South as well as the Global North. It especially considers the positive role the private sector may play as an enabler of human rights, creator of decent work and engine for inclusive development in different contexts. Further, it examines how the institutional environment can facilitate economic change, which may lead to social empowerment and enhanced economic opportunities. A key question the volume explores, is how—in an entrepreneurial context—innovation and scientific knowledge contribute to the creation of scalable innovation that help to de-couple economic growth from the use of natural resources. Transitioning to Decent Work and Economic Growth is part of MDPI's new Open Access book series Transitioning to Sustainability. With this series, MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world. Transitioning to Sustainability aims to add to the conversation about regional and global sustainable development according to the 17 SDGs. The book series is intended to reach beyond disciplinary, even academic boundaries. For use of the SDG logos and design, please see the according

Guidelines for the use of the SDG logo, color wheel, and 17 icons.

Science and Technology Teacher Education in the Anthropocene Miranda Rocksén, Elaosi

Vhurumuku, Maria Svensson, Emmanuel

Mushayikwa, Audrey Msimanga, 2022-05-17 This unique book compares anthropogenic challenges in science and technology teacher education between the northern and southern contexts of Sweden and South Africa, respectively. Presenting the results of a three-year research collaboration between science and technology teacher education researchers from South Africa and Sweden, the book explores theoretical perspectives and pedagogical experiences in response to challenges in the Anthropocene. It discusses research-informed practice in teacher education to address sustainable development. Chapters in the book collectively investigate the influence of current environmental and societal changes on the education of teachers, answering the question of how science and technology teacher education can adjust to current changes in the world and prepare new teachers for work in their future profession. Touching on issues such as climate change, global warming and pandemic diseases, the book uses a comparative approach and explores opportunities and possibilities for fulfilling the goals of science and technology education for sustainable development. The book offers recommendations and opportunities to implement sustainability issues and develop sustainable teaching strategies. It will be a key reading for researchers, academics and post-graduate students in the fields of

teacher education, science and technology education, sustainability education and comparative education.

DERECHOS HUMANOS DE LAS PERSONAS MIGRANTES:

Armin von Bogdandy, Mariela Morales Antoniazzi, Juana María Ibáñez Rivas, 2023-02-20 En nuestro continente, la Declaración Americana de los Derechos y Deberes del Hombre, la Convención Americana sobre Derechos Humanos y demás instrumentos del corpus iuris interamericano representan el marco de protección de los derechos humanos de las personas migrantes y sus familiares. A partir de dichos instrumentos, y en ejercicio de sus respectivas competencias, la Comisión Interamericana de Derechos Humanos y la Corte Interamericana de Derechos Humanos han desarrollado estándares fundamentales para la consolidación de dicha protección. A través de los capítulos de esta obra colectiva se pretende contribuir a mejorar el entendimiento de la dimensión de los estándares interamericanos en materia migratoria y explorar su potencial impacto transformador. El proceso de interamericanización de los ordenamientos jurídicos nacionales

evidencia una tendencia hacia la protección de los derechos humanos de las personas migrantes en América Latina y, en esa medida, orienta el cumplimiento de las obligaciones estatales de respeto y garantía. Ello se suma al impulso de los demás actores de la comunidad de práctica en la región para cumplir el mandato transformador de la Comisión y de la Corte Interamericanas. En síntesis, la interamericanización, como uno de los procesos que apalancan la construcción del *ius commune* en el ámbito de la movilidad humana, conlleva una relevante visibilización de los avances logrados y hace posible dar voz a las personas migrantes y a sus familias y, entre ellas, a quienes han sido víctimas de violaciones a sus derechos humanos.

Ecologia interiore Daniel Lumera, Immacolata De Vivo, 2022-05-10 Al cuore di questo nuovo libro dell'autore bestseller Daniel Lumera e della professoressa di Harvard Immacolata De Vivo c'è l'innovativo concetto di ecologia interiore. Un'opera che affronta le grandi tematiche del nostro tempo - la pandemia, le guerre, la crisi climatica - a partire dalla loro radice interiore e dal potere che ognuno di noi ha in sé per affrontarle e trasformarle in esperienze di evoluzione, consapevolezza e salute. Quando i nostri pensieri, emozioni, relazioni, stili di vita e azioni quotidiane sono tossici mettono a repentaglio non solo la salute e il benessere individuale ma anche la sopravvivenza dell'intero ecosistema, generando malattie, violenza e alterazioni ecologiche. Lo sviluppo sostenibile comincia, innanzitutto, dentro noi stessi: dalla

scoperta e dall'uso consapevole delle nostre energie rinnovabili interiori. La buona notizia è che esiste un modo per rendere salubre, ecocompatibile ed ecosostenibile il nostro ambiente interiore trasformando le tossicità in energie pulite, fonti d'armonia, salute, bellezza, equilibrio e benessere, per attraversare al meglio anche i momenti più difficili. Seguendo un approccio di ricerca inclusivo che unisce antiche sapienze alle più recenti scoperte scientifiche, Daniel Lumera e Immacolata De Vivo propongono un percorso multidisciplinare e rivoluzionario, che grazie a suggerimenti pragmatici ci permette di bonificare i diversi aspetti della nostra esistenza per potenziare il sistema immunitario, migliorare la qualità della vita e la longevità, raggiungere una nuova dimensione di salute, liberarci dalle dipendenze e gestire al meglio la relazione con la malattia. Impareremo inoltre a guarire le ferite emotive e integrare il passato, coltivare relazioni affettive e sessuali sane e felici, trasformare la solitudine in una preziosa alleata, liberarci dai pensieri tossici e creare una realtà prospera per noi stessi, gli altri e il pianeta. Uno straordinario viaggio per accedere a un'esperienza di benessere completa e scoprire il senso autentico della vita.

