**Security in Cyberspace** Giampiero Giacomello, 2014-07-31 Today, the Internet has become a source of information that no country or company can forgo. It is not only used to communicate or entertain, but most importantly to operate utilities and public services such as banking or air traffic. As the reliance on computer networks across societies and economies keeps growing, so do security risks in cyberspace - referred to as cybersecurity. Cybersecurity means protecting information and control systems from those who seek to compromise them. It also involves actors, both malicious or protective, policies and their societal consequences. This collection of essays provides a better understanding of the risks, perceptions, and myths that surround cybersecurity by looking at it from three different levels of analysis: the sovereign state, the infrastructure and stakeholders of the Internet, and the individual. The essays explore such issues as information ownership, censorship, cyberwars, cyberterrorism, privacy, and rebellion, bringing together expert knowledge from computer science and the social sciences with case studies. It reviews existing policies and practices and discusses the threats and benefits of living in an increasingly networked world. This authoritative analysis of one of the most controversial and compelling security debates of the twenty-first century will appeal to scholars and practitioners interested in security, international relations and policymaking.

**Governing Biobanks** Jane Kaye, Susan Gibbons, Catherine Heeney, Andrew Smart, 2012-02-03 Biobanks are proliferating rapidly worldwide because they are powerful tools and organisational structures for undertaking medical research. By linking samples to data on the health of individuals, it is anticipated that biobanks will be used to explore the relationship between genes, environment and

lifestyle for many diseases, as well as the potential of individually-tailored drug treatments based on genetic predisposition. However, they also raise considerable challenges for existing legal frameworks and research governance structures. This book critically examines the current governance structures in place for biobanks in England and Wales. It shows that the technologies, techniques and practices involved in biobanking do not always conform neatly to existing legal principles and frameworks that apply to other areas of medical research. Using a socio-legal approach, including interview data gathered from the scientific community, this book provides unique insights and makes recommendations about appropriate governance mechanisms for biobanking in the future. It also explores the issues around the secondary use of information, such as consent and how to protect privacy, when biobanks are accessed by a number of different third parties. These issues have relevance both within England and Wales and to a wide international audience, as well as for other areas where large datasets are used.

**Transgenic Insects, 2nd Edition** Mark Q. Benedict, Maxwell J. Scott, 2022-10-31 Technology for modifying the genotypes and phenotypes of insects and other arthropods has steadily progressed with the development of more precise and powerful methods, most prominently transgenic modification. For many insect pests, there is now almost unlimited ability to modify phenotypes to benefit human health and agriculture. Precise DNA modifications and gene drive have the power to make wild-type populations less harmful in ways that could never have been performed with previous transgenic approaches. This transition from primarily laboratory science to greater application for field use has also necessitated greater development of modeling, ethical considerations and regulatory oversight. The 2nd Edition of *Transgenic Insects* contains chapters contributed by experts in the field that cover technologies and applications that are now possible. This edition includes increased

attention to associated challenges of risk assessment, regulation, and public engagement. This book will be very valuable to students and researchers in entomology, molecular biology, genetics, public health and agriculture, and will also appeal to practitioners who are implementing the technology, and to regulators, stakeholders and ethicists.

**Handbook of Adhesive Technology** Antonio Pizzi, Kashmiri L. Mittal, 2017-12-15 This classic reference examines the mechanisms driving adhesion, categories of adhesives, techniques for bond formation and evaluation, and major industrial applications. Integrating recent innovation and improved instrumentation, the work offers broad and comprehensive coverage. This edition incorporates several new adhesive classes, new application topics, and recent developments with nanoadhesives and bio-based adhesives. Existing chapters are thoroughly updated, revised, or replaced and authored by top specialists in the field. Abundant figures, tables, and equations appear throughout the work.

*The EU Race Directive* Erica Howard, 2009-10-16 In 2000, the European Union adopted a Directive against discrimination on the grounds of racial or ethnic origin. This book provides an in-depth evaluation of the Race Directive and its effects, questioning how successful the Race directive has been. The EU Race Directive discusses the history of the fight against racial discrimination in the EU and the equality clauses in international Human Rights instruments. It then examines the terms race, racism and racial discrimination and equality in the Directive. The book also looks at the concepts of equality which can be distinguished in the Race Directive and in the subsequent developments at EU level. Examining whether the Directive has improved the protection against racial or ethnic origin discrimination for people within the EU, the book concludes with an assessment of how far the EU has come on the road to racial equality with the adoption of the Race Directive and the subsequent

developments. It also contains proposals for possible improvements. The comprehensive and up-to-date analysis in this book goes beyond most other books written on the subject and the specific focus on racism and racial discrimination means a more thorough examination than most texts focusing on discrimination on a larger number of grounds. This book will be of great value to students and academics in (European) law, social sciences and human rights, researching racism, racial discrimination, ethnicity and race relations. It will also be useful for policy makers.

Social Work with Sex Offenders Cowburn, Malcolm, Myers, Steve, 2016-04-27 This topical book engages with a wide range of issues related to social work practice with people who have sexually offended. It addresses the emotional impacts of 'facing the sex offender', the importance of values and ethics in practice, and reviews popular and academic understandings of sex offenders and sex crimes. Its accessible style and use of practice based learning exercises will help readers to reflect on theory, practice and developing emotional resilience.

Managing Privacy through Accountability Carla Ilten, Inga Kroener, Daniel Neyland, Hector Postigo, 2012-08-13 Draws together contributions from leading figures in the field of surveillance to engage in the discussion of the emergence of accountability as a means to manage threats to privacy. The first of its kind to enrich the debate about accountability and privacy by drawing together perspectives from experienced privacy researchers and policy makers.

Routledge Companion to Global Heritage Conservation Vinayak Bhanu, Trudi Sandmeier, 2019-02-12 The act of identifying, protecting, restoring, and reusing buildings, districts, and built landscapes of historic and cultural significance is, at its best, a reflective and consequential process of urban and socio-economic reform. It has the potential to reconcile conflicting memories, meanings, and cultural tensions, bridging and expanding the perceived boundaries of multiple

disciplines towards bigger aspirations of city-making and social justice. How and where do such aspirations overlap and differ across nations and societies across the world? In places with different histories, governance structures, regulatory stringency, and populist dispositions, who are the specific players, and what are the actual processes that bring about bigger and deeper change beyond just the conservation of an architectural or urban entity of perceived value? This collection of scholarly articles by theorists, academics, and practitioners explores the global complexity, guises, and potential of heritage conservation. Going from Tokyo to Cairo, Shenzhen to Rome, and Delhi to Moscow, this volume examines a vast range of topics – indigenous habitats, urban cores, vernacular infrastructure, colonial towns, squatters, burial sites, war zones, and modern landmarks. It surfaces numerous inherent issues – water stress, deforestation, social oppression, poverty, religion, immigration, and polity, expanding the definitions of heritage conservation as both a professional discipline and socio-cultural catalyst. This book argues that the intellectual and praxis limits of heritage conservation – as the agency of reading, defining, and intervening with built heritage – can be expansive, aimed at bigger positive change beyond a specific subject or object; plural, enmeshed with multiple fields and specializations; and empathetic, born from the actual socio-political realities of a place.

*Handbook of Geotourism* Ross Dowling, David Newsome, 2018-10-26 Ross K. Dowling and David Newsome present an original, substantial and much-needed contribution to the field to further our understanding of geotourism in theory and practice. This Handbook defines, characterizes and explores the subject through a range of international perspectives and case studies, identifying geotourism as a rapidly emerging form of urban and regional sustainable development. With extensive case studies from North and South America, Europe, Asia, Australasia and Africa, this global

Handbook examines and explains the relationship between geology and tourism. Thematically arranged sections cover the relationship of geology with tourism, sustainability and society, geotourism in urban areas, and interpretation and education strategies. The final two sections assess geotourism's impact through wide-ranging case studies of UNESCO global geoparks and geotourism in a range of countries. The eminent academics and practitioners demonstrate how geotourism is the future for engaging the public and protecting geosites, as well as emphasising the importance of sustainability. An essential resource for students and educators, this Handbook provides an international perspective for those interested in tourism, environmental geography, ecology and geology. Written with practitioners in mind, this book reveals how tourism professionals and geologists should each know about the nexus of their subjects.

**Women, Work and Transport** Tessa Wright, Lucy Budd, Stephen Ison, 2022-10-17 Women, Work and Transport is an international collection that brings together researchers with global expertise in gender and transport work to provide original evidence of the experiences of women working in all transport modes across countries in the Global North and the Global South.

**Power in North-South Trade Negotiations** Peg Murray-Evans, 2018-10-10 Advancing a constructivist conceptual approach, this book explains the surprising outcome of the Economic Partnership Agreements (EPAs) between the European Union and developing countries in Africa, the Caribbean and the Pacific (the ACP countries). Despite the EU's huge market power, it had limited success with the EPAs; an outcome that confounds materialist narratives equating trade power with market size. Why was the EU unable to fully realise its prospectus for trade and regulatory liberalisation through the EPA negotiations? Emphasising the role of social legitimacy in asymmetrical North-South trade negotiations, Murray-Evans sets the EPAs within the broader context of an

institutionally complex global trade regime and stresses the agency of both weak and strong actors in contesting trade rules and practices across multilateral, regional and bilateral negotiating settings. Empirical chapters approach the EPA process from different institutional angles to explain and map the genesis, design, promotion and ultimately limited impact of the EU's ambitious prospectus for the EPAs. This volume will be particularly relevant to students and scholars of international trade and development and the EU as an international actor, as well as those researching international political economy, African politics and international trade law.

**Contemporary Cuba** Hope Bastian, Philip Brenner, John M. Kirk, William M. LeoGrande, 2023 This revised and updated edition focuses on Cuba since Raúl Castro stepped down as president. Offering a comprehensive description and analysis of contemporary Cuban politics, economy, international relations, and society, it is ideally suited for students and general readers seeking to understand this small yet still influential country.