Competing Responsibilities Susanna

Trnka,Catherine Trundle,2017-03-10 Noting the pervasiveness of the adoption of responsibility as a core ideal of neoliberal governance, the contributors to *Competing Responsibilities* challenge contemporary understandings and

critiques of that concept in political, social, and ethical life. They reveal that neoliberalism's reification of the responsible subject masks the myriad forms of individual and collective responsibility that people engage with in their everyday lives, from accountability, self-sufficiency, and prudence to care, obligation, and culpability. The essays—which combine social theory with ethnographic research from Europe, North America, Africa, and New Zealand—address a wide range of topics, including critiques of corporate social responsibility practices; the relationships between public and private responsibilities in the context of state violence; the tension between calls on individuals and imperatives to groups to prevent the transmission of HIV; audit culture; and how health is cast as a citizenship issue. *Competing Responsibilities* allows for the examination of modes of responsibility that extend, challenge, or coexist with the neoliberal focus on the individual cultivation of the self. Contributors Barry D. Adam, Elizabeth Anne Davis, Filippa Lentzos, Jessica Robbins-Ruszkowski, Nikolas Rose, Rosalind Shaw, Cris Shore, Jessica M. Smith, Susanna Trnka, Catherine Trundle, Jarrett Zigon

Making Climate Forecasts Matter National Research Council, Division of Behavioral and Social Sciences and Education, Board on Environmental Change and Society, Commission on Behavioral and Social Sciences and Education, Panel on the Human Dimensions of Seasonal-to-Interannual Climate Variability, 1999-05-27 El Nino has been with us for centuries, but now we can forecast it, and thus

can prepare far in advance for the extreme climatic events it brings. The emerging ability to forecast climate may be of tremendous value to humanity if we learn how to use the information well. How does society cope with seasonal-to-interannual climatic variations? How have climate forecasts been used—and how useful have they been? What kinds of forecast information are needed? Who is likely to benefit from forecasting skill? What are the benefits of better forecasting? This book reviews what we know about these and other questions and identifies research directions toward more useful seasonal-to-interannual climate forecasts. In approaching their recommendations, the panel explores: Vulnerability of human activities to climate. State of the science of climate forecasting. How societies coevolved with their climates and cope with variations in climate. How climate information should be disseminated to achieve the best response. How we can use forecasting to better manage the human consequences of climate change.

Sustainability on University Campuses: Learning,

Skills Building and Best Practices Walter Leal Filho, Ugo Bardi, 2019-06-03 The implementation of sustainability initiatives on campuses is an essential component of promoting sustainability in the higher education context. In addition to reflecting an awareness of environmental issues, campus programmes demonstrate how seriously universities take sustainability at the institutional level. There is a lack of truly interdisciplinary publications that comprehensively address the issue of campus greening, and there is an even greater need for publications that do so at a truly international level. This book meets these needs. It is one of the outcomes of the “Second Symposium on Sustainability in University Campuses” (SSUC-2018), which was jointly organised by the University of Florence (Italy), Manchester Metropolitan University (UK), the Research and Transfer Centre “Sustainable Development and Climate Change Management” and the “European School of Sustainability Science and Research” at the Hamburg University of Applied Sciences (Germany), in cooperation with the Inter-University Sustainable Development Research Programme (IUSDRP). The book showcases examples of campus-based research and teaching projects, regenerative campus design, low-carbon and zero-carbon buildings, waste prevention, and resilient transport, among others. Ultimately, it demonstrates the role of campuses as platforms for transformative social learning and research, and explores the means by which university campuses can be made more sustainable. The aims of this

publication are as follows: • to provide universities with essential information on campus greening and sustainable campus development initiatives from around the world; • to share ideas and lessons learned in the course of research, teaching and projects on campus greening and design, especially successful initiatives and good practice; and • to introduce methodological approaches and projects intended to integrate the topic of sustainable development in campus design and operations. This book gathers contributions from researchers and practitioners in the field of campus greening and sustainable development in the widest sense, from business and economics, to the arts, administration and the environment, and hailing from Europe, Latin America, North America and Asia.

Does Transnational Mobilization Work for Language Minorities? André Michael Hein, 2014 This study scrutinizes the significance of transnational mobilization for language minorities, both with regard to their ability and their motivation to undertake such action. It is designed as interpretative case study on Romanian minorities in the post-communist countries of Serbia, Bulgaria, Ukraine, and Hungary. The book concentrates on immobile and marginal groups outside the focus of international politics and research. It contributes to recent research on cosmopolitanism: only an in-depth study of actors' everyday reality can produce qualified claims on the tense relationship between local rootedness on the one hand and possibilities for international mobility on the other. This, in turn, is vital to

assess the vigor of international processes such as globalization and European integration.