**Geography of World Pilgrimages** Lucrezia Lopez, 2023-07-01 This book points out how pilgrimage studies rely on interdisciplinary academic interests, being always more determined by anthropological, social, cultural and economic factors. The volume gathers interdisciplinary contributions revealing different approaches and academic interests when researching pilgrimage. Finally, the proposal introduces a comparative international breath to reflect upon such complex phenomenon that since Antiquity still impregnates the history of human being across the world. As pilgrimage studies are closely related to mobility issues, how the contemporary mobile world is altering and re-signifying pilgrimage dynamics and meanings will also be discussed in detail. The term "pilgrimage" evokes key concepts deriving from different fields, all of them collected in the final glossary. The primary audience of this work are academics and researchers from different fields

involved in pilgrimage studies. The work may also be useful in teaching (advanced) university courses.

**A Manifesto for Mental Health** Peter Kinderman, 2019-10-08 A Manifesto for Mental Health presents a radically new and distinctive outlook that critically examines the dominant 'disease-model' of mental health care. Incorporating the latest findings from both biological neuroscience and research into the social determinants of psychological problems, Peter Kinderman offers a contemporary, biopsychosocial, alternative. He warns that the way we care for people with mental health problems is creating a hidden human rights emergency and he proposes a new vision for the future of health organisations across the globe. The book highlights persuasive evidence that our mental health and wellbeing depend largely on the society in which we live, on the things happen to us, and on how we learn to make sense of and respond to those events. Kinderman proposes a rejection of invalid diagnostic labels, practical help rather than medication, and a recognition that distress is usually an understandable human response to life's challenges. Offering a serious critique of establishment thinking, A Manifesto for Mental Health provides a well-crafted demonstration of how, with scientific rigour and empathy, a revolution in mental health care is not only highly desirable, it is also entirely achievable.

**Regulatory Accountability** Dorit Rubinstein, 2007

Narrative Ethics in Public Health: The Value of Stories Drue H. Barrett, Leonard W.

Ortmann, Stephanie A. Larson, 2022 This Open Access book illustrates the power of stories to illuminate ethical concerns that arise in public health. It complements epidemiological or surveillance evidence, and reveals stakeholder perspectives crucial for public health practitioners to develop

effective and ethical public health interventions. Because it relies on the natural and universal appeal of stories, the book also serves to introduce the field of public health to students considering a career in public health. The opening section of the book also serves as a more didactic introduction to public health ethics and the field of narrative ethics. It describes the field of public health ethics including ethical principles relevant to public health practice and research, and the advantages of a narrative ethics approach. That approach explores the problems and the ethical challenges of public health from the inside, from the perspective of those experiencing health problems to the challenges of those who must address these problems. The later sections consist of 14 chapters that present the actual stories of these public health problems and challenges. In narrative style they range from first person narratives of both practitioners and citizens, to analysis of published short stories. The problems and challenges they address include issues relating to justice concerns, surveillance and stigma, community values and the value of community, trust and the value of information, and freedom and responsibility. Specific public health topics include resource allocation, restricting liberty to protect the community from health threats, and the health impact of trauma, addiction, obesity and health disparities.

**The Iran Nuclear Issue** Yael Ronen, 2010-05-31 Controversy over the Iranian nuclear policy has been mounting in both legal and political circles since the early 2000s. Most recently, the IAEA, tasked with verifying compliance of Member States with the NPT, has been expressing concern that Iran's nuclear efforts are directed not solely at peaceful uses but also at military purposes. In response, various States have tried, individually and collectively, to engage Iran in agreed frameworks of action that would include an Iranian self-imposed restraint regarding its nuclear development. This volume documents the Iranian nuclear issue, tracing the evolution of international interest and concern with

Iran's nuclear policy since the 1970s, when Iran began earnest efforts to acquire nuclear capabilities. Emphasis is placed on events since 2002-2003, when it was established that Iran had concealed certain aspects of its nuclear activities from IAEA. Alongside reports of the IAEA and Security Council documents, the volume covers diverse sources rather than relying solely on UN organs and agencies, international organisations or dedicated ad hoc bodies.

**Direito e Religião Anais do vi simpósio de filosofia da dignidade humana** , A relevância da religião em estudos das humanidades sempre foi inquestionável. Entretanto, nas últimas décadas, este tema tem recebido especial destaque. Suas relações com o direito e, especialmente, com a dignidade humana, revelam férteis discussões e infindáveis polêmicas cujo enfrentamento se mostra inadiável diante dos desafios da sociedade contemporânea. Assim, o leitor encontrará nesta obra uma variedade de pequenos textos sobre o tema da religião, abordado por diferentes perspectivas e em franco diálogo com outras áreas de saber, em especial filosofia, política, direito e estética, resultantes das discussões empreendidas no VI Simpósio Internacional de Filosofia da Dignidade Humana, ocorrido em 2021, cujo tema foi “O Direito entre o Sagrado e o Profano”.
